THE ONE-STOP SUPPLIERS

One partner for everything – Rittal serves the entire value creation chain for enclosure manufacturing. This unrivalled pervasiveness helps to boost efficiency and maintain consistently high standards.

The entire value chain from a single source – The intelligent linking of resources and measures in real time is the defining characteristic of a smooth-running, fully automated process. Rittal facilitates the seamless integration of engineering, systems and automation with a perfect blend of planning aids, system products and machining solutions. Experience the optimum value chain live at the Rittal Innovation Center in Haiger.

IT INFRASTRUCTURE

SOFTWARE & SERVICES

Engineering

With Rittal engineering tools, you can be sure that the data you need is always available at the right time, in the right place, and in the required quality and depth. This enables you to create a virtual prototype.

Benefit: Unrivalled efficiency.

THE WORKFLOW PARTNERS

System

Rittal's comprehensive modular system accommodates every requirement, however individual, and includes enclosure, power distribution, climate control and IT infrastructure systems.

Benefit: Maximum flexibility

Automation

Our extensive portfolio of tools and machining systems is designed to optimise and automate processes, even at workshop level.

Benefit: Exceptional competitiveness.

THE INVENTORS

Ideas to boost efficiency – It all began with the first standardised enclosure, which led to immediate time and money savings for Rittal's customers. It revolutionised the industry. Even today, improving efficiency for users is still our primary objective. Rittal pursues this goal with passion and inventiveness, as evidenced by our 1,500 patents. The latest example is our VX25 large enclosure system.

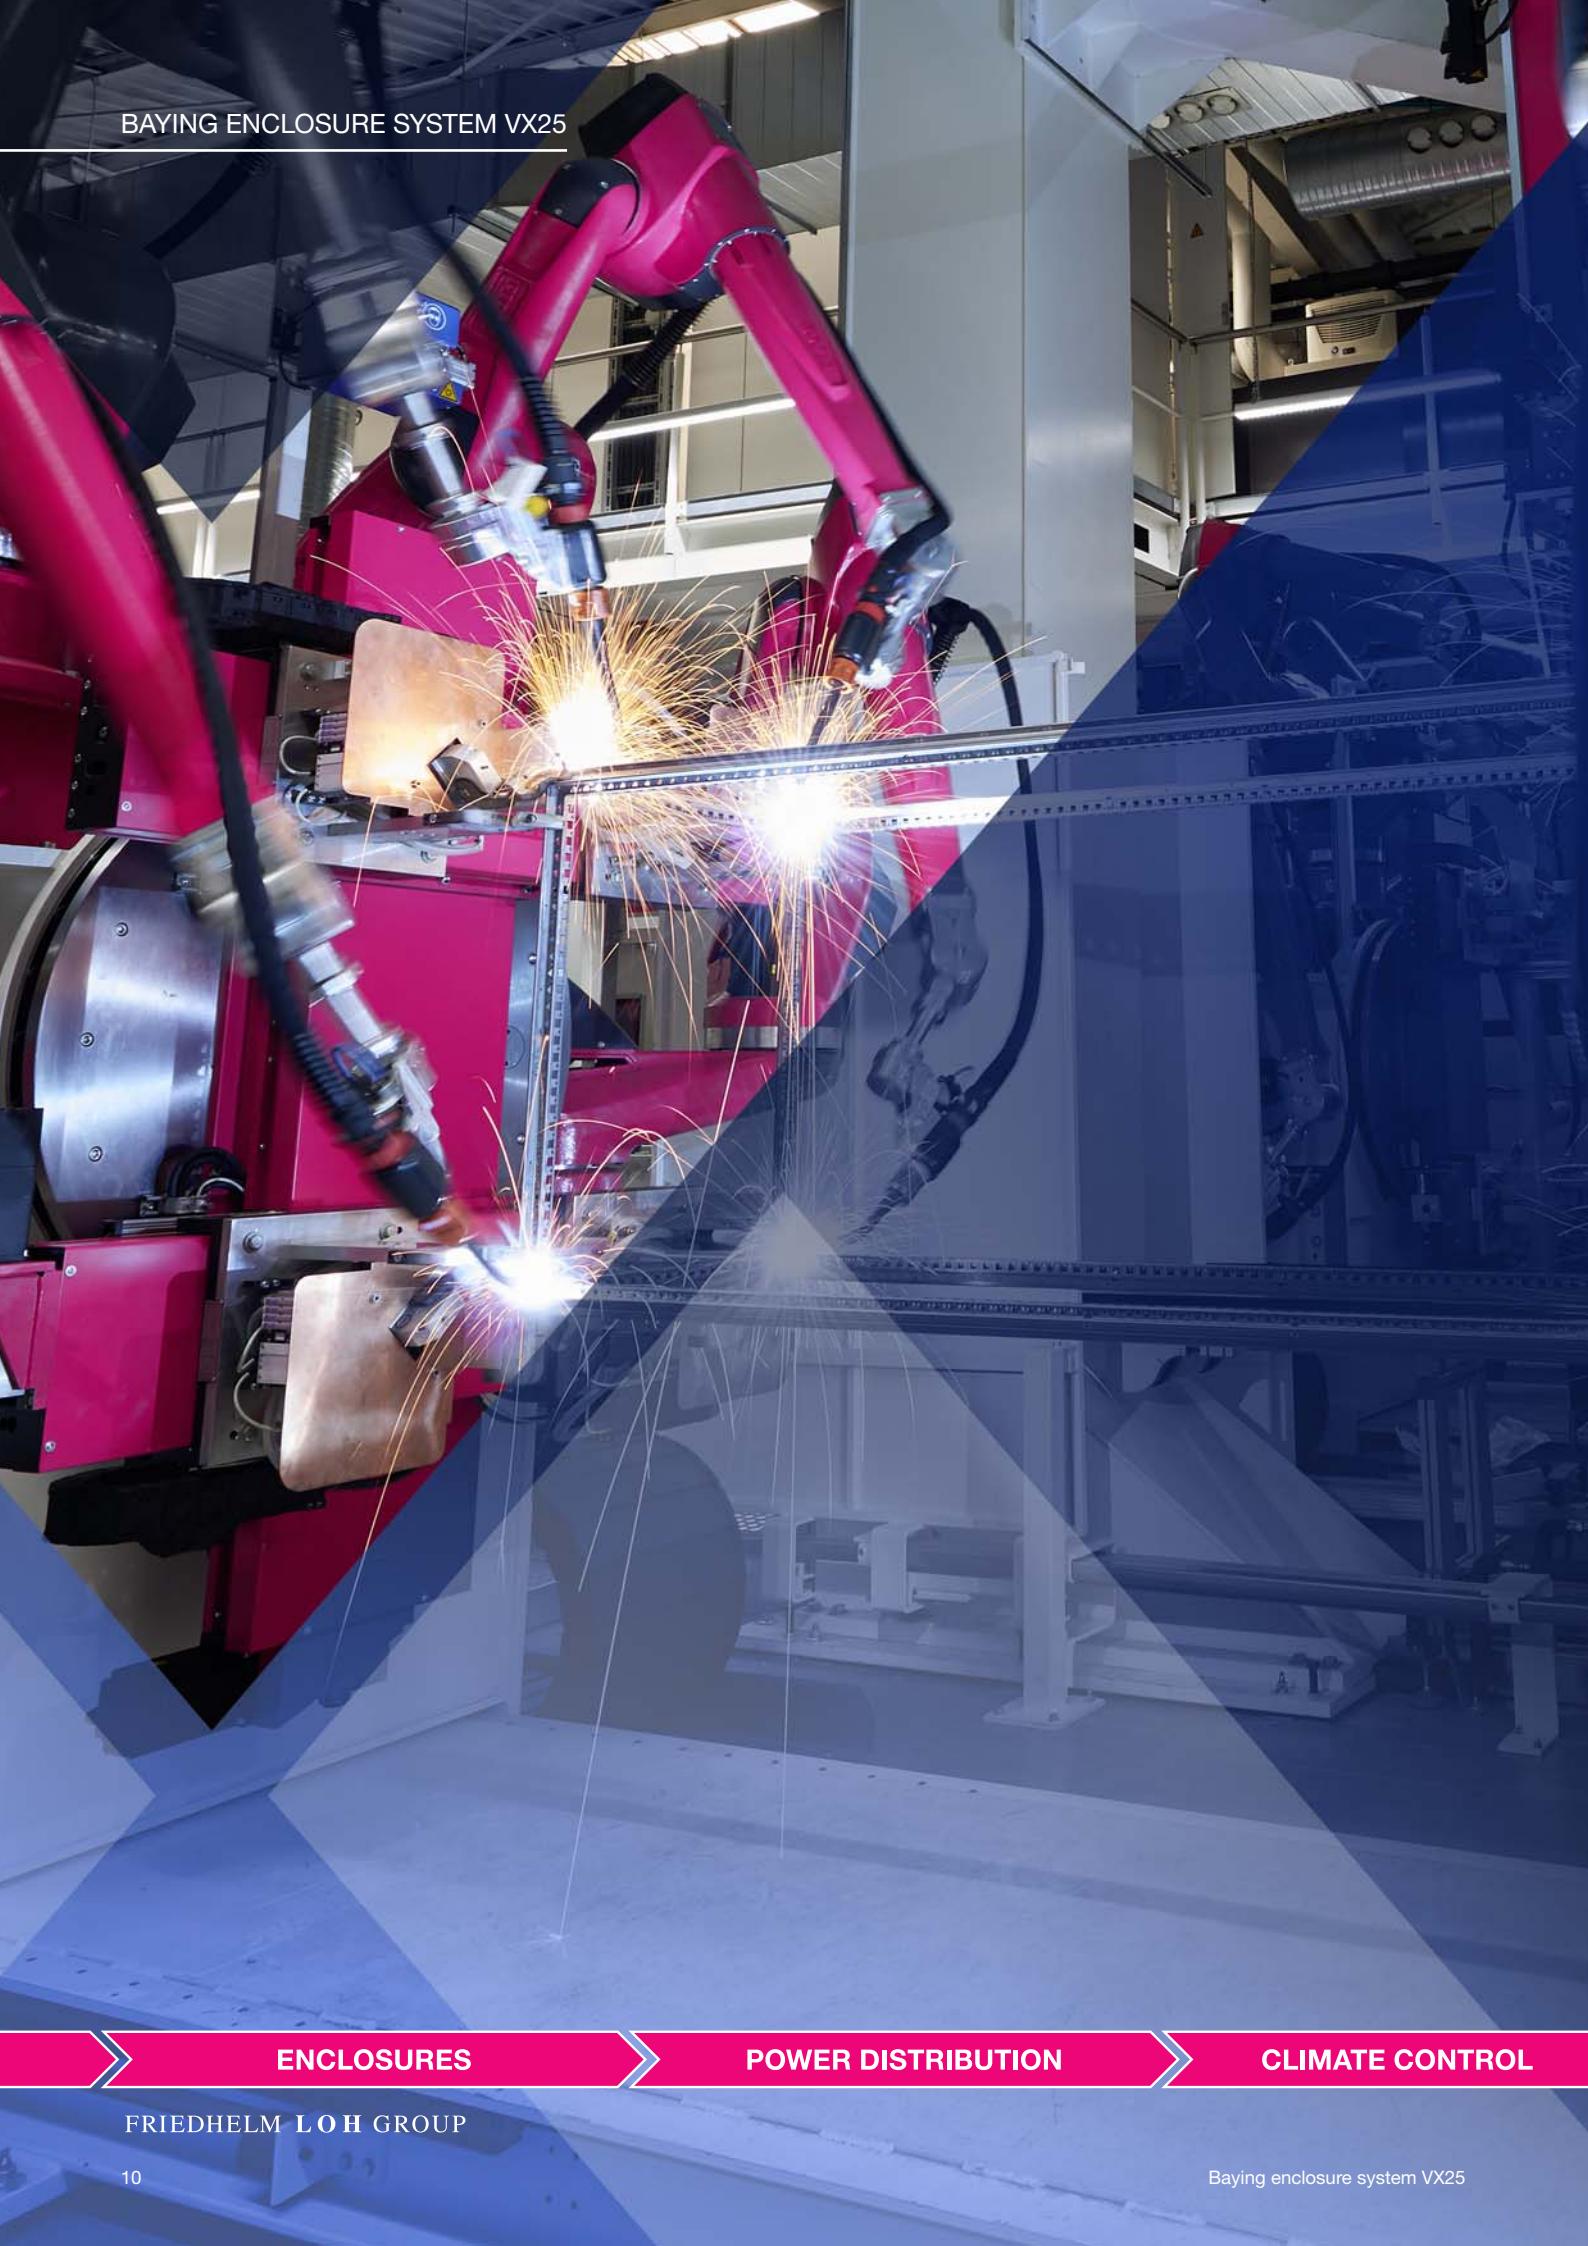

Innovations for improved workflows – Rittal develops new solutions to keep its customers at the cutting edge of technology. The VX25 is a new platform which can be integrated seamlessly into fully automated switchgear and controlgear manufacturing. Workflows become more transparent, faster, and more efficient. The digital twin becomes a reality.

THE MOVERS AND SHAKERS

Manufactured to Industry 4.0 – Made in Germany. The VX25 was developed in Germany, and is also manufactured there to 4.0 standards, using world-class, digitally networked technology. Each day, we produce 15,000 enclosures in 13 production sites on three continents, in a consistently high quality and offering unparalleled flexibility and availability.

World-renowned quality – The VX25, with its internationally recognised approvals and certifications, is ideal for global use and meets the highest quality benchmarks. Compliance with global standards is ensured by stringent testing to international regulations, plus regular production inspections by external test institutes.

THE PROBLEM SOLVERS

Fast delivery off the shelf – Rittal's products, including the VX25, are generally available within 24 hours in Europe, and within 48 hours worldwide. To this end, Rittal operates 13 production sites, 58 subsidiaries and around 90 warehouses worldwide. The benefits for Rittal customers include greater flexibility in terms of planning, scheduling and production, less storage space requirements, and reduced capital tie-up.

Fast global service – If you opt for the VX25, you can rely on Rittal's global service operation, dedicated to ensuring plant availability, identifying potential savings, and resolving technical problems in an uncomplicated fashion. The Rittal service network is implemented and maintained by 5 international service hubs, more than 1,000 service engineers working at 150 locations worldwide, and a round-the-clock Rittal service hotline.

THE GLOBAL MARKET LEADERS

Industry insider – The VX25 is revolutionary when it comes to flexibility and adaptability. And there's a good reason for this: Rittal has an in-depth understanding of the requirements of the various markets, and boasts decades of experience as a partner to all sectors of industry, from automotive, to food, to the aerospace industry.

One-stop supplier – The VX25 is part of the comprehensive Rittal system, available worldwide. It provides everything you need from a modern enclosure manufacturer, from engineering tools, to enclosures, power distribution and climate control, as well as the full range of accessories for assembling and configuring enclosures.

CLIMATE CONTROL

THE TIME SAVERS

Intuitive configuration translates into time savings of up to 95% – To this end, Rittal has devised an online tool, the Rittal Configuration System. Once you have selected your enclosure, it allows you to precisely position your custom-fit accessories.

Define cut-outs and drilled holes automatically – Even at the configuration stage, the cut-outs required in the panels may be defined with millimetre accuracy and transferred into the plans.

The benefits for you – Finally, the system generates CAD files. Alongside the fully configured design, these files also contain all the data needed to control the Perforex machining centre, making NC-controlled machining of enclosure panels viable even with small batch sizes.

THE BENEFIT PROVIDERS

More digitisation

The QR code on all machinable enclosure panels permits fully automated incorporation into the production workflow, for seamless digital monitoring at every stage, from the incoming merchandise through to completion.

More labour-saving

The new hinge is designed for simple, tool-free installation and removal of the doors, eliminating the need to separately unlock and lock the hinge bolts.

More reduction of parts

The frame section, which is identical both horizontally and vertically, allows uniform punched sections and rails to be used throughout, reducing the number of part variants by up to 40%.

More installation security

The stable base frame enables the direct, secure attachment of the enclosure from the inside. The large opening makes it simple to install cables with large bending radii from the mounting plate to the base.

More assembly-friendly

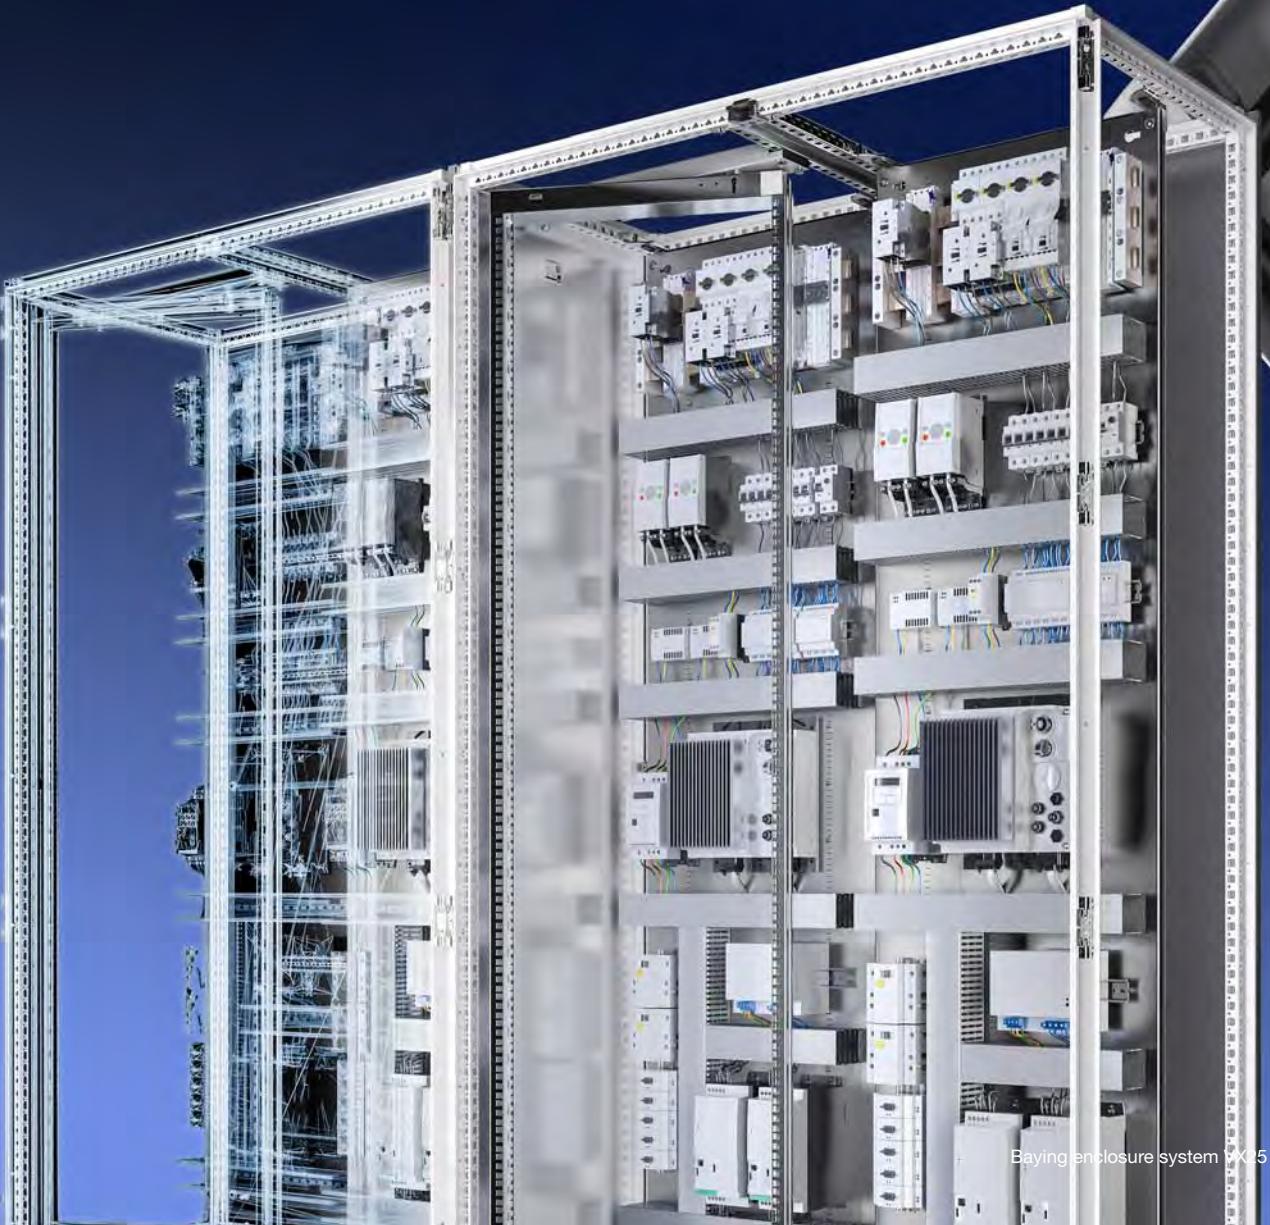

The frame section enables completely unobstructed assembly, even from the outside, so that punched sections can be retro-fitted in areas that are no longer accessible from the inside.

SYSTEM ADVANTAGES – MORE **SYSTEM BENEFITS**

Rittal standards deliver more overarching system advantages that are anything but standard.

02

Digitisation

The QR code on all the panels that are to be machined simplifies their fully automatic incorporation into the production workflow and enables seamless, digital monitoring from goods receipt through to completion.

02

01

01

Time savings

Precise hole counting offers an easy point of orientation at all levels of the enclosure frame when fixing rails and punched sections in place.

Simplification of work

In the case of one-person assembly, the positioning aid for side and rear panels provides a user-friendly and ideally suited preliminary fixing so that the panels can then be screwed into place using both hands.

Material saving

Series-standard potential equalisation is generated automatically for panels when they are screwed into place, therefore saving up to seven earth straps per enclosure, while the absence of sharp-edged protruding parts improves safety standards at work.

Corrosion protection

The three-stage surface treatment promises optimum corrosion protection and is resistant to mineral oils, lubricants, machining emulsions and several solvents.

- [1] Nanoceramic treatment
- [2] Electrophoretic dipcoat priming
- [3] Powder coating

Safety

The seamless, foamed-in PU seal offers long-term elasticity and can be painted over as required without posing any problems.

System

The automatic potential equalisation in the roof, rear panel and side panels functions as a grounding mechanism when Rittal climate control units and Rittal fan-and-filter units are installed.

Health and safety at work

Rounded edges deliver the highest standards in occupational health and safety when working on the enclosure.

Stability

The seamless, laser-welded, roll-formed enclosure profile ensures optimum force transmission on installed equipment.

Certainty for engineering

Numerous conversion and planning tools help Rittal customers with the automated production process and with work on the virtual prototype.

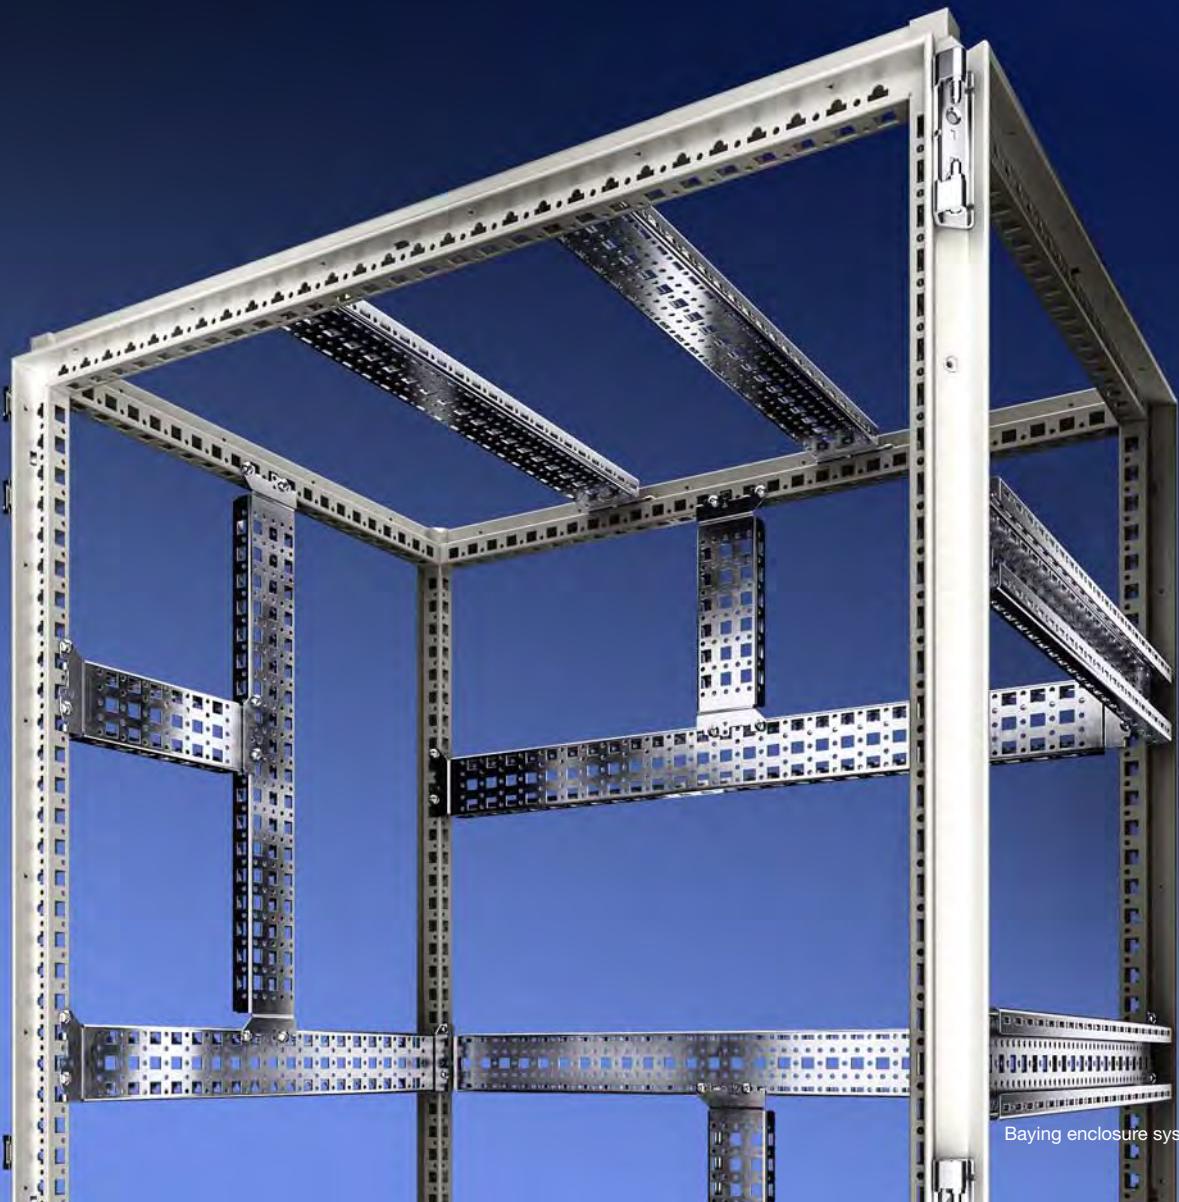

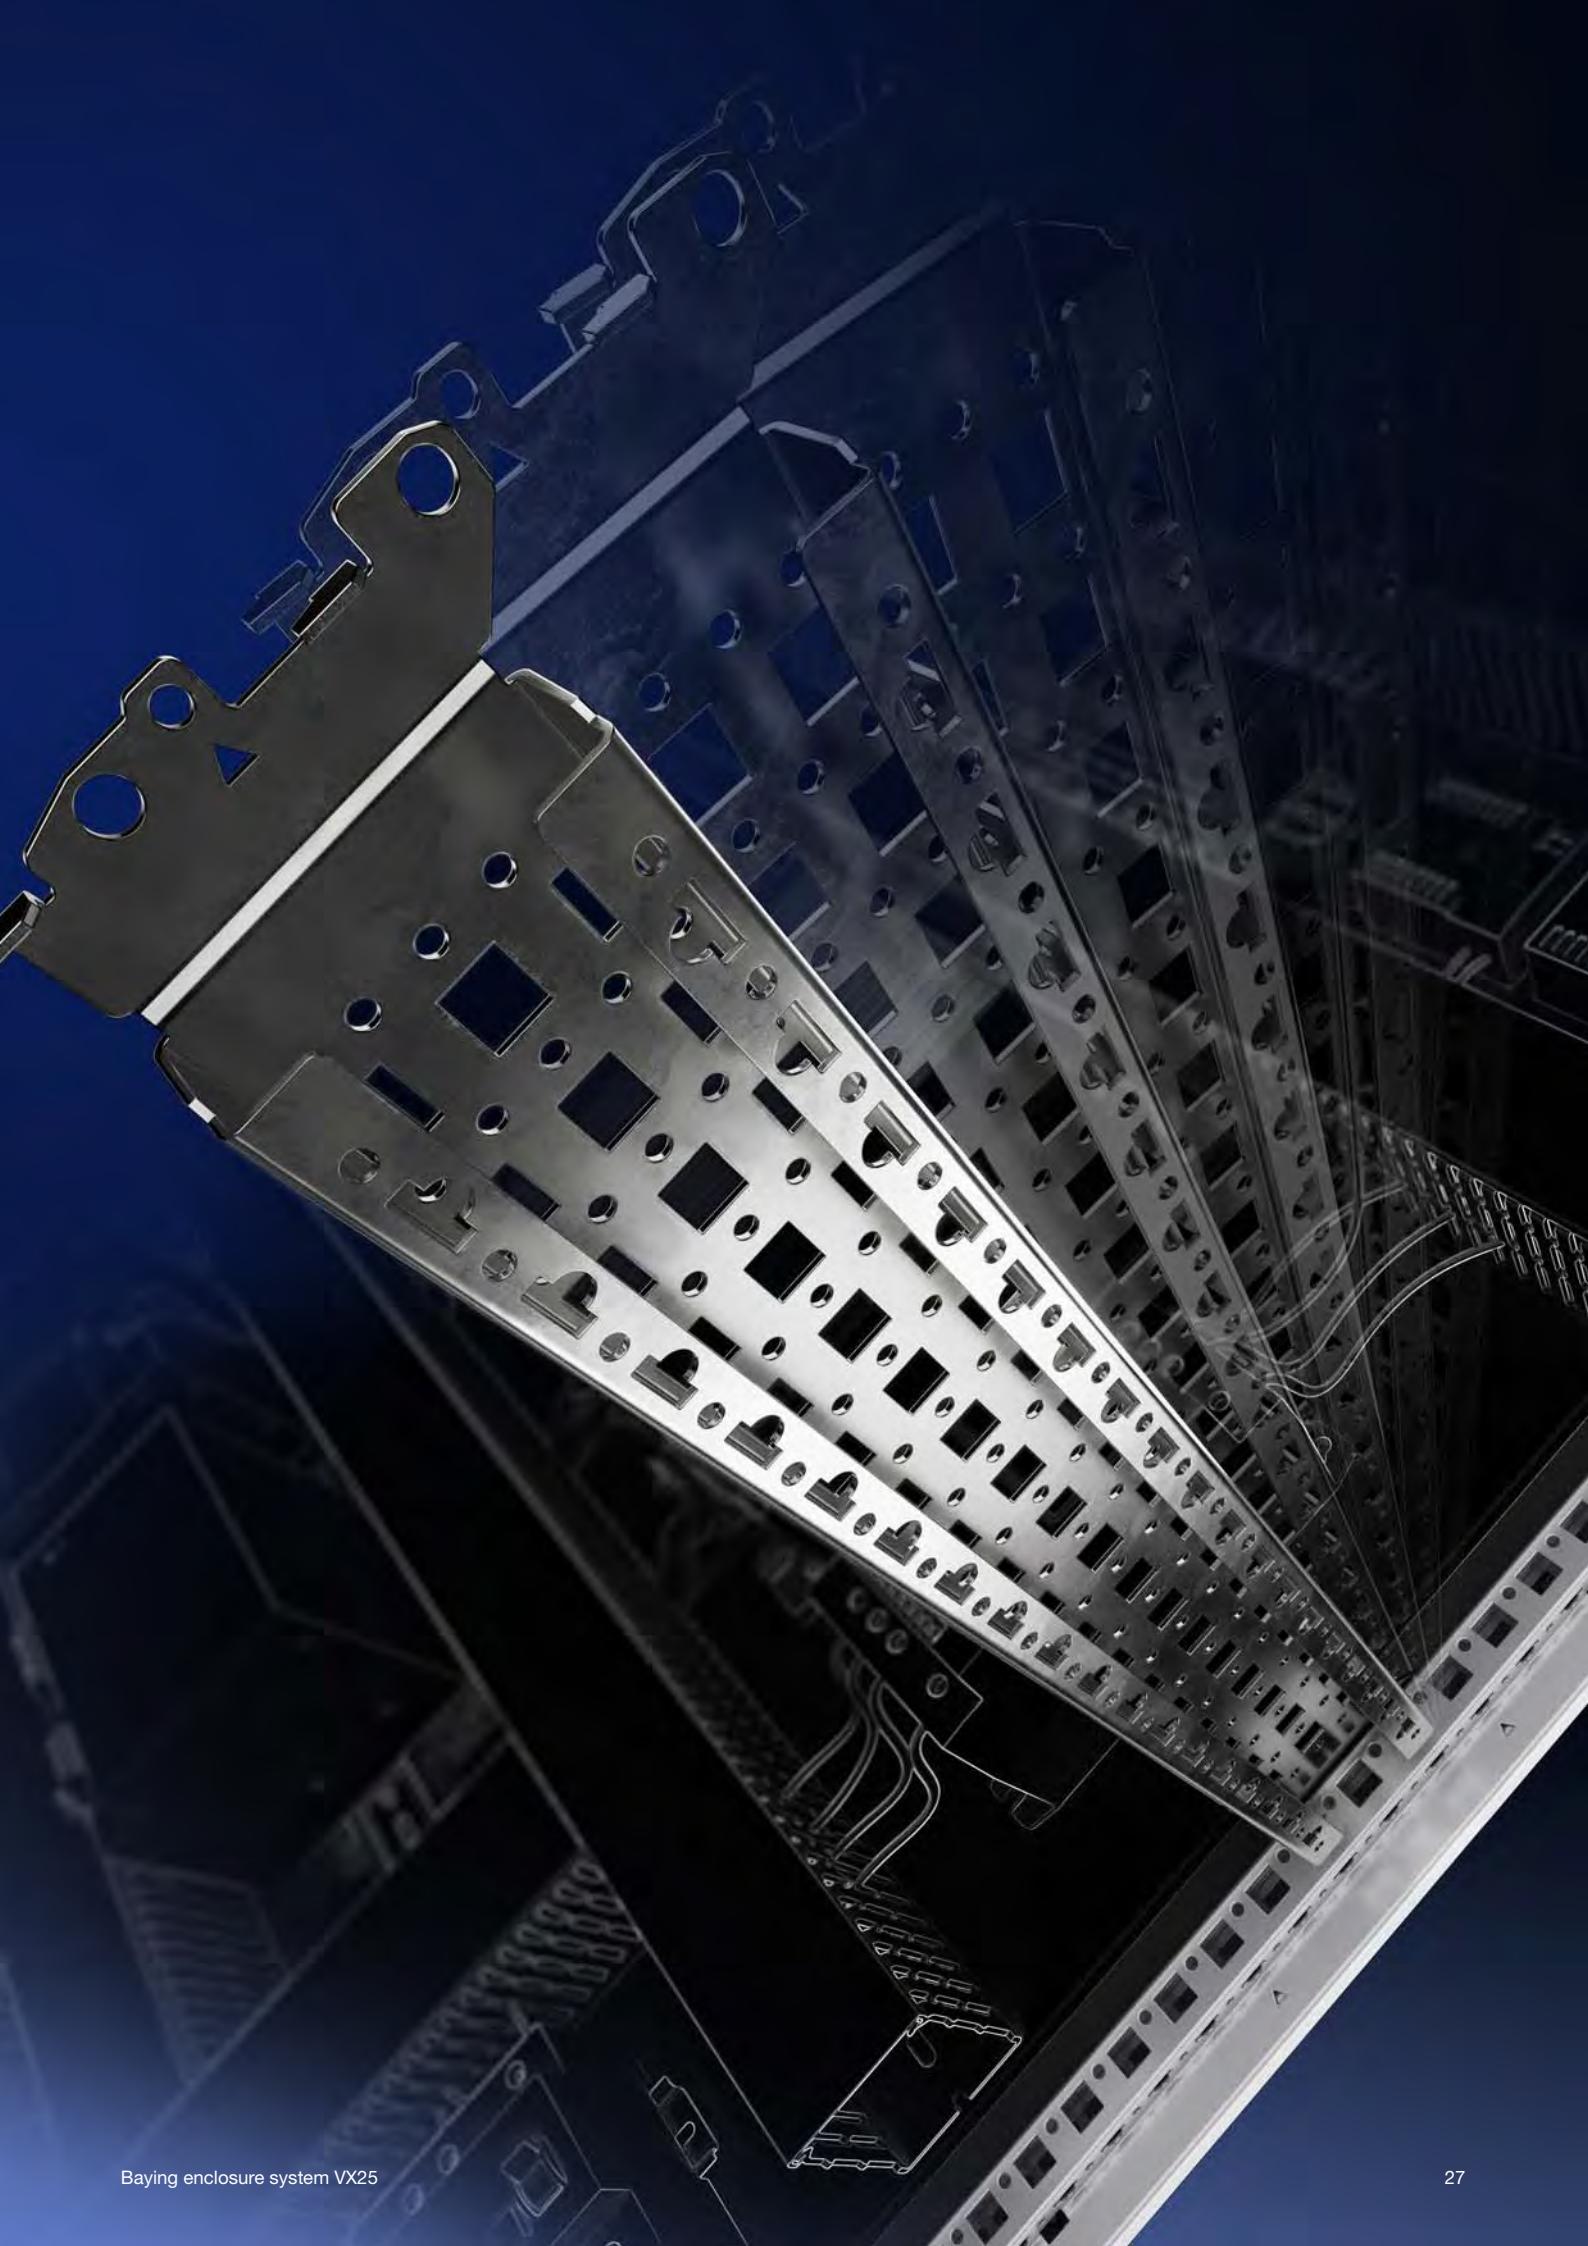

- Configurators
- Parts list translator
- EPLAN Pro Panel
- 2D/3D CAD data
- ecl@ss Advanced
- Technical documentation
- Data for planners
- Assembly videos

FRAME AND PUNCHED SECTION – MORE **SYSTEM BENEFITS**

More assembly-friendly and efficient engineering thanks to a frame profile with a 25 mm pitch pattern that is symmetrical across all levels and can be accessed from all sides.

Accessibility

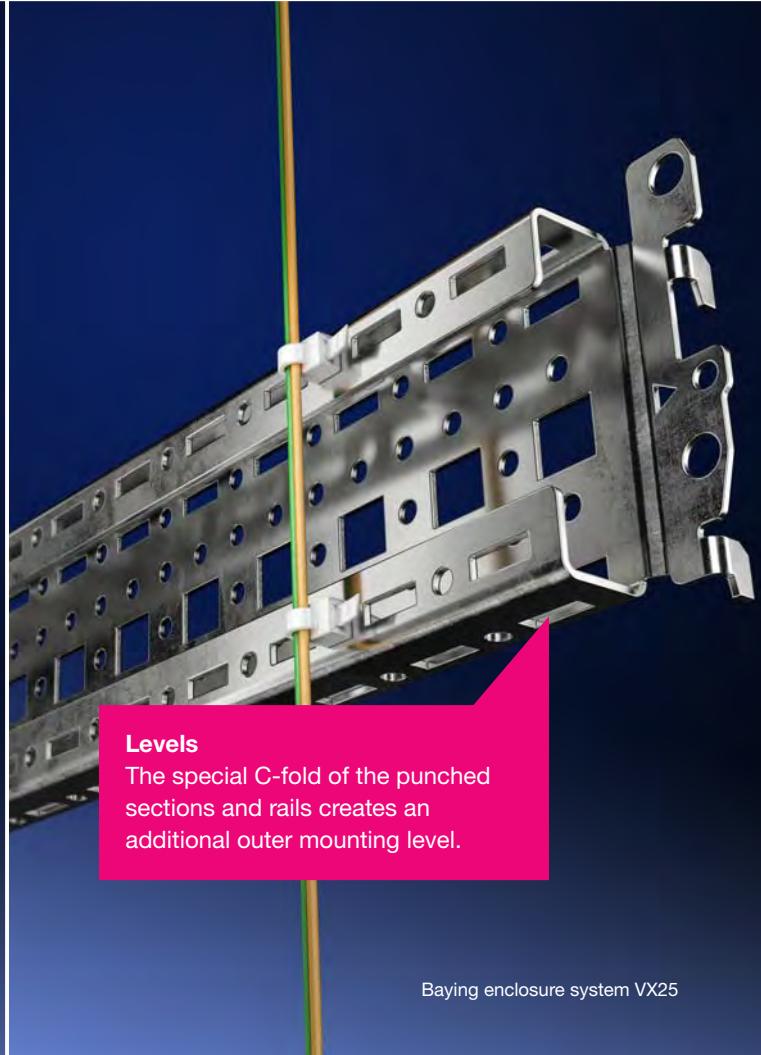

The system offers an outer mounting level in addition to the inner mounting level. That means components can be mounted and the enclosure accessed with ease, even from the outside.

A: Static Structural
Equivalent Stress
Type: Equivalent (von-Mises) Stress
Unit: MPa
Time: 1
07.03.2018 14:25

Stability

Thanks to its ingenious geometry, the patented special profile ensures excellent stability and torsional rigidity.

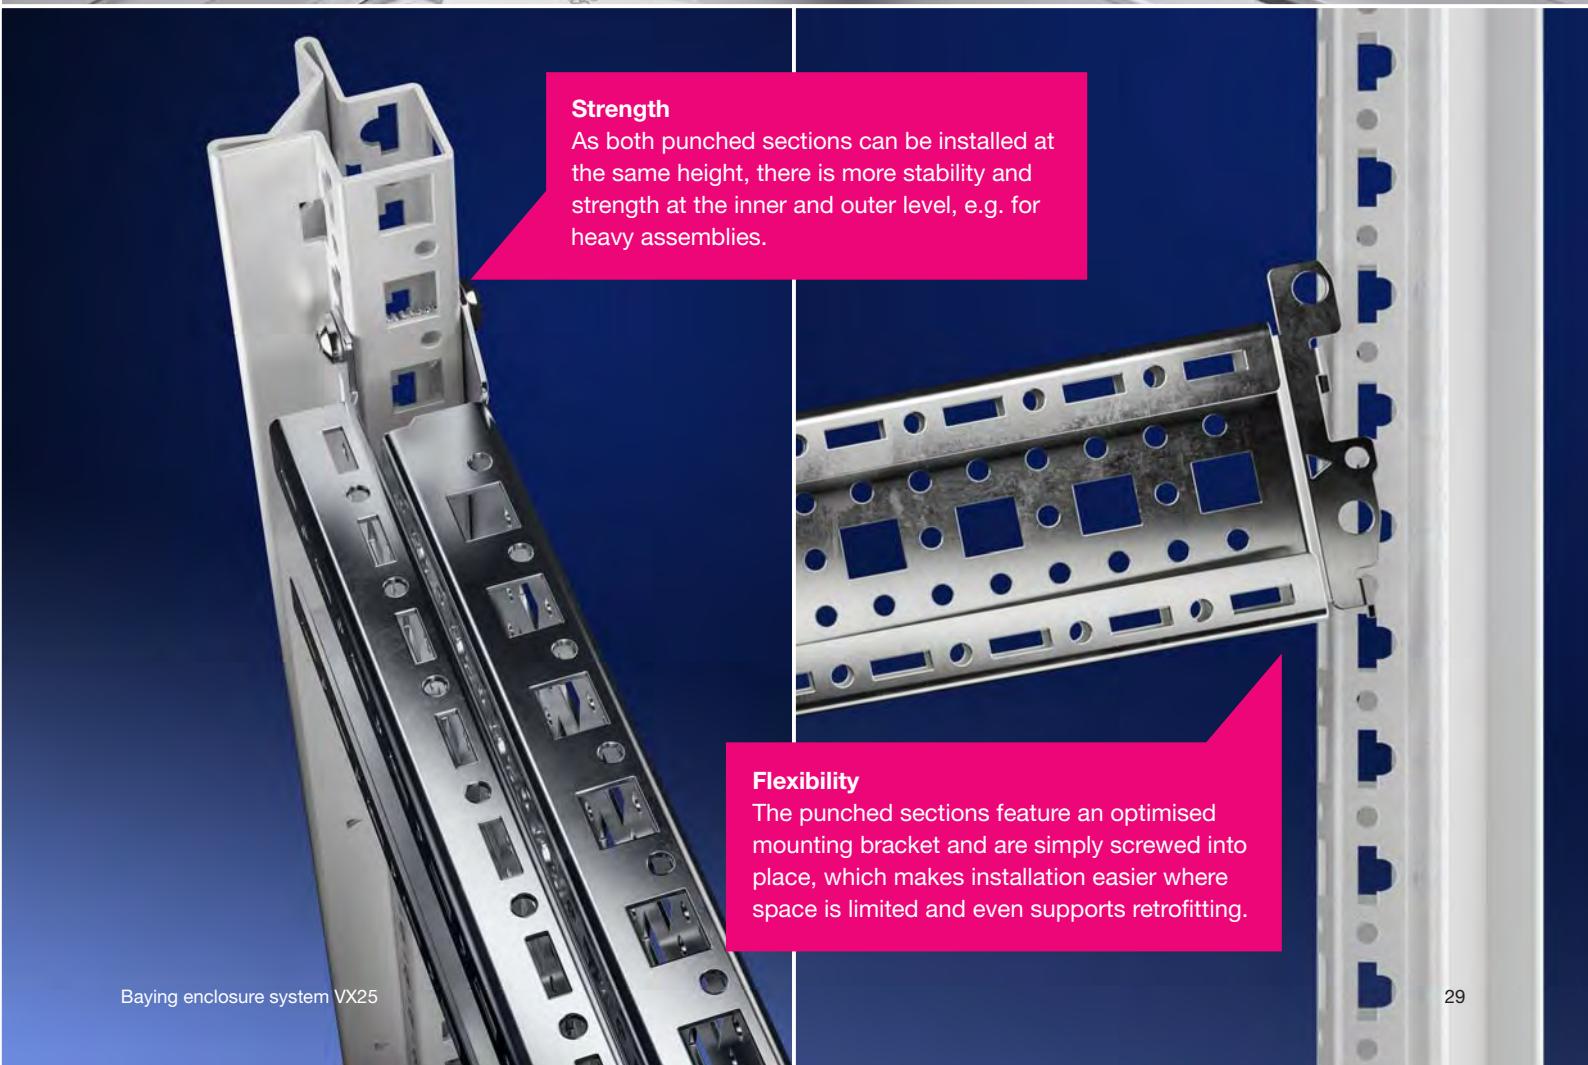

Levels

The special C-fold of the punched sections and rails creates an additional outer mounting level.

Installation options

The continuous pattern of square punching supports the use of M6/M8 cage nuts and thus creates more mounting options at all profile levels.

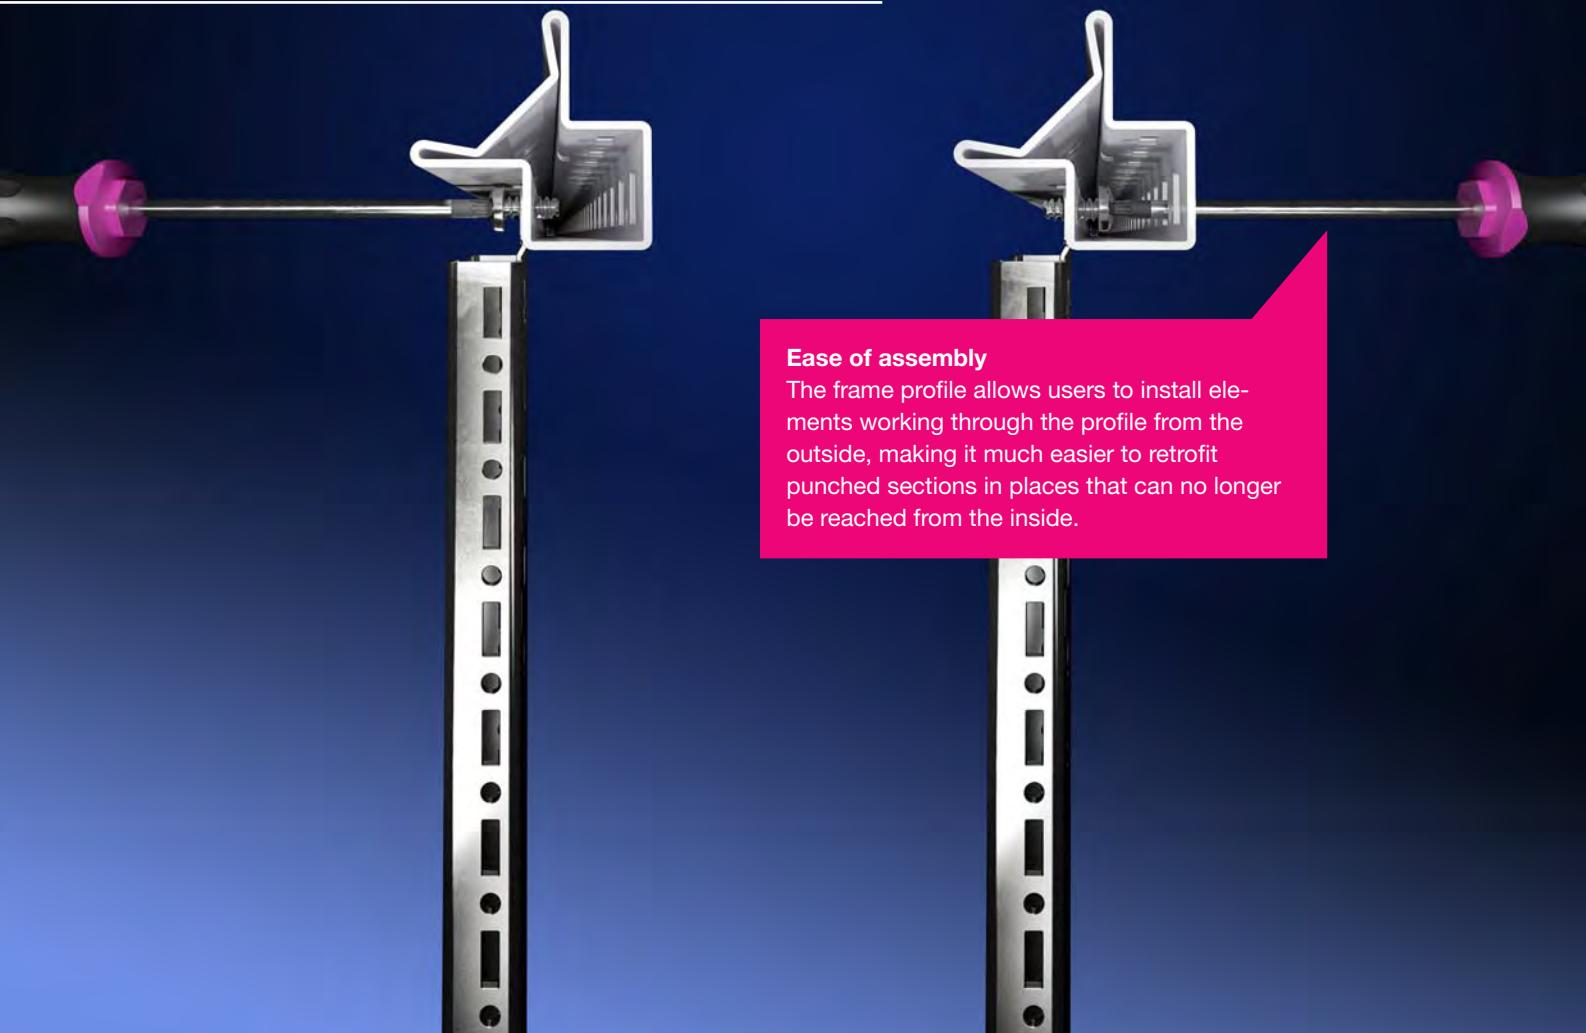

Strength

As both punched sections can be installed at the same height, there is more stability and strength at the inner and outer level, e.g. for heavy assemblies.

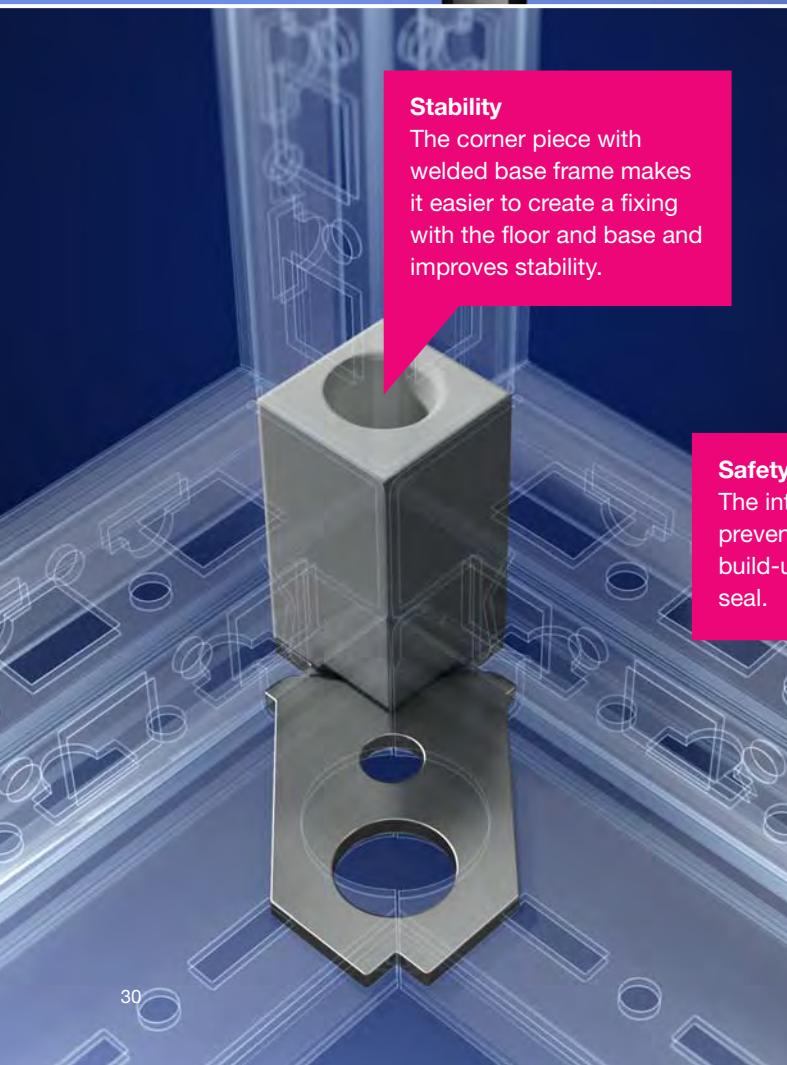

Flexibility

The punched sections feature an optimised mounting bracket and are simply screwed into place, which makes installation easier where space is limited and even supports retrofitting.

Ease of assembly

The frame profile allows users to install elements working through the profile from the outside, making it much easier to retrofit punched sections in places that can no longer be reached from the inside.

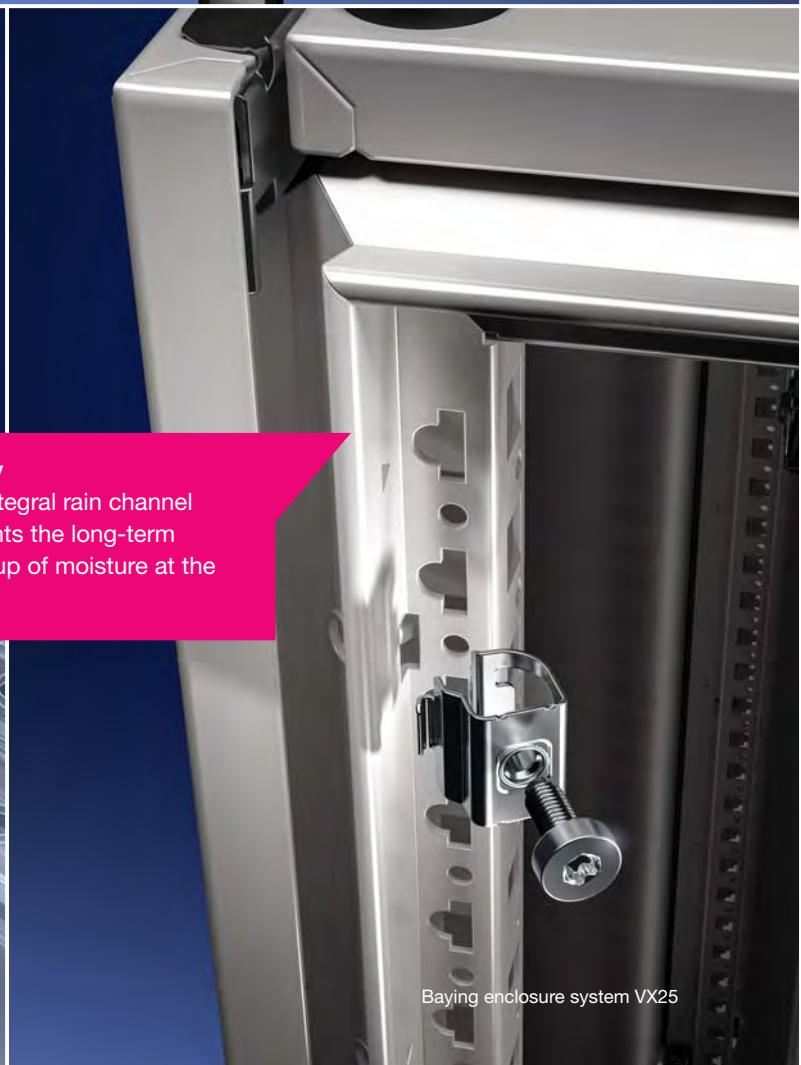

Stability

The corner piece with welded base frame makes it easier to create a fixing with the floor and base and improves stability.

Safety

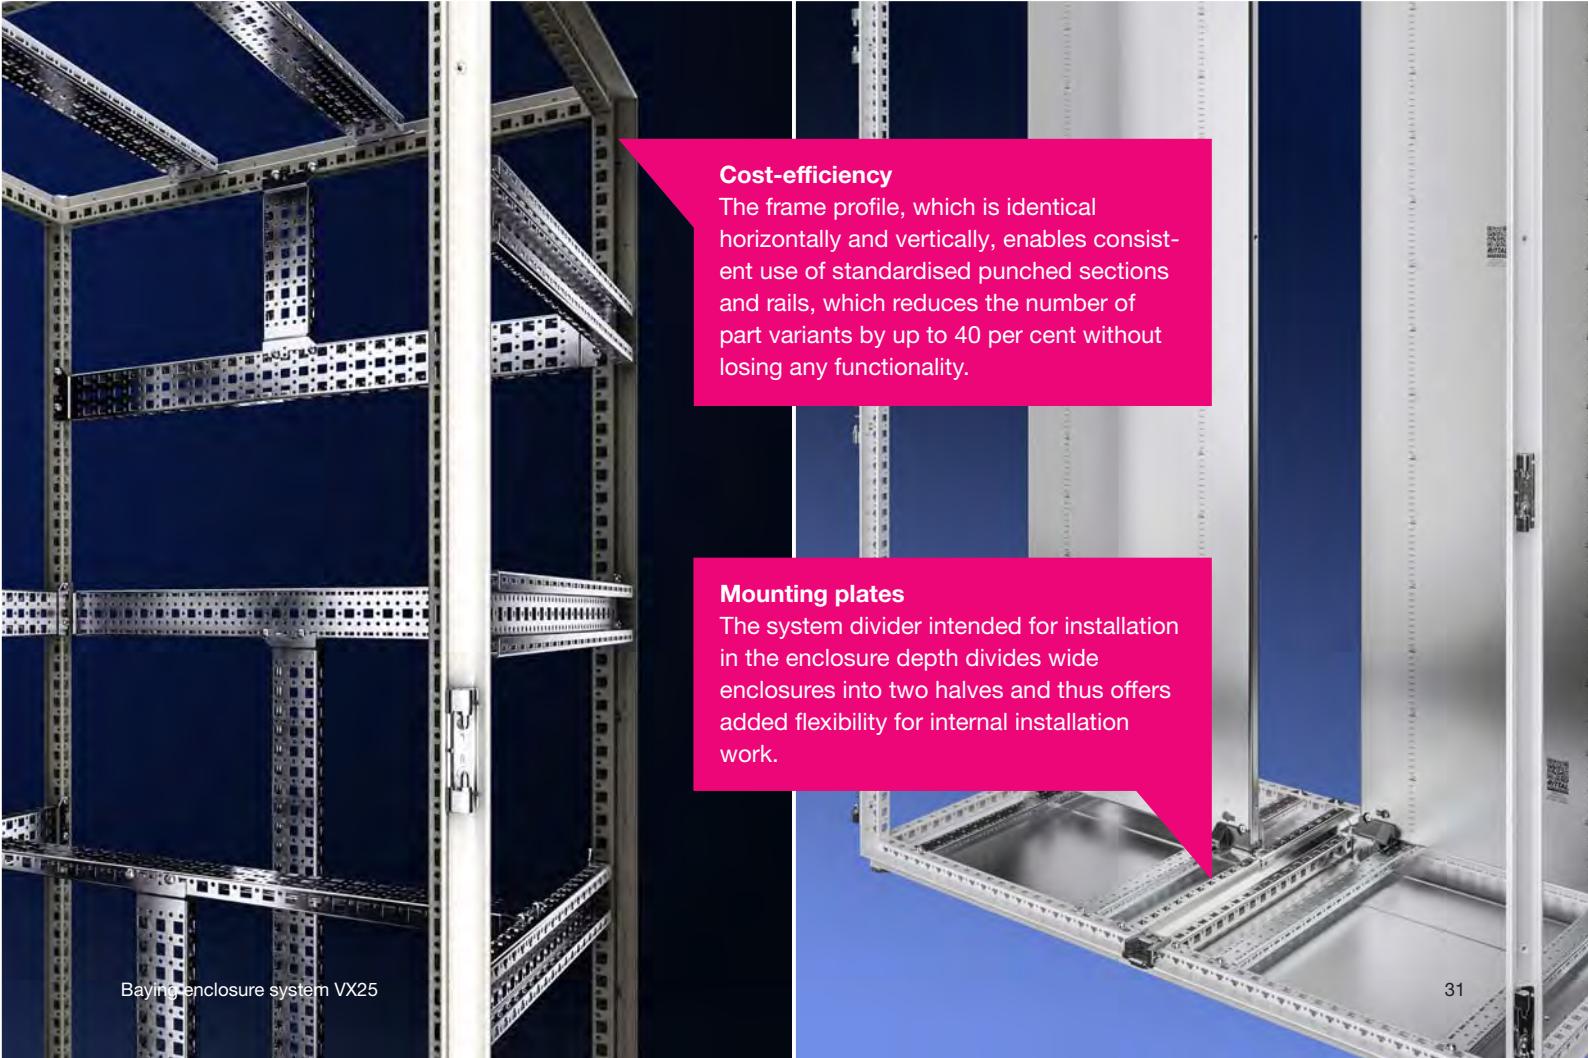

The integral rain channel prevents the long-term build-up of moisture at the seal.

Mounting options

Using the standard punched section, including to support the roof and side panels, simplifies engineering and assembly, and relieves pressure on the parts warehouse.

Cost-efficiency

The frame profile, which is identical horizontally and vertically, enables consistent use of standardised punched sections and rails, which reduces the number of part variants by up to 40 per cent without losing any functionality.

Mounting plates

The system divider intended for installation in the enclosure depth divides wide enclosures into two halves and thus offers added flexibility for internal installation work.

DOORS AND WALLS – MORE **TIME**

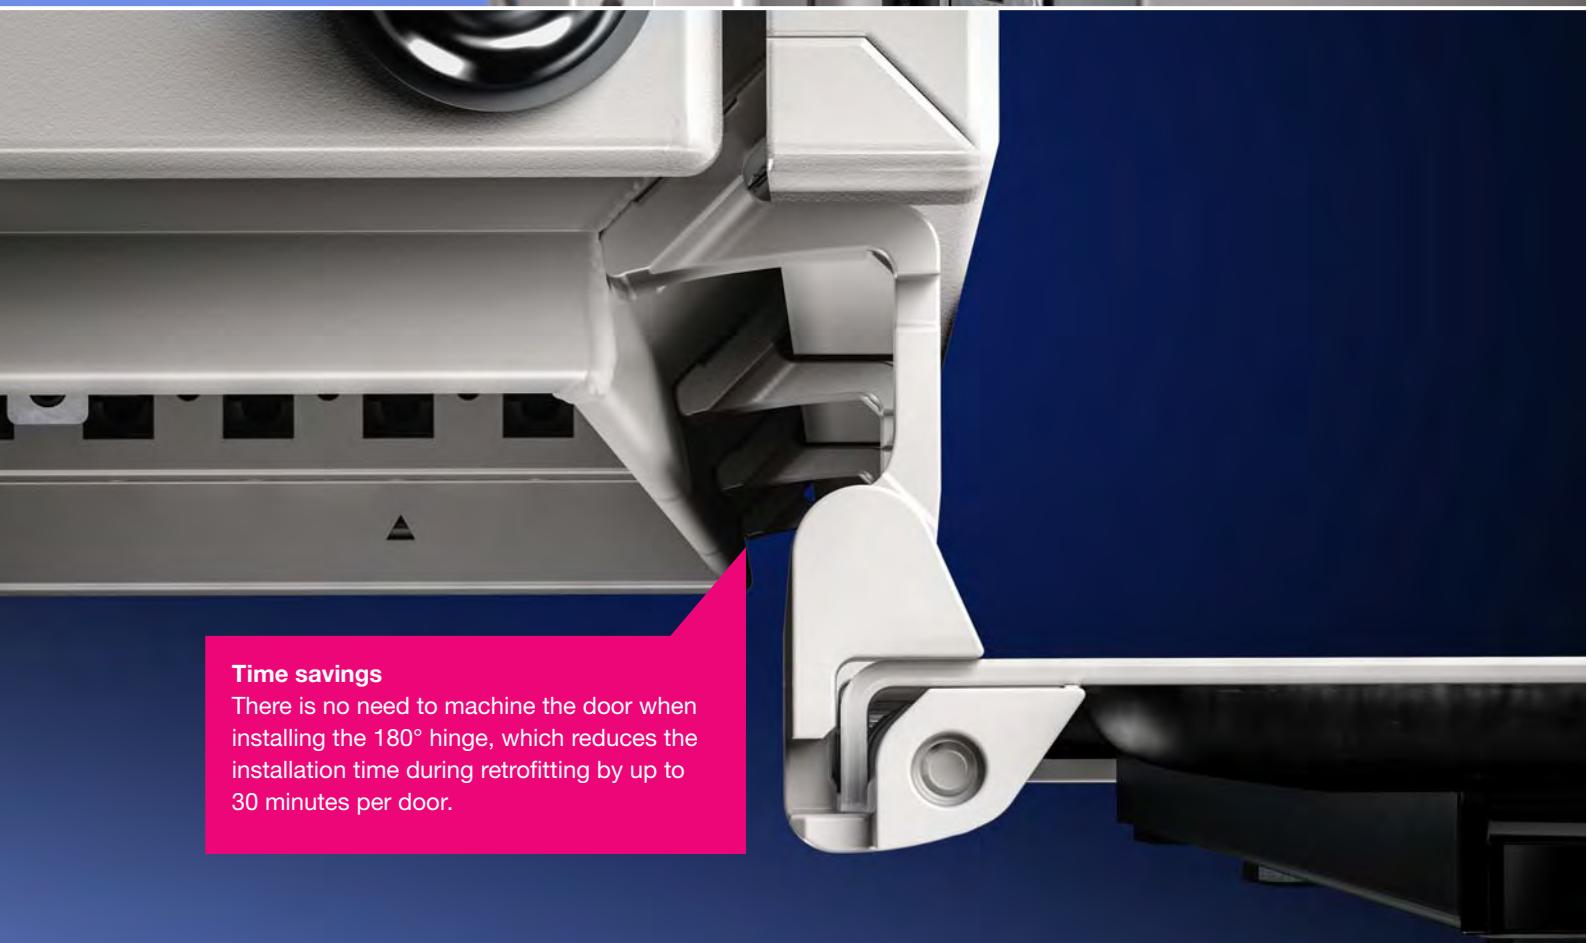

More flexibility, easier installation and better cost-efficiency thanks to ingenious hinge technology, fast-action interchangeable and installable closure technology and saving on machining processes.

Simplification of work

Thanks to the new hinge, doors can be installed and removed incredibly easily and without needing any tools, thus eliminating the need to separately lock and unlock hinge bolts.

Time savings

There is no need to machine the door when installing the 180° hinge, which reduces the installation time during retrofitting by up to 30 minutes per door.

Time savings

The simple, tool-free exchangeability of lock systems such as the comfort handle reduces the necessary installation time by up to 50 per cent.

Simplification of work

In the case of one-person assembly, the positioning aid for side and rear panels provides a user-friendly and ideally suited preliminary fixing so that the panels can then be screwed into place using both hands.

Safety

The adjacent door latch mechanism is operated from outside for extra convenience and safety because users don't have to reach inside the enclosure.

Ease of assembly

The innovative clip mechanism of the panel holders speeds up the installation of side panels.

Access

The panel holders can also be easily retrofitted and are clipped into place from the outside without having to first remove previously installed rear panels.

Expansion options

Thanks to its ingenious geometry, the special profile ensures excellent stability, torsional rigidity and flexibility for door installations.

Processability

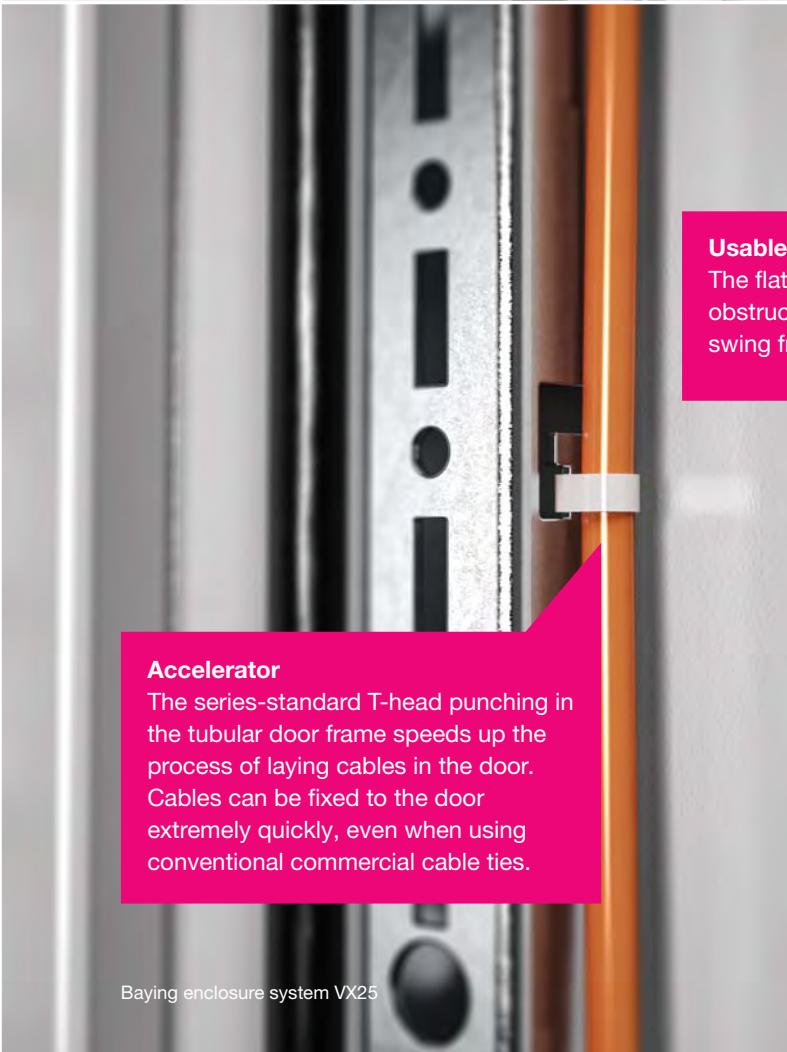

The QR code on all the panels that are to be machined simplifies their fully automatic incorporation into the production workflow and enables seamless, digital monitoring from goods receipt through to completion.

Flexibility

The opportunity to change the opening direction of main and adjacent doors on double-door enclosures according to needs, creates added flexibility when installing cooling units in enclosure doors and prevents collisions between equipment and doors.

Accelerator

The series-standard T-head punching in the tubular door frame speeds up the process of laying cables in the door. Cables can be fixed to the door extremely quickly, even when using conventional commercial cable ties.

Usable height

The flat centre seal does not obstruct the movement of the swing frame or other components.

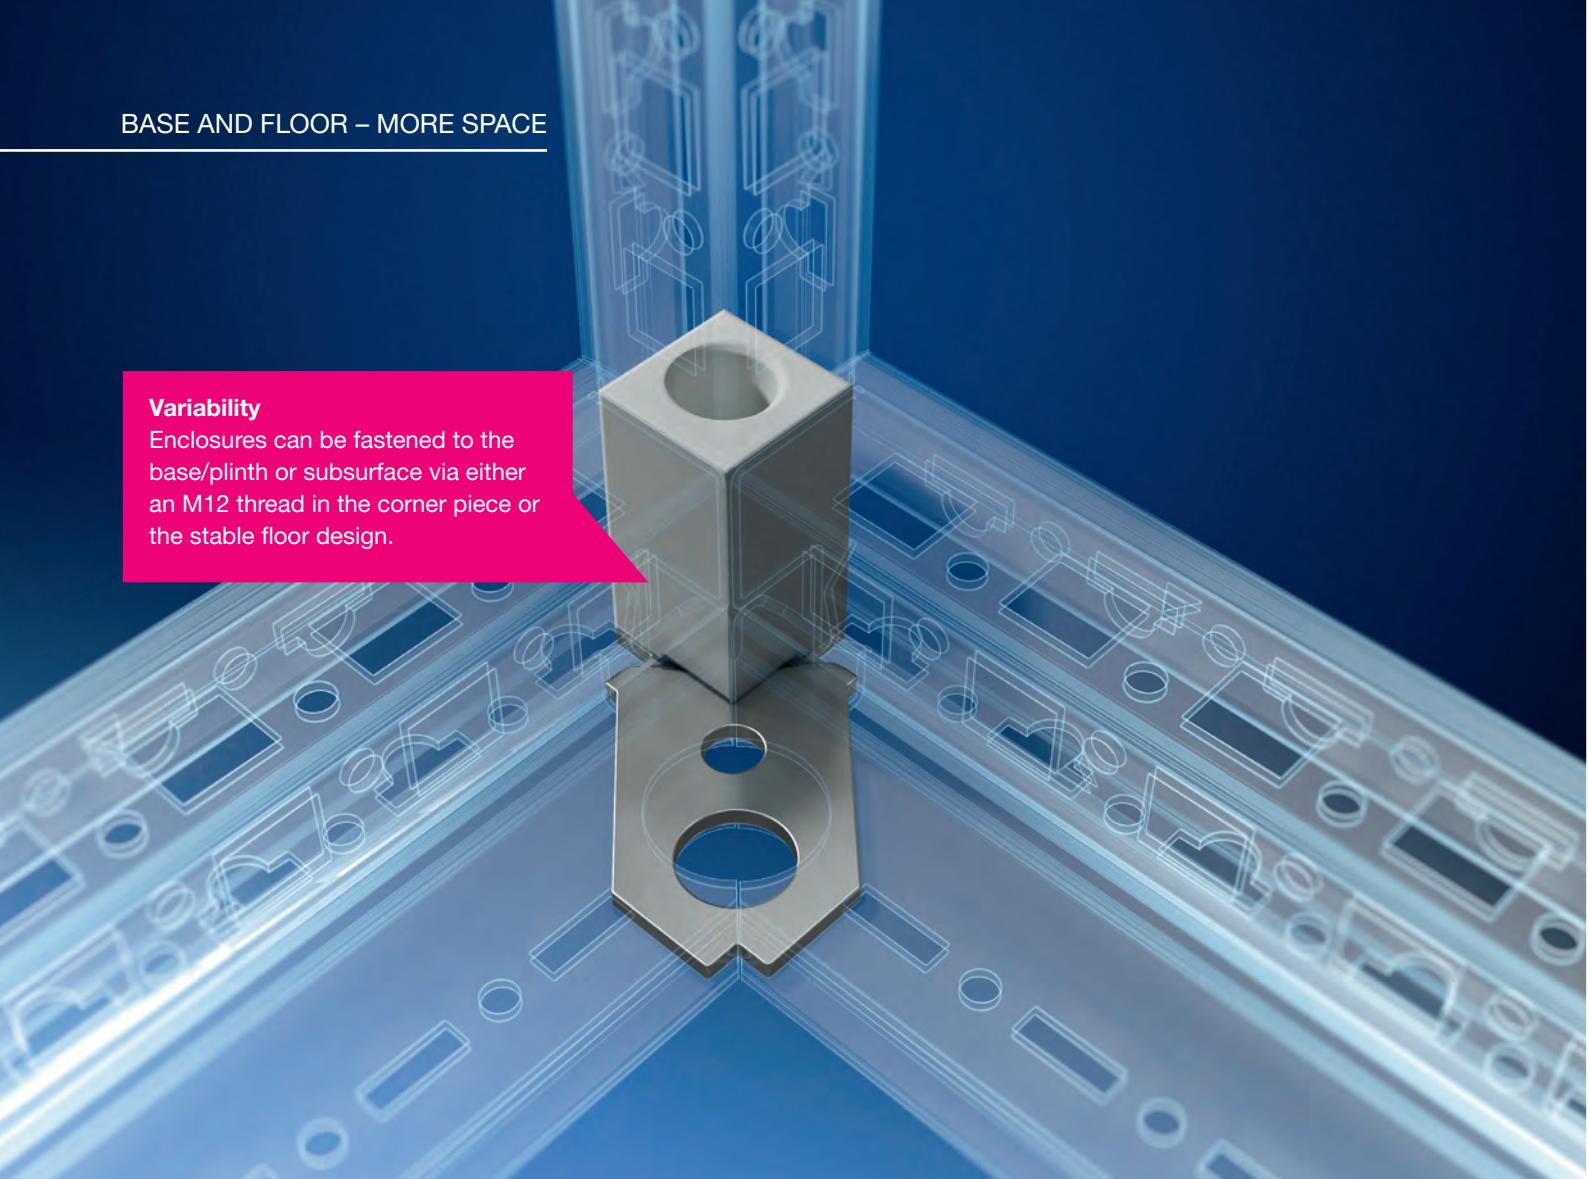

BASE AND FLOOR – MORE **SPACE**

Make better use of space, simplify work and save time thanks to the outstanding compatibility of the enclosure and base – even when baying enclosures and fitting accessories.

Variability

Enclosures can be fastened to the base/plinth or subsurface via either an M12 thread in the corner piece or the stable floor design.

Ease of use

A direct screw connection between the base/plinth components and the enclosure automatically creates potential equalisation without having to incorporate any earth straps.

Precision

The centring aid for base/plinth mounting on the enclosure frame ensures the enclosure is positioned precisely on the base/plinth and also safeguards the IP protection category and frame protection when used without a base/plinth.

Time savings

The simple screw fixing of the gland plates is quick to implement and also automatically creates potential equalisation in one single step.

Transparency

The identifying dimensions stamped on the gland plates make it easier to match the gland plates to the right enclosure.

Space for cables

The large opening in the stable base frame makes it much easier to lay cables.

Cable care

Thanks to rounded edges, cables routed under the enclosure are not at risk of being damaged.

Rigidity

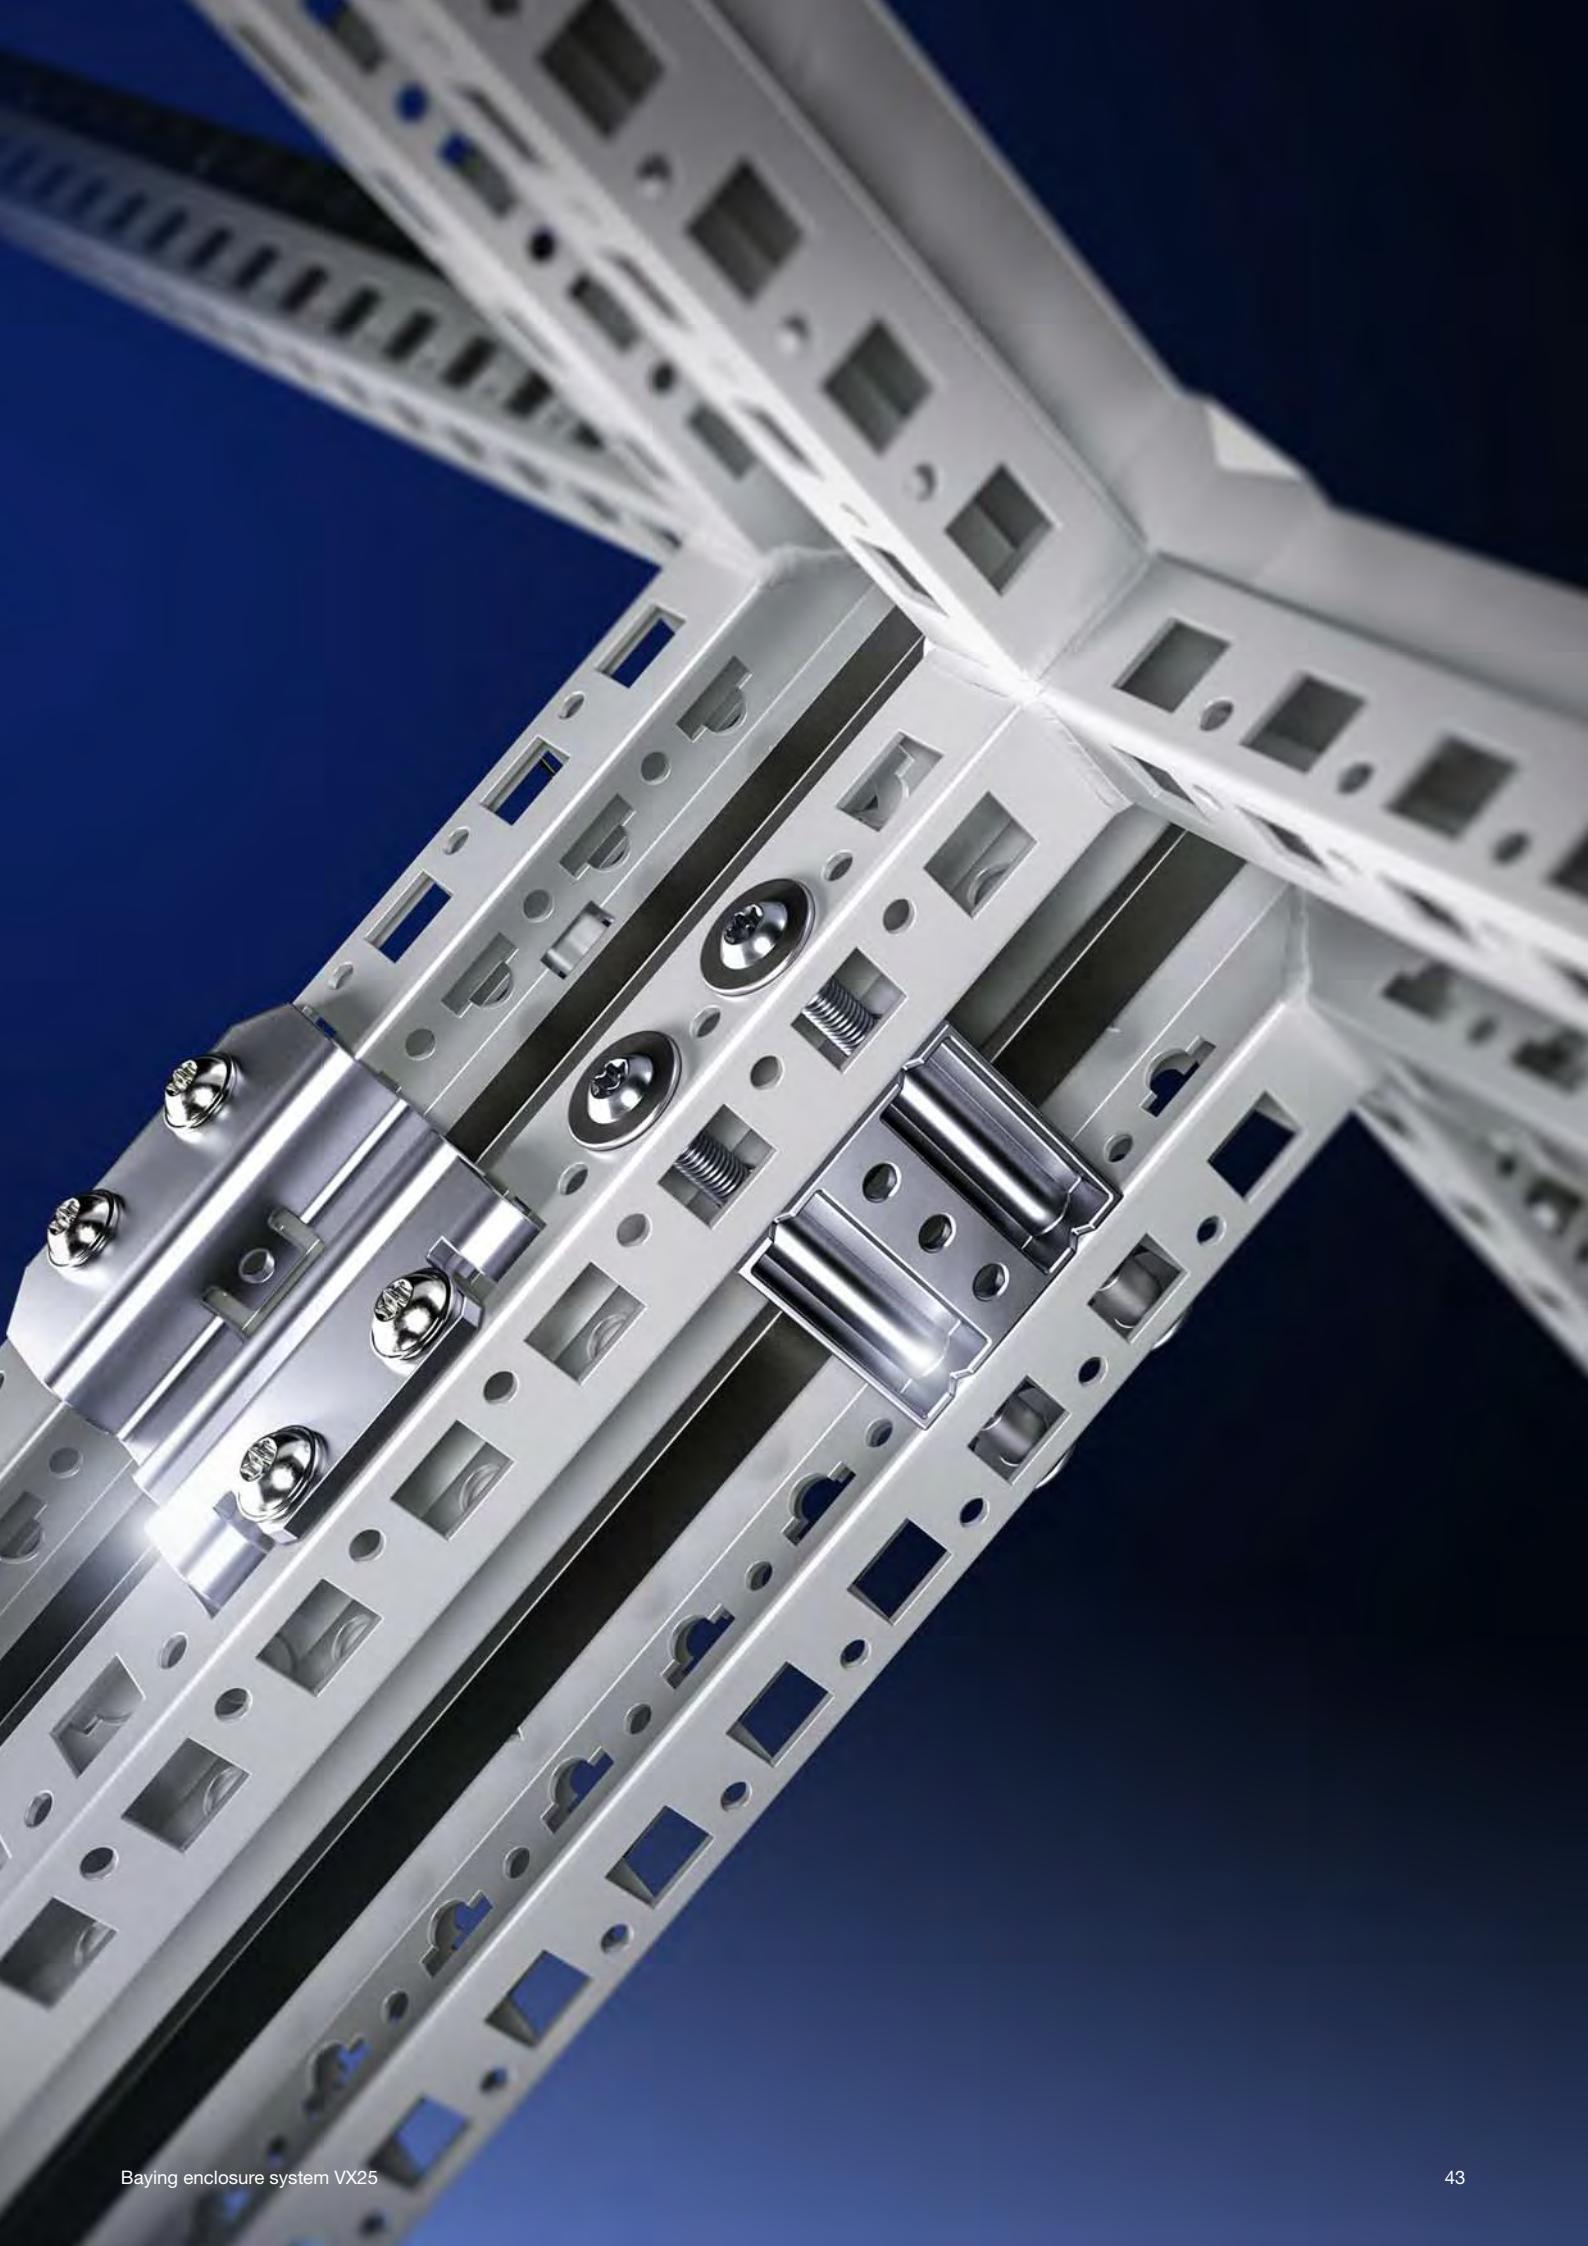

The double edge fold on the gland plates prevents deformation even under heavy loads and thus ensures compliance with the high protection category.

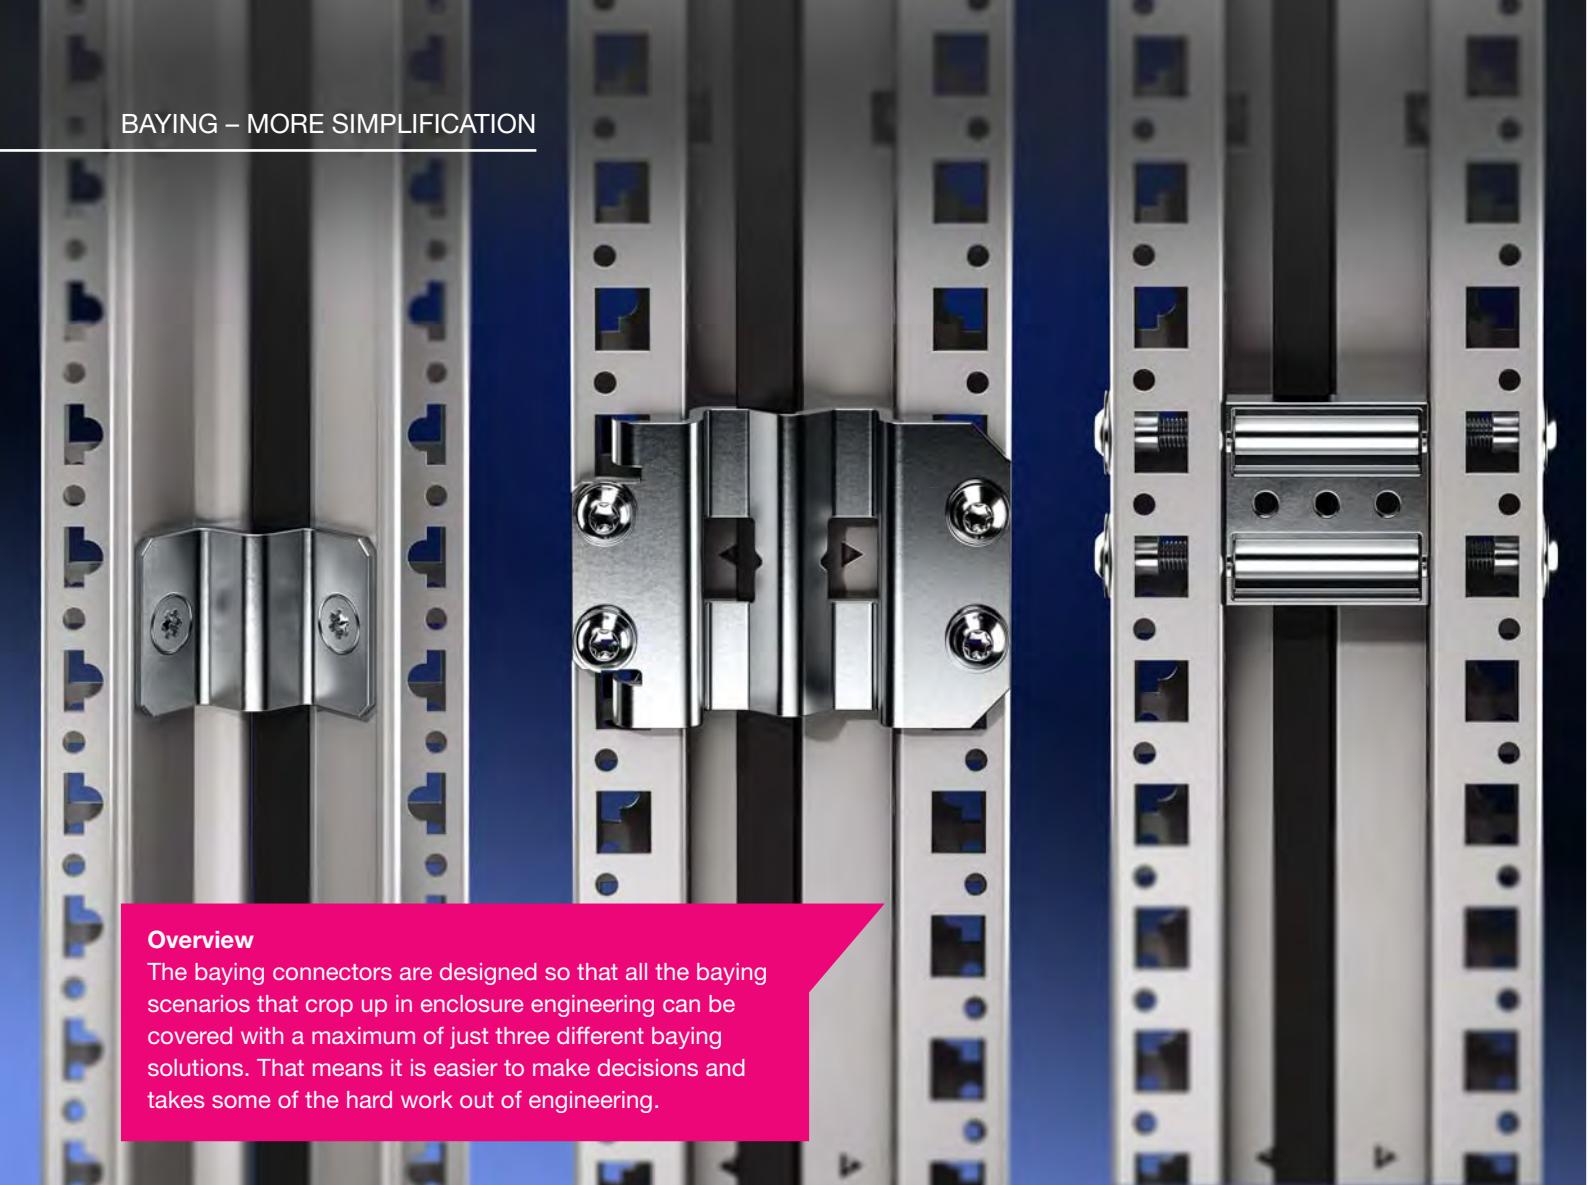

BAYING – MORE **SIMPLIFICATION**

Drive down complexity with simplified, more consistent baying technology for all applications.

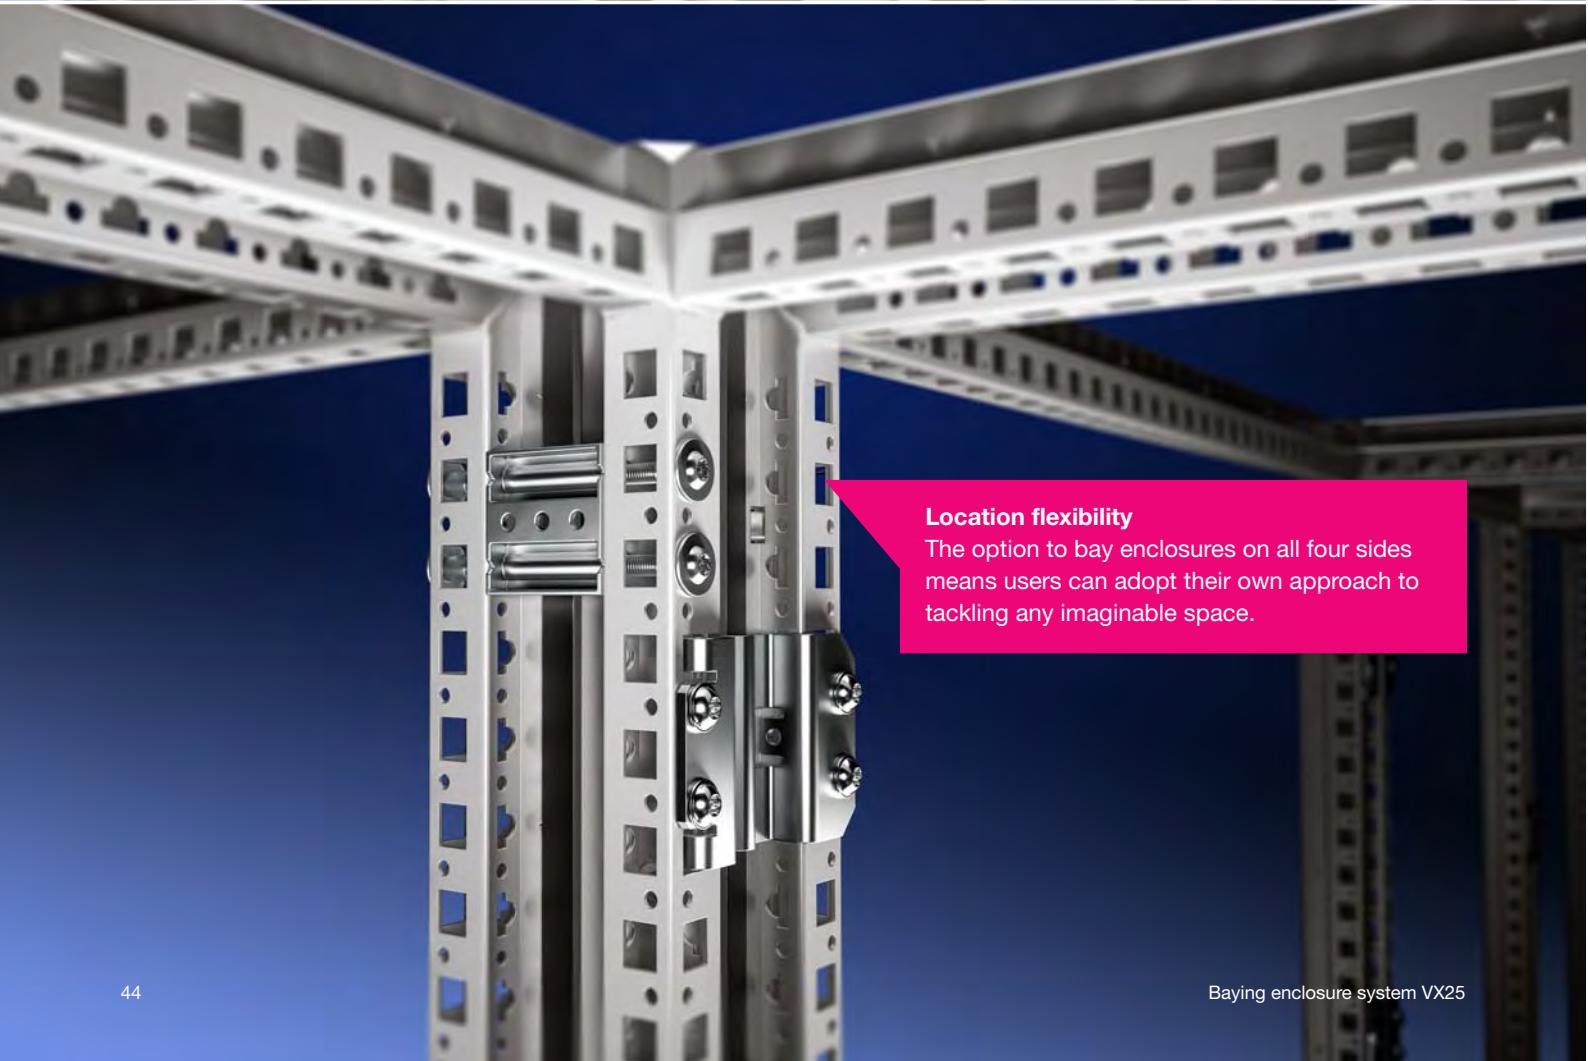

Overview

The baying connectors are designed so that all the baying scenarios that crop up in enclosure engineering can be covered with a maximum of just three different baying solutions. That means it is easier to make decisions and takes some of the hard work out of engineering.

Location flexibility

The option to bay enclosures on all four sides means users can adopt their own approach to tackling any imaginable space.

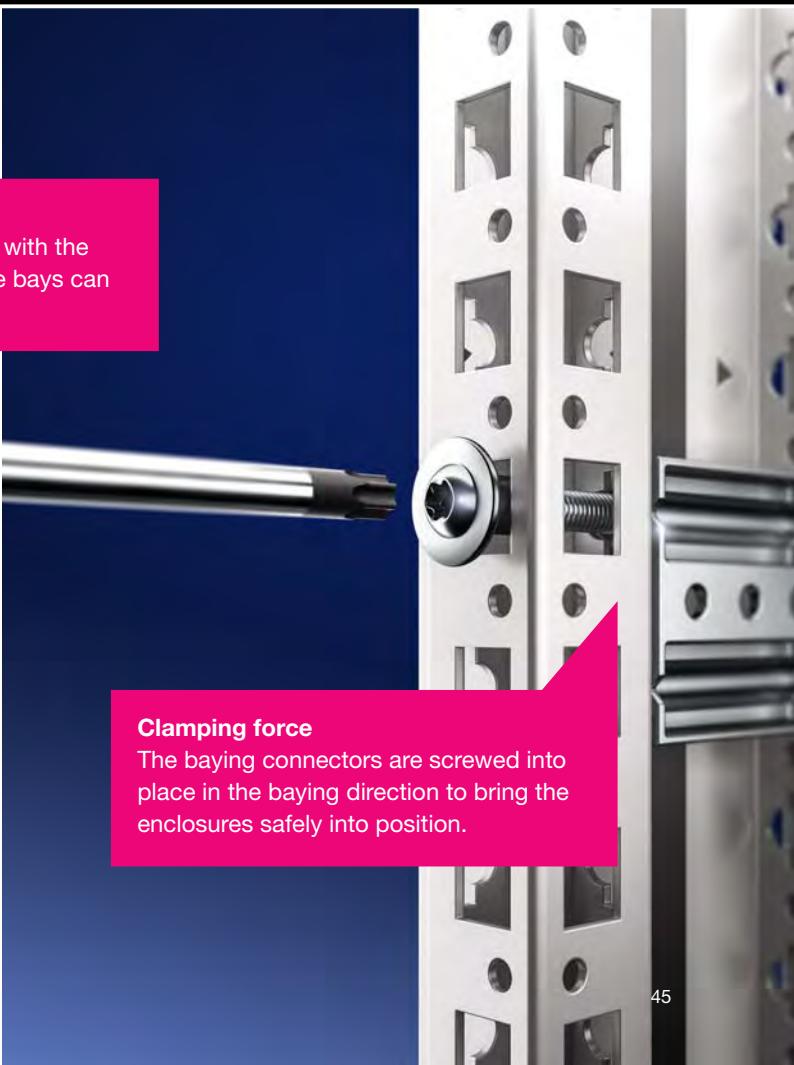

Sealing efficiency

Fitted in a blink of an eye, the seal can be positioned precisely where needed and can be removed again at any time.

Compatibility

Thanks to baying compatibility with the TS 8 system, existing enclosure bays can be easily extended.

Clamping force

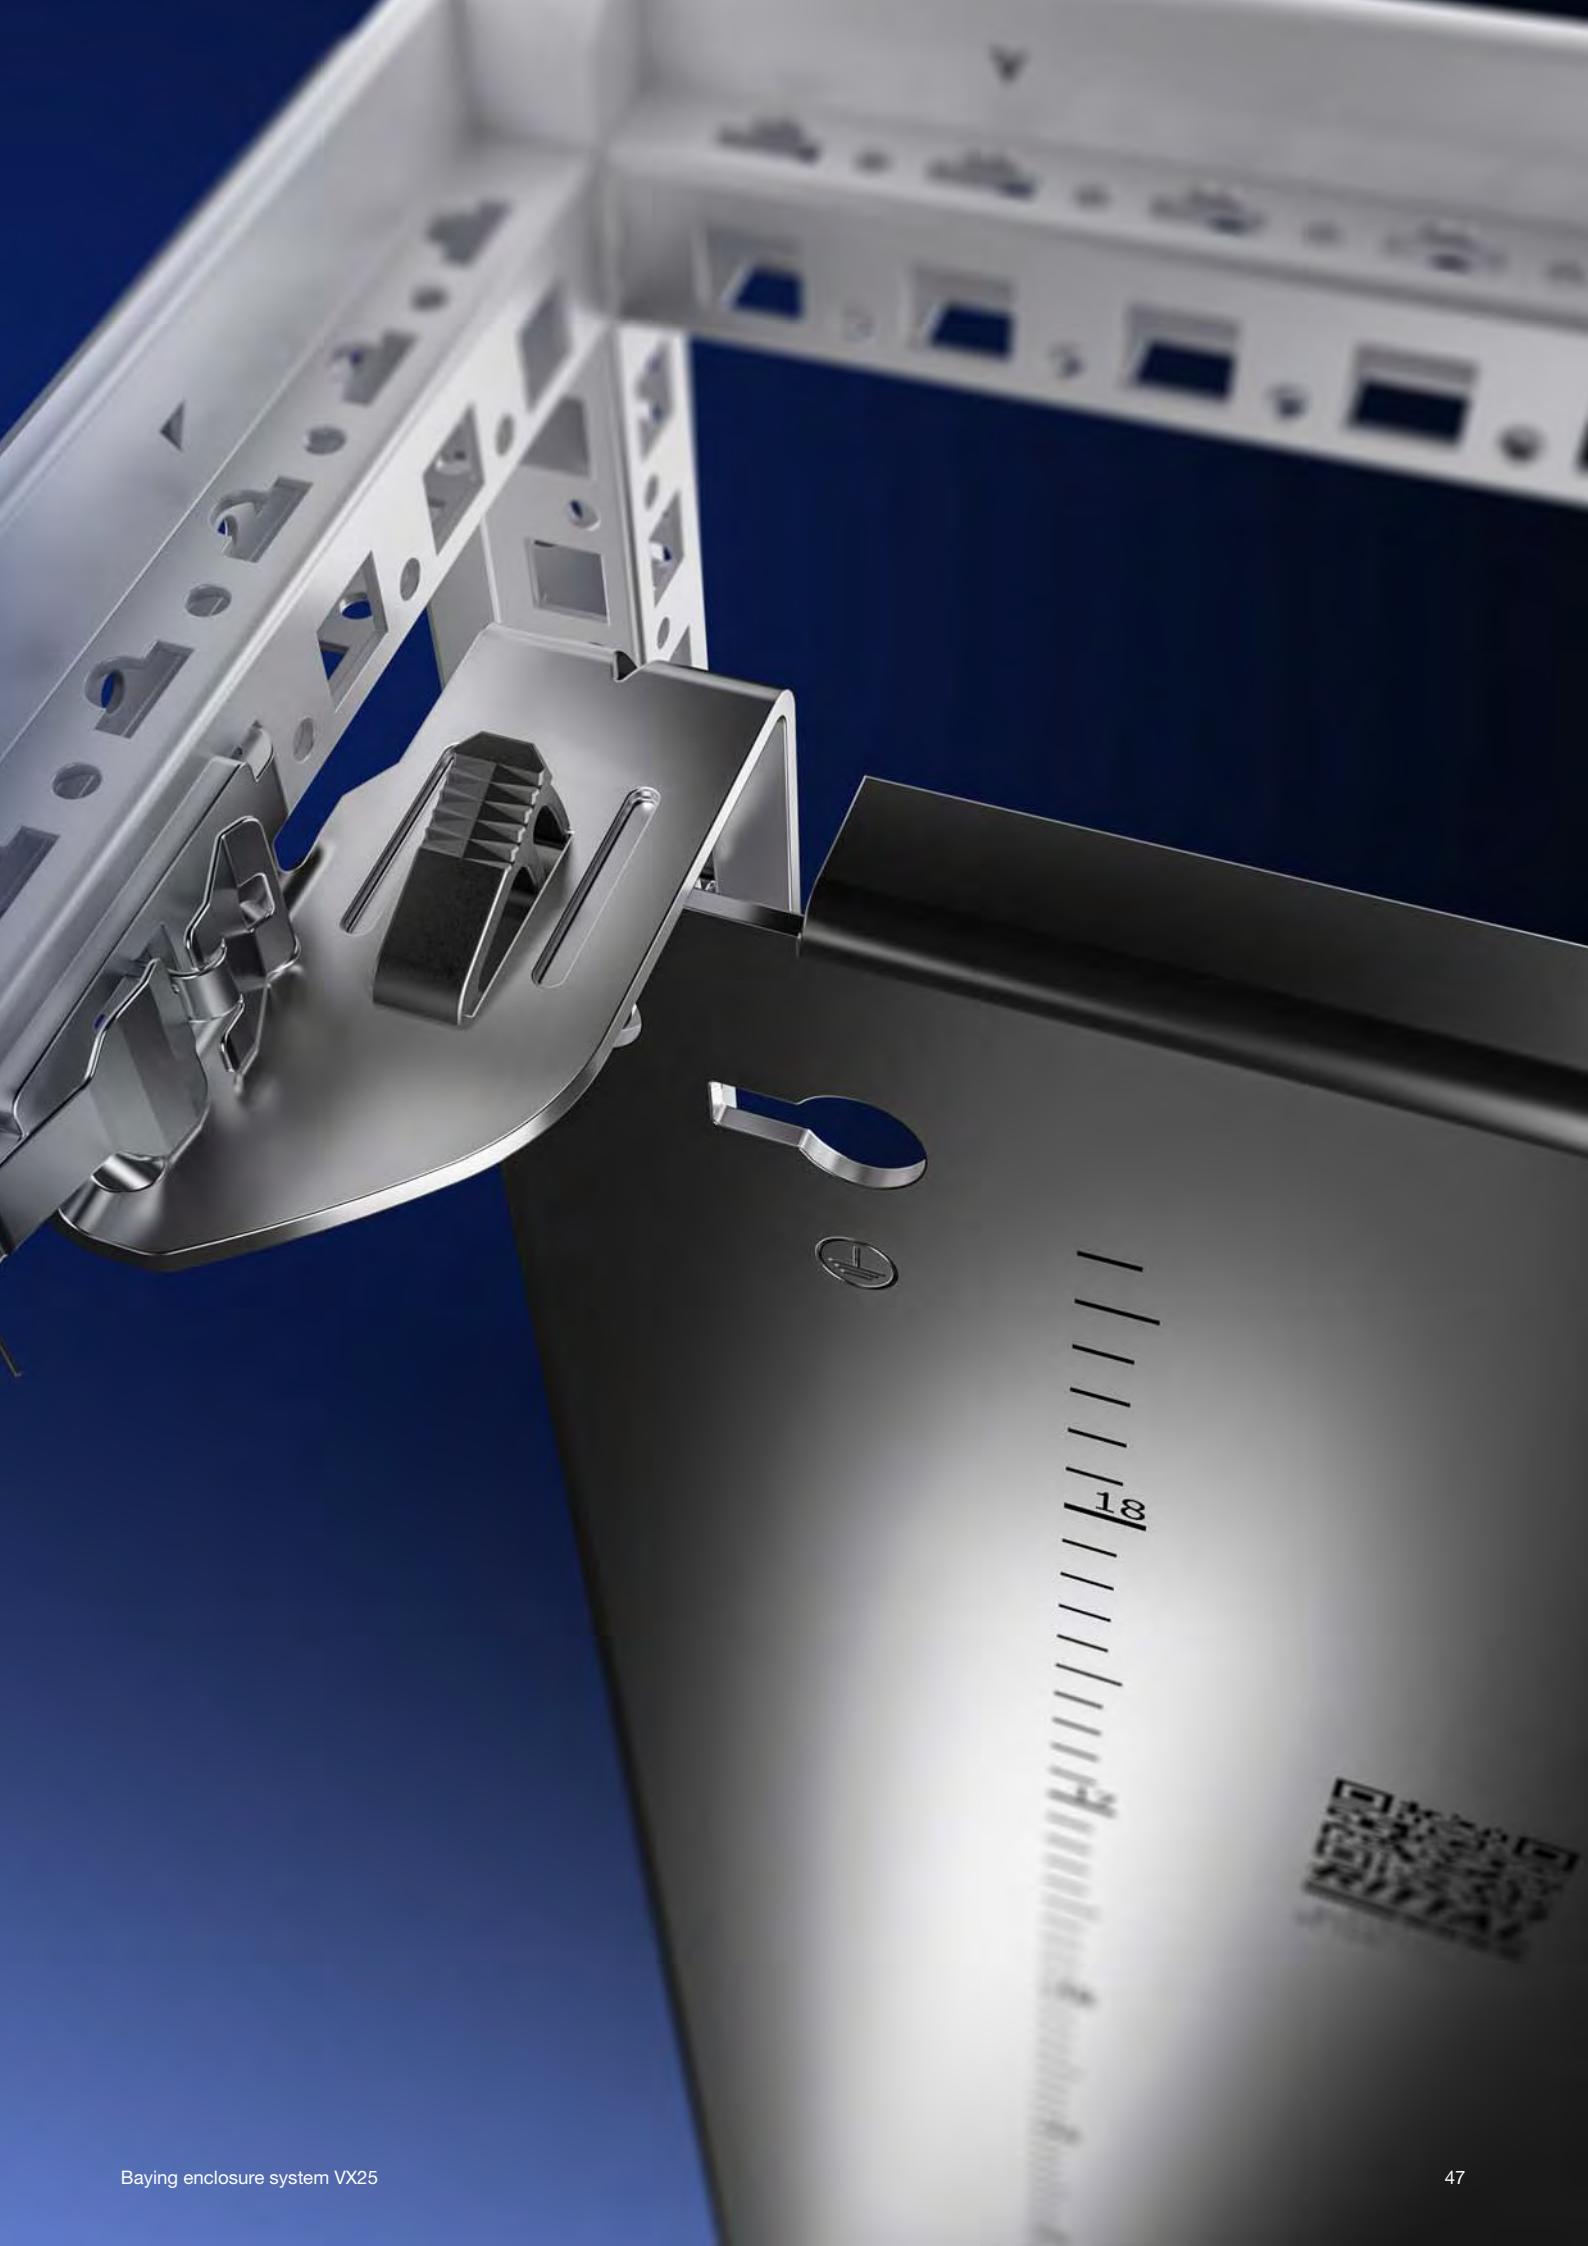

The baying connectors are screwed into place in the baying direction to bring the enclosures safely into position.

MOUNTING PLATE – MORE EASE OF ASSEMBLY

More time savings, installation options and ease of assembly thanks to improved installation kits, including for dynamic loads.

MOUNTING PLATE – MORE EASE OF ASSEMBLY

Additional benefits

The practical mounting plate slide rail can be removed once the mounting plate has been inserted and reused at another position in the enclosure as a fully-fledged punched section.

Digitisation

The QR code on all the panels that are to be machined simplifies their fully automatic incorporation into the production workflow and enables seamless, digital monitoring from goods receipt through to completion.

Process efficiency

Thanks to its integrated clip, the mounting plate slide block can be easily removed and reinstalled without the need for tools, thus making work around the fully automatic machining process easier.

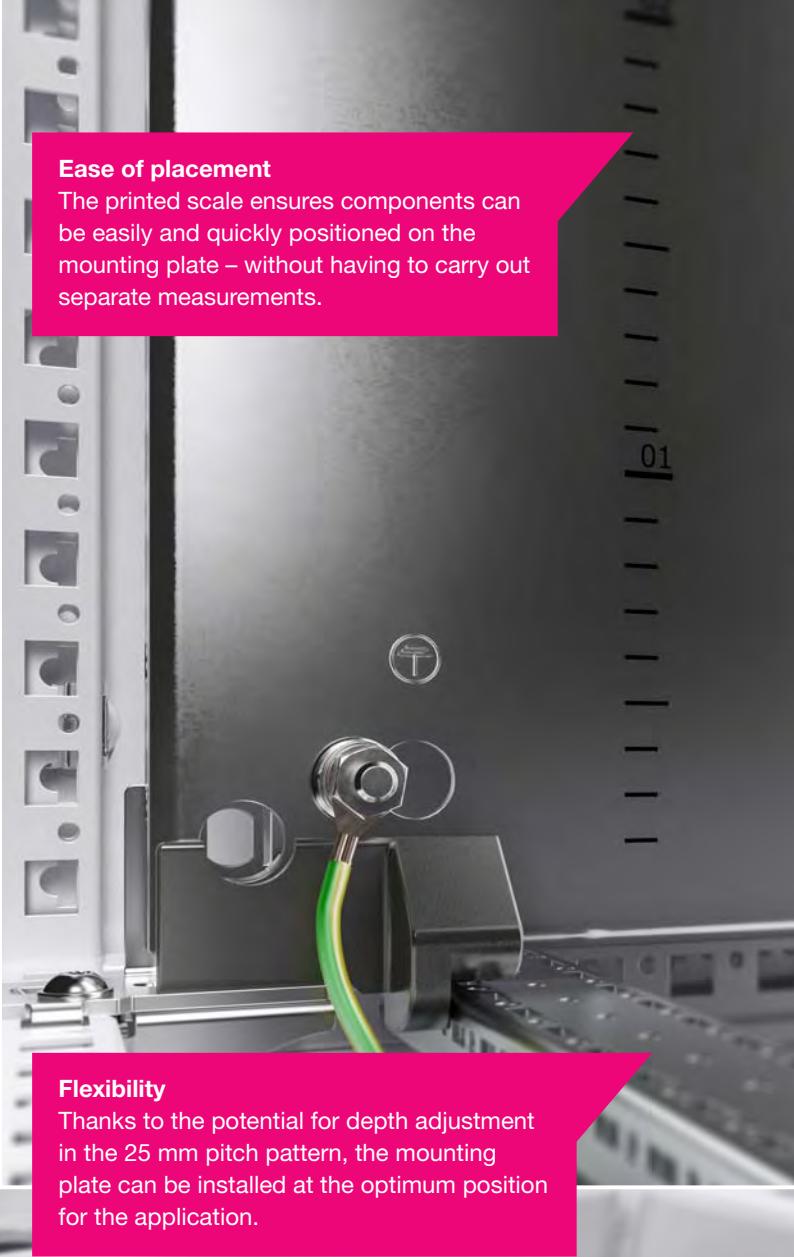

More space

The option of using a special installation kit to install the mounting plate 20 mm deeper into the enclosure creates additional space in the depth of the enclosure.

Ease of placement

The printed scale ensures components can be easily and quickly positioned on the mounting plate – without having to carry out separate measurements.

Flexibility

Thanks to the potential for depth adjustment in the 25 mm pitch pattern, the mounting plate can be installed at the optimum position for the application.

Convenient fixing

The clip at the top end of the mounting plate holds it in place during one-person assembly until the plate can be screwed into position.

²⁾ Without door

Baying enclosure system VX25

System accessories Page 78 **VX25, stainless steel** Page 71

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Rear panel: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Gland plates: Sheet steel, 1.5 mm, zinc-plated
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP 55

NEMA protection category:

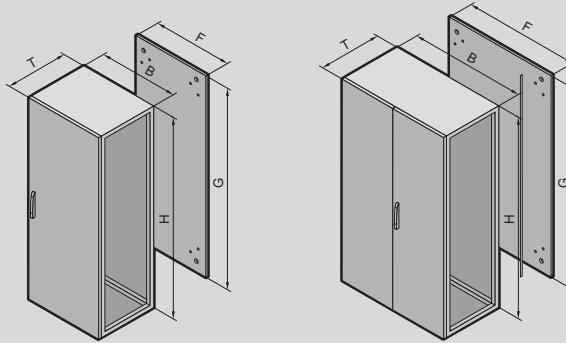

- NEMA 12

Supply includes:

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof plate
- Rear panel
- Gland plates
- Mounting plate
- 2 punched rails 18 x 39 mm
- Lock: 3 mm double-bit

Approvals:

- UL
- cUL
- Further approvals can be found on the Internet

Baying enclosure system VX25

System accessories Page 78 **482.6 mm (19") installation accessories** Page 192

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Roof: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Front frame: Extruded aluminium section, powder-coated
- Rear door: Sheet steel, 2 mm, dipcoat-primed, powder-coated on the outside, textured paint

- Gland plates: Sheet steel, 1.5 mm, zinc-plated
- Adaptor sections, 482.6 mm (19"): Sheet steel, zinc-plated

Colour:

- RAL 7035

Supply includes:

- Enclosure frame
- Front frame (r/h hinge, held on the left via mechanical snap fasteners)
- Rear door (r/h hinge, may be swapped to opposite side)
- Roof plate
- Gland plates
- Adaptor sections, 482.6 mm (19"), front

Approvals:

- UL
- cUL

Baying enclosure system VX25

System accessories Page 78 **Installation accessories for modular front design** Page 114

Material and surface finish:

- Enclosure frame: Sheet steel, 1.5 mm, dipcoat-primed
- Rear panel: Sheet steel, 1.5 mm, dipcoat-primed, powder-coated on the outside, textured paint
- Gland plates: Sheet steel, 1.5 mm, zinc-plated

Colour:

- RAL 7035

Basis of test:

- IEC 61 439-1/-2
- IEC 61 641

Protection category IP to IEC 60 529:

- Up to IP 54, depending on the panels

Supply includes:

- Enclosure frame
- Rear panel
- Gland plates

Baying enclosure system VX25, stainless steel

Lock systems Page 120 **VX25, sheet steel** Page 54

Material and surface finish:

- Enclosure frame: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Roof: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Door: Stainless steel 1.4301 (AISI 304), 2 mm, exterior brushed, grain size 400
- Rear panel: Stainless steel 1.4301 (AISI 304), 1.5 mm, exterior brushed, grain size 400
- Gland plates: Stainless steel 1.4301 (AISI 304), 1.5 mm
- Mounting plate: Sheet steel, 3 mm, zinc-plated

Protection category IP to IEC 60 529:

- IP 55

NEMA protection category:

- NEMA 12

Supply includes:

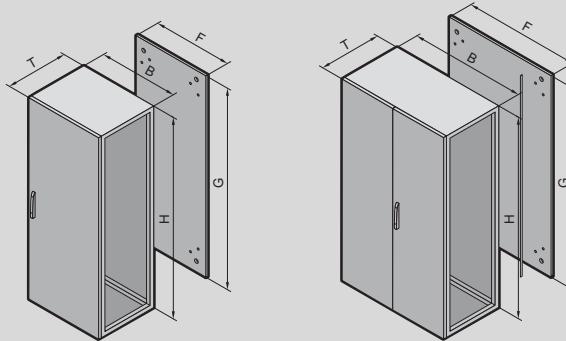

- Enclosure frame
- Door(s) (r/h hinge, may be swapped to opposite side)
- Roof plate
- Gland plates
- Rear panel
- Mounting plate
- Lock: 3 mm double-bit
- 2 punched rails 18 x 39 mm

Note:

- Due to the hardness of the material, we recommend using metal multi-tooth screw 2486.400 for the interior installation.

Approvals:

- UL
- cUL
- Further approvals can be found on the Internet

Note:

- Due to the hardness of the material, we recommend using metal multi-tooth screw 2486.400 for the interior installation.

Approvals:

- UL
- cUL

Ease of use

Intuitive operation via touch display

Time savings

The cooling unit can be easily pulled out from the front for maintenance purposes

VX25 and Blue e+

- Cooling unit with 1.5 kW and Blue e+ technology in the dimensions W x H x D 800 x 2200 x 600 mm – integrated into the VX25 baying enclosure system
- No assembly outlay – the cooling unit, door limit switch and connection cabling are installed ready-to-connect
- State-of-the-art design – not a cooling unit built onto the enclosure

Excellent planning certainty

- The digital twin of the Blue e+ integration solution is available in the EPLAN Data Portal
- Dependable and efficient construction planning with EPLAN Pro Panel
- “Thermal Design Integration” can be used to produce a graphical display of exclusion zones dictated by ventilation requirements, the area with optimum climate control and hot spots

Ready for Industry 4.0

- Intelligent interfaces and software
- Simple incorporation of cooling units into huge range of IoT applications using the Rittal IoT interface (optional)
- New applications and smart services can therefore be achieved

Efficient and flexible

- Excellent energy efficiency thanks to the innovative hybrid technology of the Blue e+ principle
- Suitable for international use due to unique multi-voltage capability
- Longer service life of components due to component-friendly cooling

VX25 BLUE E+ INTEGRATION SOLUTION

The perfect symbiosis of the VX25 baying enclosure system
and Blue e+ cooling unit

Base/plinth system VX

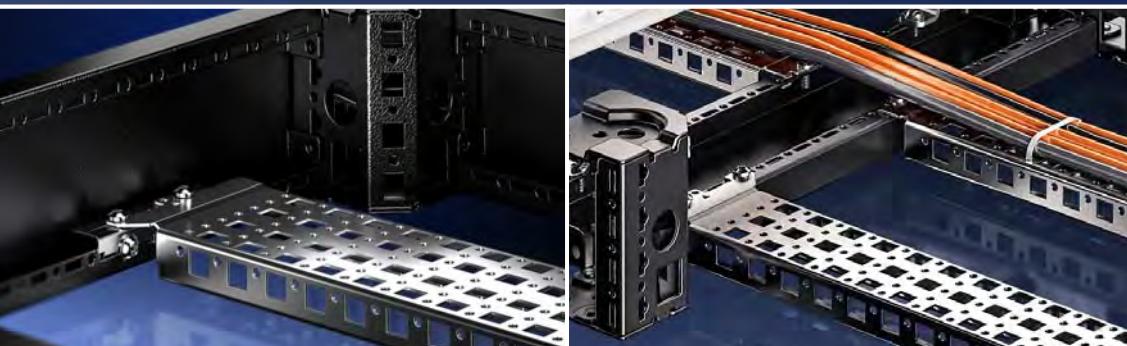

Integral centring aid
The centring aid for base/plinth mounting on the enclosure frame ensures precise positioning of the enclosure on the base/plinth.

Separate trim panels
The clip-in trim panels allow simple, fast access to the base/plinth for individual use, e.g. as a cable chamber.

Enclosure attachment
The nuts integrated into the base/plinth corner piece allow screw-fastening directly from above, through the stable base frame, or from below, into the enclosure corner piece.

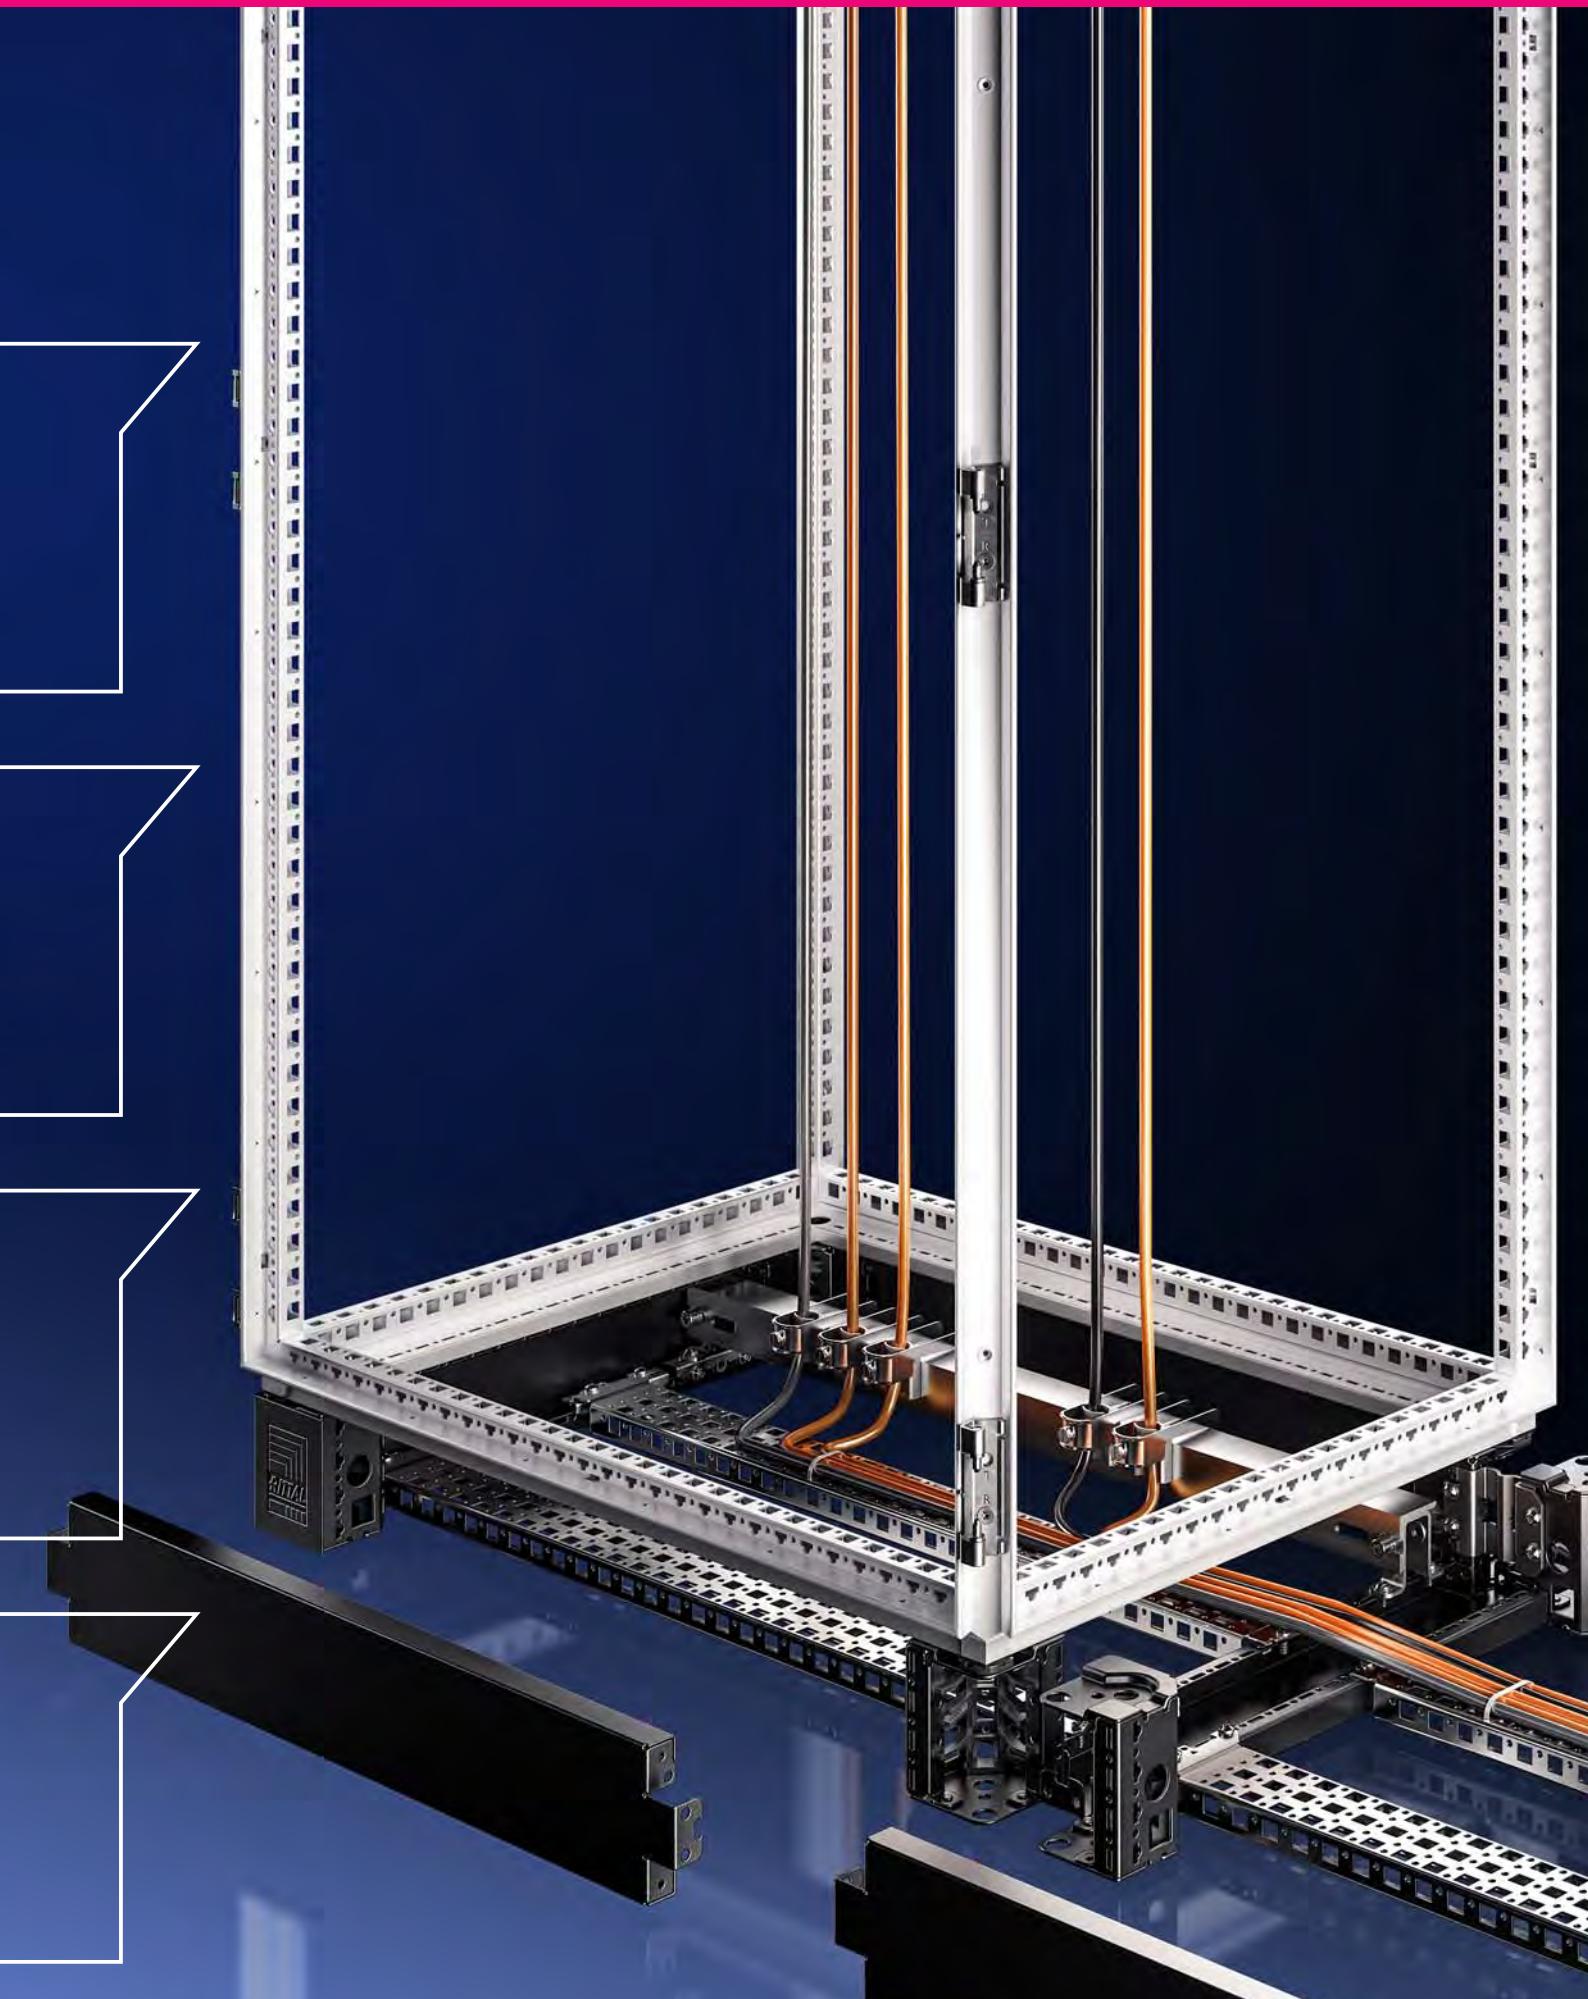

Simple cable management
Secure cable attachment and cable routing via the punched section with mounting flange in the base/plinth.

Additional cable chamber
Gain space with simple integration of the cable clamping rail and C rail for secure, user-friendly cable routing.

Base/plinth system VX

Base/plinth system VX

Base/plinth system VX
All trim panels may optionally be clipped into the corner piece, or securely screw-fastened. Depending on the application, users can dispense with the trim panels between bayed enclosure suites, or a 100 mm high trim panel may be used to stabilise the base/plinth corner pieces.

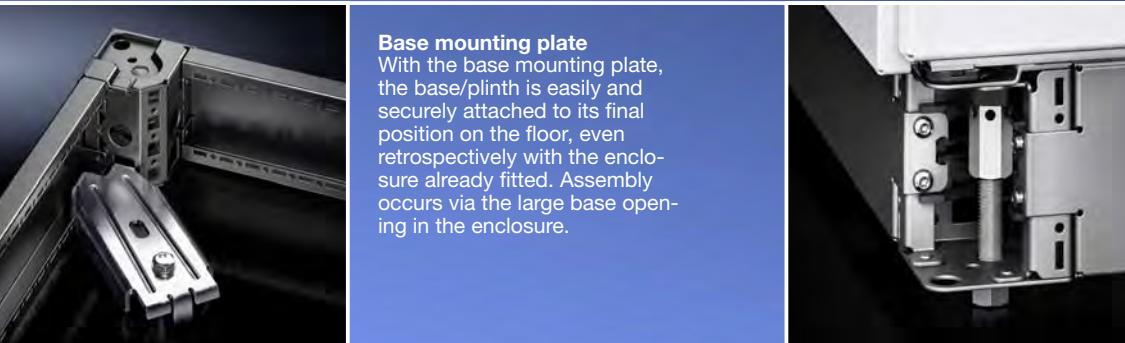

Trim panels
The solid trim panels supplied as standard are easily replaced with vented trim panels or trim panels with brush strips. Two 100 mm high trim panels may also be used in a 200 mm high base/plinth.

Twin castors
The twin castors may be screw-fastened directly to the enclosure corner piece from the outside. Mounting on the VX base/plinth system is also supported via an adaptor.

Transportation
Easily transported by forklift or lifting truck with the front trim panel removed, even with bayed enclosures.

Base mounting plate
With the base mounting plate, the base/plinth is easily and securely attached to its final position on the floor, even retrospectively with the enclosure already fitted. Assembly occurs via the large base opening in the enclosure.

Levelling component
The levelling component may be used for retrospective levelling on uneven floors. Unevenness of up to 15 mm can be compensated in this way.

Base/plinth system VX

Base/plinth

Base/plinth system VX

Modular base/plinth diversity

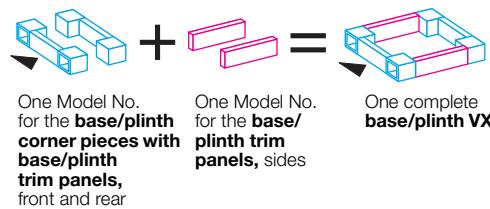

The new, innovative base/plinth system VX offers an unprecedented diversity of functions and applications. It combines all existing base/plinth functions in a single solution, as well as opening up many new applications. As if that weren't enough, it is also backward-compatible with existing enclosure solutions TS, TS IT, SE, PC and IW. In short, it is a base/plinth system.

The base/plinth system VX comprises the following components:

- Base/plinth corner pieces with base/plinth trim panels, front and rear
- Base/plinth trim panels, sides

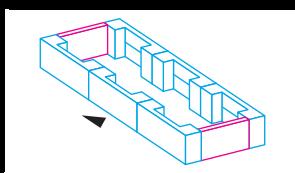

Thanks to fully symmetrical corner pieces, and by using the same base/plinth trim panels in the width and depth, the system opens up many new applications. For example, the vented trim panels and trim panels with brush strips available as accessories may now optionally be attached at the sides, or exchanged for the front/rear trim panels.

All trim panels may optionally be clipped into the corner piece, or screw-fastened. Depending on the application, for example, users can dispense with the trim panels between bayed enclosure suites, or a 100 mm high trim panel may be used to stabilise the base/plinth corner pieces. In combination with its extensive range of accessories, and thanks to its compatibility with enclosure accessories, the base/plinth system VX offers almost infinite possibilities in terms of siting, transportation, cable routing, cable attachment and base/plinth configuration.

- Other options:
- Cable entry at the side by fitting a 100 mm base/plinth trim panel with brush strip
 - Cable entry from the rear by dismantling one or more trim panels from the base/plinth corner pieces and replacing them with trim panels with brush strips
 - Cable routing in the base/plinth by using punched sections with mounting flanges on the base/plinth trim panels

Base/plinth

Base/plinth system VX

Base/plinth corner pieces with base/plinth trim panels, front and rear

Sheet steel

High-load capacity base/plinth corner pieces with moulded self-positioning to the enclosure, may be used with or without base/plinth trim panels depending on the application. Large openings in the corner piece for optimum access to the screw-fastening point, may be concealed with a plastic corner and baying cover.

Material:

- Base/plinth corner piece: Sheet steel
- Base/plinth trim panel front/rear: Sheet steel
- Corner and baying cover: Plastic

Colour:

- RAL 9005

100 mm high supply includes:

- 4 base/plinth corner pieces, 100 mm high
- 4 corner covers
- 1 baying cover
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

200 mm high supply includes:

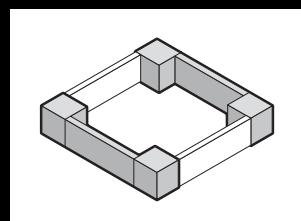

- 4 base/plinth corner pieces, 200 mm high
- 4 corner covers
- 1 baying cover
- 1 base/plinth trim panel, front/rear, 200 mm high

Base/plinth trim panels with brush strip

Sheet steel

For cable entry in the base/plinth. With a base/plinth height of 200 mm, one or two trim panels with brush strips may optionally be used. Thanks to the complete symmetry of the base/plinth system VX, the trim panels with brush strip may either be fitted at the front, rear or side on the base/plinth corner piece.

Material:

- Base/plinth trims: Sheet steel
- Brush strip: Plastic, self-extinguishing

Colour:

- RAL 9005

Supply includes:

- 2 base/plinth trim panels with brush strip
- Assembly parts

Base/plinth

Base/plinth system VX

Base/plinth trim panels, vented

Sheet steel

For venting the enclosure via the base/plinth. Specifically in applications such as power distribution where the enclosure gland plates are not used, this can be used to achieve a higher air throughput inside the enclosure. Various solutions to raise the roof and special roof plates with vent openings are also available for enclosure venting. With a 200 mm base/plinth height, one or two vented trim panels may optionally be used. Thanks to the complete symmetry of the base/plinth system VX, the vented trim panels may either be fitted at the front, rear or side on the base/plinth corner piece.

Material:

- Sheet steel

Colour:

- RAL 9005

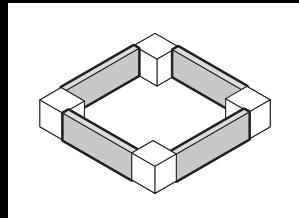

Supply includes:

- 2 base/plinth trim panels, vented
- Assembly parts for mounting on the base/plinth corner piece

For enclosure width/depth mm	Model No.
600	8620.090
800	8620.091

Accessories:

- Base/plinth installation bracket, see page 89
- Spacers for lifting the roof, see page 135
- Roof plate with vent holes, see page 136

Base/plinth corner pieces with base/plinth trim panels, front and rear

Stainless steel

High-load capacity base/plinth corner pieces with moulded self-positioning to the enclosure, may be used with or without trim panels depending on the application. Large openings in the base/plinth corner piece for optimum access to the screw-fastening point, may be concealed with a plastic corner and baying cover.

Material:

- Base/plinth corner piece: Stainless steel 1.4301 (AISI 304)
- Base/plinth trim panel front/rear: Stainless steel 1.4301 (AISI 304)
- Corner and baying cover: Plastic

Surface finish

- Trim panels: Brushed, grain size 400

100 mm high supply includes:

- 4 base/plinth corner pieces, 100 mm high
- 4 corner covers
- 1 baying cover
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

200 mm high supply includes:

- 4 base/plinth corner pieces, 200 mm high
- 4 corner covers
- 1 baying cover
- 1 base/plinth trim panel, front/rear, 200 mm high
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

Base/plinth

Base/plinth system VX

Base/plinth installation bracket

for base/plinth system VX, sheet steel and stainless steel

For configuring the base/plinth with punched sections with mounting flanges or cable clamp rails. To fit 100 and 200 mm high base/plinth trim panels in sheet steel and stainless steel.

Material:

- Stainless steel 1.4301 (AISI 304)

Supply includes:

- 2 installation brackets
- 2 mounting brackets for cable clamp rail
- Assembly parts

Note:

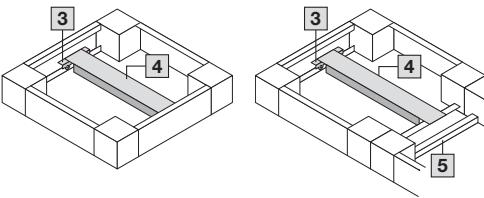

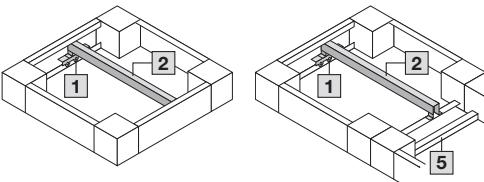

- For interior installation on upright base/plinth trim panels
- For base/plinth trim panels rotated through 90°, the installation bracket is not needed, because in this position, the system punchings of the base/plinth trim panels may be used directly.

- [1] Installation bracket with mounting bracket for cable clamp rail
[2] Cable clamp rail
[3] Installation bracket
[4] Punched section with mounting flange, 23 x 89 mm
[5] Base/plinth trim panel, rotated through 90°

For base/plinth trim panel height mm	P. of	Model No.
100	2 pc(s).	
200	2 pc(s).	8620.400

Accessories:

- Punched section with mounting flange, 23 x 64 mm, see page 150
- Punched section with mounting flange, 23 x 89 mm, see page 151
- Cable clamp rail, see page 187

Levelling component

For retrospective levelling on uneven floors at the installation site up to a maximum of 15 mm. Installed through the base/plinth corner piece. Adjusted using a hex spanner, width across flats 19 mm.

Benefits:

- A door offset caused by uneven flooring can be corrected
- Installed on the assembled enclosure, i.e. no need to plan levelling in advance

Load capacity:

- Max. admissible load: 2500 N per levelling component (check the load capacity of the floor).

Supply includes:

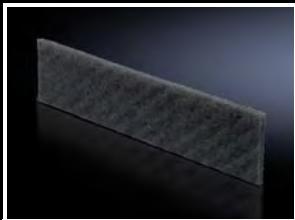

- Assembly parts

For base/plinth height mm	P. of	Model No.
100	4 pc(s).	8100.710
200	4 pc(s).	8100.711

Base/plinth

Base/plinth system VX

Cross member

Adjustable

- To increase stability
- Height 70 mm
- Adjustable to the enclosure depth

To increase stability, the cross member is positioned below the base frame of the enclosure and protrudes 138 mm at the front and rear. For deeper enclosures, the rear part may be extended and screw-fastened again. For screw-fastening to the floor and enclosure with mounting hole at the sides, front and rear. The castors and levelling feet may be secured to the welded nuts M12.

Material:

- Sheet steel

Surface finish:

- Spray-finished

Colour:

- RAL 7015

For enclosure depth mm	Model No.
400	8601.450
500	
600	8601.680
800	

Accessories:

- Twin castors 6148.000, 7495.000, see page 91
- Levelling feet 4612.000, see page 91

Assembly instruction:

- Ensure sufficient stability to prevent the enclosure from tipping over

Filter mat

for base/plinth trim panel, vented

The filter mat is simply inserted into the trim panel from the rear.

Supply includes:

- 1 roll, length 3 m, may be shortened to required length

P. of	Model No.
1 pc(s).	8620.100

Levelling feet

18 – 43 mm high

To compensate for height differences with floor irregularities. Mounting thread M12.

Load capacity:

- Max. admissible load: approx. 3000 N per levelling foot

Material	P. of	Model No.
Sheet steel	4 pc(s).	4612.000
Stainless steel	4 pc(s).	8100.780

! **Also required:**

- For mounting on the base/plinth:
Base/plinth adaptor, see page 92

Levelling feet

85 – 115 mm high

For mounting on enclosures, for easier floor cleaning and to compensate for floor irregularities ±15 mm.

Load capacity:

- Max. admissible load: 3500 N per levelling foot

Material:

- Stainless steel 1.4301 (AISI 304)

Supply includes:

- Assembly parts

P. of	Model No.
4 pc(s).	2859.000

Twin castors

For mobile use, for mounting directly on the enclosure. Mounting thread M12 x 20.

! **Also required:**

- For mounting on the base/plinth:
Base/plinth adaptor for twin castors, see page 92

1	Maximum admissible load (per castor)	750 N
	Floor clearance	85 mm
	Lock	2 with, 2 without
	P. of	4 pc(s).
	Colour	Black with grey running surface
	Model No.	6148.000

2	Maximum admissible load (per castor)	1200 N
	Floor clearance	125 mm
	Lock	2 with, 2 without
	P. of	4 pc(s).
	Colour	Black
	Model No.	7495.000

Base

Base/plinth adaptor

for twin castors and levelling feet

For mounting twin castors and levelling feet to the base/plinth.

Material	P. of	Model No.
Sheet steel	4 pc(s).	8100.770
Stainless steel	4 pc(s).	8100.771

Note:

- When fitting twin castors, side trim panels, see page 86, are required.

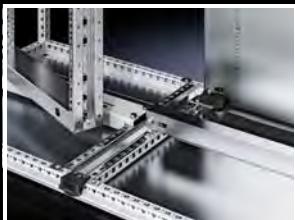

System divider

Divides the enclosure width into two zones. In this way, for example, mounting plates, cable clamp rails or swing frames from 600 mm wide enclosures can be fitted in 1200 mm wide enclosures.

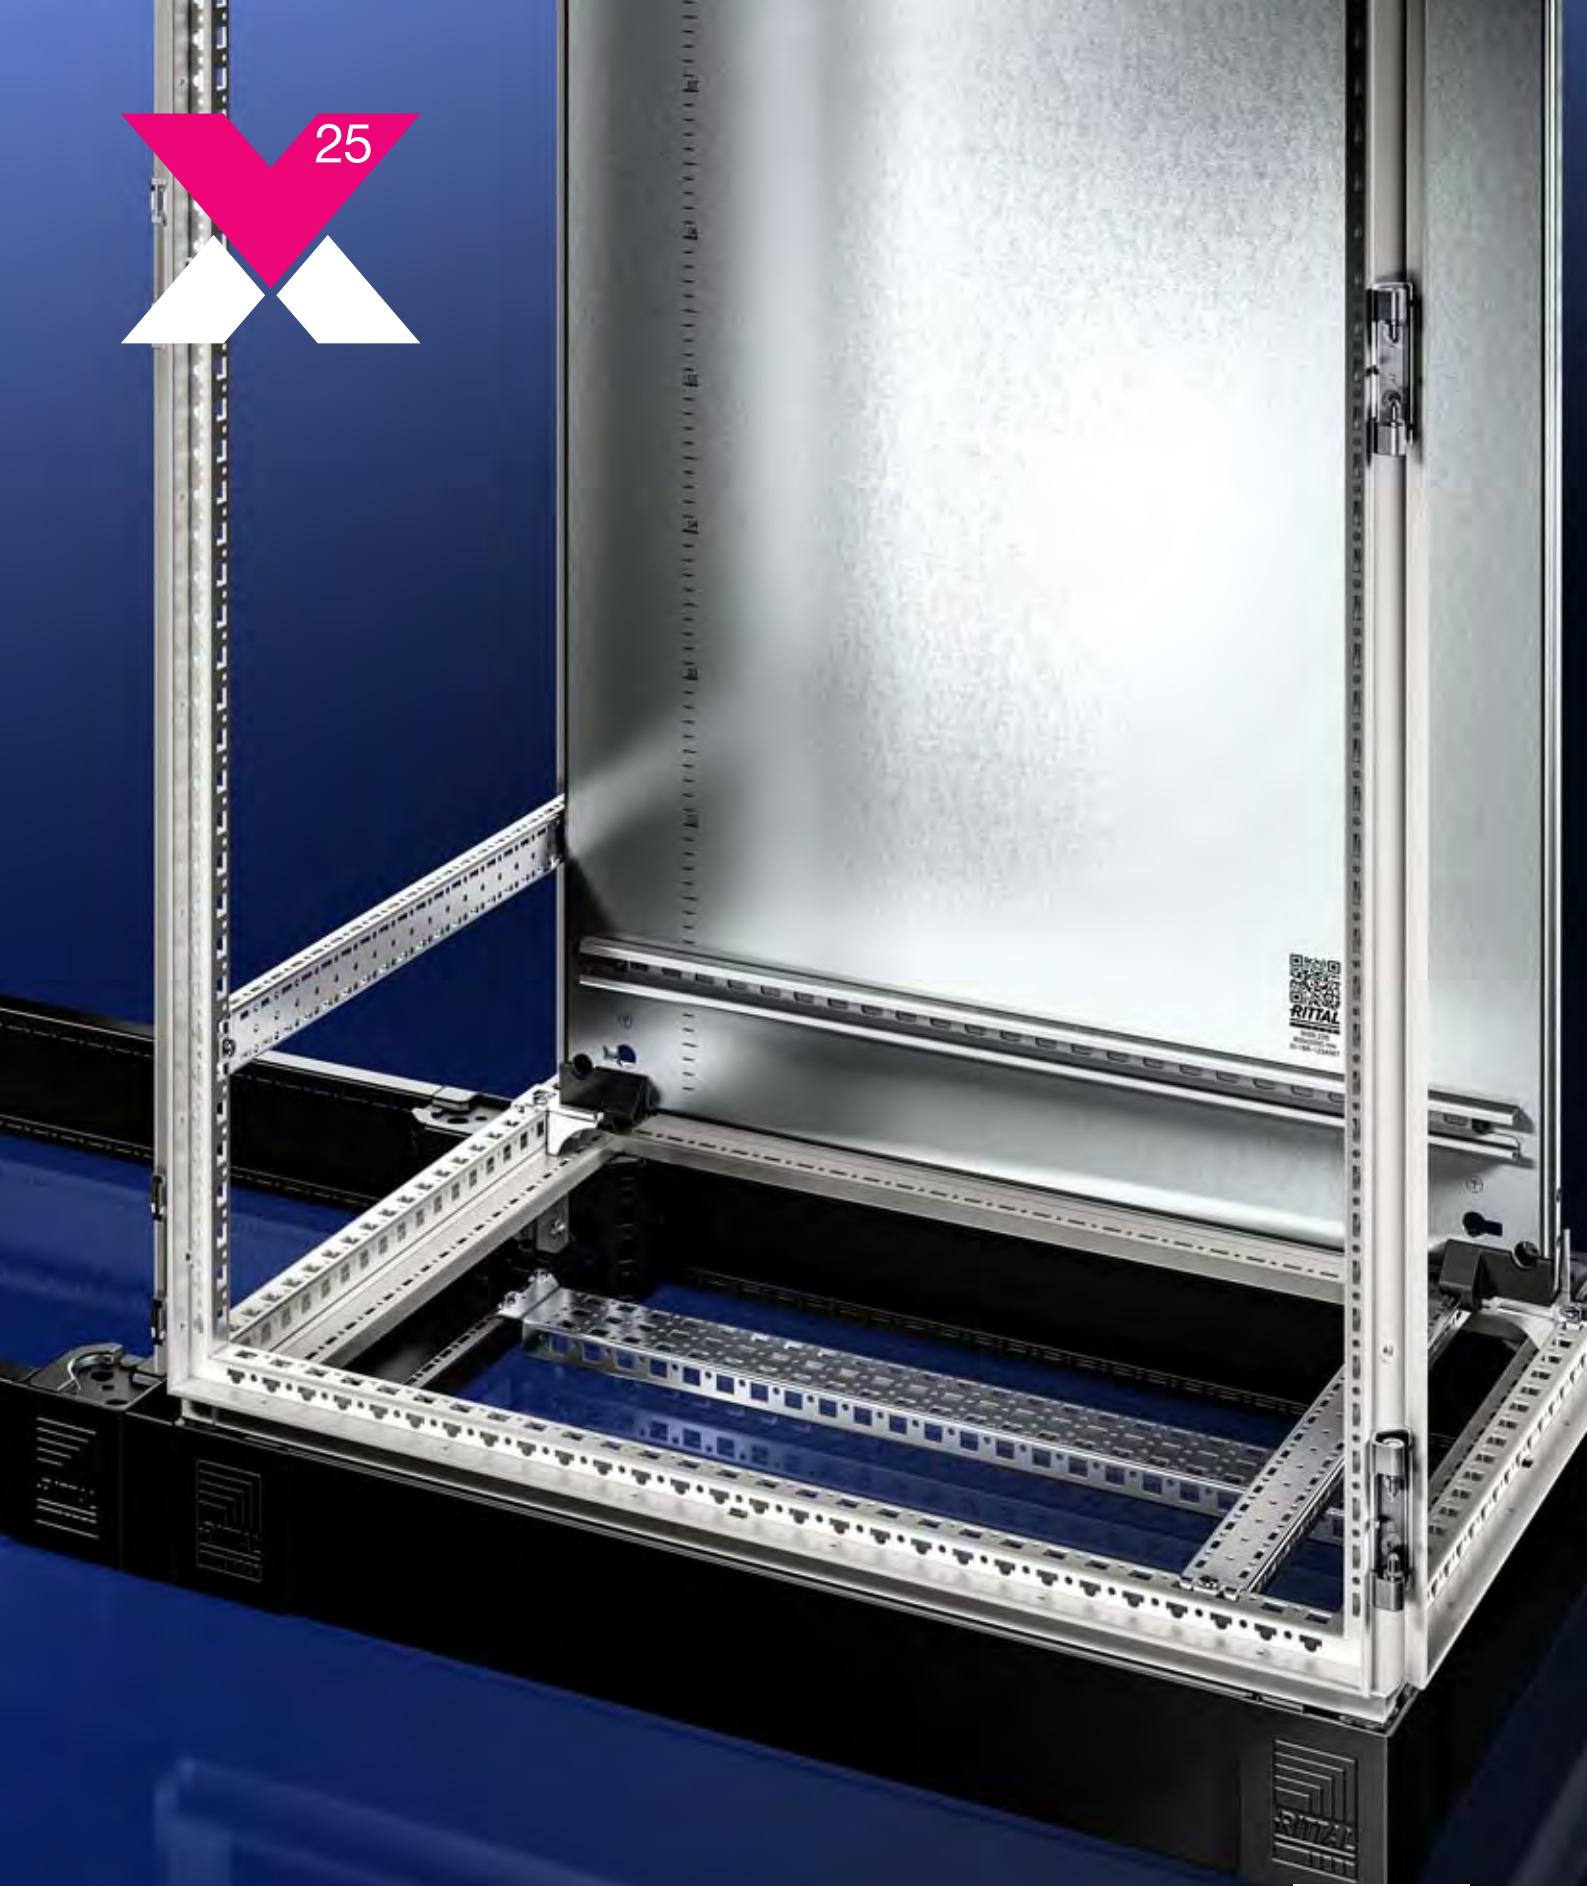

Depth	P. of	Model No.
500	2 pc(s).	8620.900
600	2 pc(s).	8620.901

Accessories:

- Swing frame mounting kit, see page 194
- Cable clamp rail, see page 187
- Support rails 48 x 26 mm, see page 152

Walls

		<p>Side panels Simple one-man installation with the positioning aid provided as standard.</p>		 <p>Hinge The hinge for side panels provides unhindered access from the side at any time, so the side panel can be opened at an angle of 180°.</p>
		 <p>Side panel holder The side panel holders are easily retro-fitted and removed at any time because they simply clip into position from the outside, even with the rear panel fitted. Internal earthing inserts ensure automatic potential equalisation, while at the same time guaranteeing enhanced EMC protection.</p>		
		 <p>Divider panel for module plates A complete system comprised of a divider panel, module plates and adaptors, and even a cover with a door, is available for mounting heavy connectors. It goes without saying that the door can also be integrated into the complete lock system, with all its variants.</p>		
	<p>Right</p> 	<p>Left</p> 	<p>Isolator door cover The solution for all switchgear subject to the requirements of UL 508 A for bayed enclosure suites. The isolator door cover can be used on the left or right, and is finished off with the standard side panel.</p>	

Walls

Side panels

Side panels, screw-fastened, sheet steel

- Time-saving assembly thanks to clip-in side panel holders
- Automatic potential equalisation and higher EMC protection, thanks to enclosure panel holders with earthing inserts located on the inside
- Easy positioning in the height and depth with the location aid
- One-person assembly
- Earthing bolts with large, paint-free contact surface for optimum contact

Material:

- Sheet steel, 1.5 mm

Surface finish:

- Dipcoat-primed, powder-coated on the outside

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP 55

Supply includes:

Version	Cut-outs	P. of	Model No.
Solid	-	1 pc(s).	8609.160
For 16-pole connectors	4	1 pc(s).	8609.150
For 24-pole connectors	4	1 pc(s).	8609.140
For cable entry	1	1 pc(s).	8609.170
With cable sleeve	1	1 pc(s).	8609.390

**Solid**

For sealing unused cut-outs. Easily machined for individual cut-outs.

**For 16/24-pole connectors**

With cut-outs to accommodate connectors.

**Accessories:**

- Adaptor, cover plate, see page 101
- Connector gland for connector cut-outs, see page 101
- Connector gland sealing frame and sealing module, see page 185

**For cable entry**

For inserting pre-assembled cables. Sealed, secure routing is achieved via adjustable angle brackets with inserted foam cable clamp strip. Fixed bracket, slotted, for cable clamping.

**Accessories:**

- Cable tie for fast assembly 2597.000, see page 188

**With cable sleeve**

For cable diameters from 10 to 65 mm. The flexible grommet adapts to the cable's bending radius.

Walls

Divider panels/partitions

Adaptor

for connector cut-outs

For using connectors with varying numbers of poles.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Seal and assembly parts

For reduction	P. of	Model No.
from 24 to 16 poles	5 pc(s).	2479.000

Accessories:

- Lock inserts, type G, see page 121
- Comfort handle, see page 120
- 180° hinge, see page 111

Walls

Isolator door lock

Isolator door cover

Including main door latch for safety locking of enclosures and bayed enclosure suites in accordance with UL regulations. Tested in conjunction with actuator lever for master switch from the following companies:

- Allen Bradley
- Square D
- General Electric
- Eaton
- Siemens

A detailed overview of types can be found on the Internet, together with the product description.

Benefits:

- Meets the requirements of UL 508 A
- In conjunction with the operating mechanism, adjacent door lock and interconnecting rods, these requirements are also met for bayed combinations
- Optional mounting on the left or right of the enclosure. With this cover, all single-door bayed enclosures may be configured as isolator door enclosures. The complete installation surface of the enclosure is retained.
- In conjunction with the integrated mounting plate infill, the mounting surface of the main enclosure can be enlarged by up to 14%
- Two cut-outs for actuator levers on the front, for internal mounting at varying heights

Material:

- Sheet steel, 1.5 mm

Surface finish:

- Powder-coated

Colour:

- RAL 7035

Protection category IP to IEC 60 529:

- IP 55

Protection category to NEMA:

- NEMA 12

Supply includes:

- Main door lock, cover plate and assembly parts

Note:

- Cover may only be mounted on a single-door enclosure with tubular door frame

Width mm	Height mm	Depth mm	Model No.
125	1800	400	8951.020
125	1800	500	8951.030
125	2000	500	8951.000
125	2000	600	8951.010

Also required:

- Operating mechanism 4912.000, for enclosure with isolator door cover and additionally in every fourth adjacent enclosure, see page 103
- Adjacent door latch 4911.000, 4911.100, for every adjacent enclosure, see page 103
- Interconnecting rods, for every adjacent enclosure in the appropriate enclosure width, see page 103
- Side panel, screw-fastened, see page 96

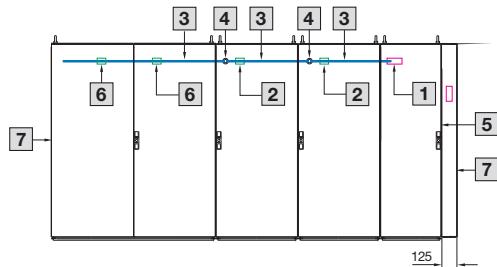

Accessories:

- Mounting plate infill, see page 141

Isolator door locking

- 1 Operating mechanism
- 2 Adjacent door latch (single-door)
- 3 Interconnecting rod
- 4 Connection component
- 5 Main door latch
- 6 Adjacent door latch (two-door)
- 7 Side panel, screw-fastened

Installation to the right of the enclosure

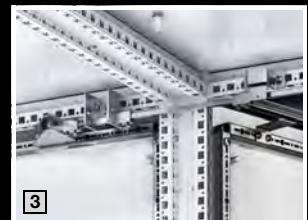

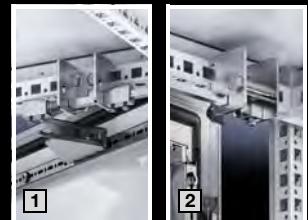

Door latch for bayed enclosure suites

In conjunction with the isolator door cover, the requirements of UL 508 A are also met for bayed enclosure suites. Depending on the baying combination, different components will be required; refer to the assembly sketch on page 102.

Note:

- The door latch for bayed enclosure suites can also be used without the isolator door cover and in combination with commercially available master switches. In this way, adjacent doors cannot be opened until the main door has been opened.

[1] Operating mechanism

Fitted in the enclosure with main switch and additionally in every fourth adjacent enclosure

	P. of	Model No.
Operating mechanism	1 pc(s).	4912.000

[2] Adjacent door latch

Fitted in the adjacent enclosure

Adjacent door latch for	P. of	Model No.
Single-door enclosures	1 pc(s).	4911.000
Two-door enclosures	1 pc(s).	4911.100

[3] Interconnecting rods

To extend locking from the main enclosure to the adjacent enclosures of a bayed suite. One interconnecting rod corresponding to the width of the enclosure is required for each adjacent enclosure.

For enclosure width mm	P. of	Model No.
600	10 pc(s).	4916.000
800	10 pc(s).	4918.000
1200	10 pc(s).	4920.000

Baying system

25

Baying connector, external
Simple baying on the vertical sections, even retrospectively, if installed equipment makes it difficult or impossible to bay from the inside.

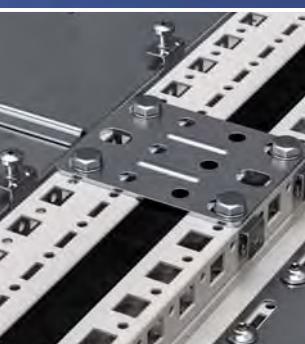

Baying block, internal
Flexible positioning at the baying point, flush with the enclosure section on a 25 mm pitch pattern. Top-mounting of the baying block is easily achieved. Enclosures are easily pushed together.

Baying cover, top
Reliably protects the baying point at the top to prevent the accumulation of dirt and liquids.

Baying seal
Fast, secure-fit, all-round attachment of the baying seal onto the section edge; easily removed at any time without leaving any residues. Lends itself readily to reuse.

Baying bracket, internal
For flexible positioning at the baying point on a 25 mm pitch pattern, thereby avoiding collisions with equipment installed across multiple enclosures. The option of screw-fastening the baying bracket from the side makes it easy to push enclosures together.

Combination angle
The combination angle can be exchanged for the roof attachment screw, to ensure optimum load distribution among the enclosure corner points when bayed enclosure suites are transported by crane.

Baying base/plinth corner pieces
The internal baying bracket can also be used for stable baying of base/plinth corner pieces in the base/plinth system VX.

Baying kit, VX25 to TS 8
Ensures the secure baying of a VX25 when extending existing TS 8 enclosure suites.

Baying system

Baying

Baying bracket, internal

- Fast, secure installation either from the front or from the side
- For all-round installation on the baying joint
- May be flexibly positioned to avoid collisions with installed equipment
- Also suitable for baying base/plinth components

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Baying bracket, internal
- Baying seal
- Assembly parts

P. of	Model No.
6 pc(s).	8617.500

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying block, internal, see page 106
- Baying connector, external 8617.502, see page 106

Baying block, internal

- Side mounting creates a flush surface to the extrusion, suitable for top mounting, thus avoiding collisions with installed equipment
- For all-round installation on the baying joint

Material:

- Die-cast zinc

Supply includes:

- Baying block, internal
- Baying seal
- Assembly parts

P. of	Model No.
6 pc(s).	8617.501

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying bracket, internal, see page 106
- Baying connector, external 8617.502, see page 106

Baying connector, external

For mounting on the vertical enclosure sections from the outside.

Supply includes:

- Baying connector, external
- Baying seal
- Assembly parts

Material	P. of	Model No.
Sheet steel, zinc-plated	6 pc(s).	8617.502
Stainless steel 1.4301 (AISI 304)	6 pc(s).	8617.503

Note:

- 1 pack is sufficient for one baying joint

➡ Possible alternative:

- Baying bracket, internal, see page 106
- Baying block, internal, see page 106

Baying system

Baying

Combination angle

For optimum distribution of tensile forces during transportation of bayed enclosures by crane.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

P. of	Model No.
4 pc(s).	4540.000

Accessories:

- Baying cover, top, see page 107

Baying cover, top

A cover with two end caps may additionally be clipped over the seal between the two enclosures. This prevents dirt and liquid from accumulating on the baying seal.

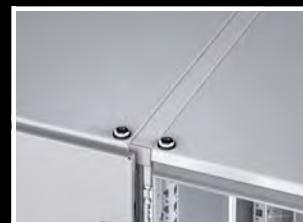

Supply includes:

- Assembly parts

Note:

- May also be fitted in the width with enclosure suites bayed back-to-back
- May also be used in conjunction with dust guard trim, see page 134

Also required:

- Baying connector, external, 8617.502, see page 106

Baying kit, VX25 to TS 8

For extending existing TS 8 bayed enclosure suites with VX25 enclosures.

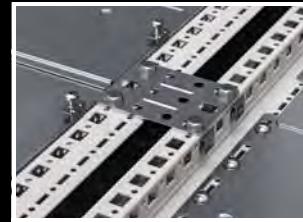

Material:

- Baying connector: Sheet steel

Supply includes:

- 6 baying connectors
- 1 seal

P. of	Model No.
1 pc(s).	8617.505

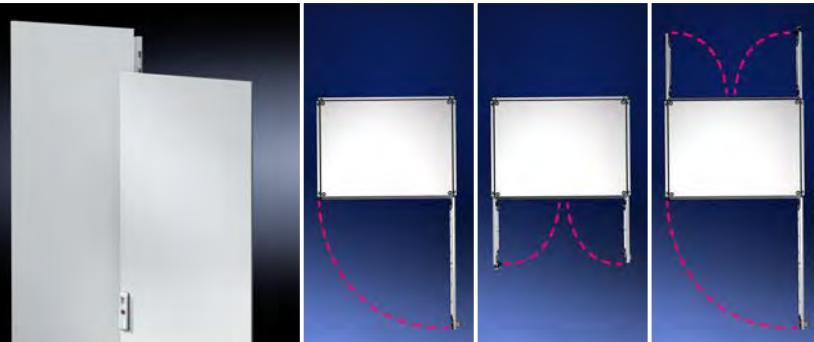

Door variants

25

Glazed door

The glazed door easily replaces a sheet steel door, without the need for machining. The single-pane safety glass features a designer grid pattern print at the top and bottom. The glazed door is pre-fitted as standard with 180° hinges.

Lockable and adjacent door

In 800 mm wide enclosures, the one-piece standard door may be replaced for a two-piece lockable and adjacent door, so that mandatory escape routes can still be observed in confined spaces. The lockable and adjacent door may also be fitted instead of the rear panel.

Protective bar

In open control systems, the protective bar prevents people from falling into the switchgear. In combination with the hinged trim panel, top, this allows the safe accommodation of display and control components despite the open switchgear.

Modular climate control concept

The modular climate control concept allows cooling unit components up to 2500 W to be integrated into the enclosure door, without the need for machining. The standard door is easily replaced for the modular climate control door. In two-door enclosures, either the lockable door or the adjacent door may be exchanged for a modular climate control door.

Partial doors

Partial doors allow individual configuration of the enclosure front. Sheet steel variants and variants with a viewing window are available.

Transport and mounting handle

The transport and mounting handle is an ergonomic tool to make the fitting and removal of doors easier. It is simply suspended from the tubular door frame.

Door variants

Doors/locks

Door variants

Glazed door

Instead of a sheet steel door or rear panel.

Supply includes:

- Cooling module prepared for installation in section door
- Nano-coated condenser
- Integral electric condensate evaporation
- Fully wired ready for connection (plug-in terminal strip)

Note:

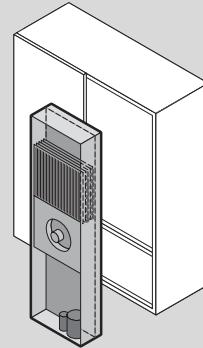

- A base/plinth with a height of 100 or 200 mm is required for efficient operation

Doors/locks

Installation accessories for modular front design

Modular front design

Suitable for 400 to 1200 mm wide enclosures instead of a door or rear panel. The partial doors with and without viewing panels, including cross members, may be combined with one another as required. A trim panel is required at the top and bottom in each case. The requirements for your individual front design and the considerations which must be taken into account are illustrated on the sample configuration opposite.

- [1] Front trim panel, top
- [2] Front trim panel, bottom
- [3] Partial door with viewing window
- [4] Partial door

Doors/locks

Installation accessories for modular front design

Partial doors

The door may be optionally hinged on the right or left. The partial door is attached to the enclosure with no drilling required. In the case of partial doors without a viewing panel (height 600 – 1000 mm), the installation of a monitor frame 2305.000 is supported. Standard double-bit lock insert may be exchanged for lock inserts, type A.

Material:

- Partial door: Sheet steel, 2 mm
- Viewing window: 3 mm single-pane safety glass

Surface finish:

- Textured paint

Colour:

- RAL 7035

Supply includes:

- Cross member, hinges and lock components
- Assembly parts

Also required:

- Front trim panels, top, see page 116 or top-hinged trim panel, see page 117
- Front trim panels, bottom, see page 116

Accessories:

- Monitor frame 2305.000, see page 130
- Lock inserts, type A, see page 123
- Perforated mounting strips, see page 116

Lock systems

25

Electronic lock systems
When using electronic lock systems that require additional cabling, punchings are provided as standard in the door so that they can be fitted retrospectively without the need for machining.

Multiple lock
Up to six padlocks may be attached to the multiple lock, providing individual access rights for different individuals or groups of individuals.

Standard lock

The standard lock allows convenient, tool-free installation and removal. Simply unlatch the locking pin with the door opened. Replacing the lock insert or exchanging it for a comfort handle couldn't be simpler.

Comfort handle

Installation of the comfort handle is completely tool-free, and with its ingenious fold-down system, it does not require any swing space or door surface area. The comfort handle is available in all standard versions and lock inserts.

Seamless lock system

Because a full range of standard lock inserts is available for all the locks used, a seamless lock system can be created.

Doors/locks

Lock system

Comfort handle VX

As the handle does not take up any swing space, due to its folding action, the door surface area available for installed equipment is maximised. Simple assembly, thanks to the snap-mounted handle system.

Doors/locks

Door, internal

Wiring plan lectern

Holds wiring plans during fault-finding and maintenance work. Wiring plan lecterns may be bayed according to the door width. For mounting on the tubular door frame.

Material:

- Utility lectern: Polypropylene
- Mounting bracket: Die-cast zinc

Colour:

- Similar to RAL 7035

Supply includes:

- Wiring plan lectern (width 210 mm)
- Assembly parts

P. of	Model No.

Door stay for escape routes

The stay is actuated automatically in the event of pressure, releasing the door in both directions. In conjunction with 180° hinges, this ensures that no escape routes are blocked by open doors in the event of an emergency. The space-saving design does not obstruct the installed equipment in the door.

P. of	Model No.
1 pc(s).	8618.400

Accessories:

- 180° hinge, see page 111

Ride-up roller for door

Lifts up the door when there is heavy installed equipment (e.g. cooling unit) as a closing aid. For attaching to the tubular door frame.

P. of	Model No.
10 pc(s).	8618.420

Transport and mounting handle

For safe installation and removal of the door and during relocation in the workshop.

P. of	Model No.
1 pc(s).	2415.100

Doors/locks

Viewing window

System window

To cover display and operating elements or cut-outs, and to protect against dirt and liquids as well as unauthorised access.

Consisting of the following 2 components:

1. Base frame:

- Easily screw-fastened to the door, thanks to modified dimensions (tubular door frame may be used as a drilling template)
- Readily height-adjustable
- Stabilises the door cut-out
- Conceals the cut edge
- The rain canopy
 - prevents dirt from landing on the seal
 - protects the glass from being lifted out
 - prevents the ingress of dirt, and prevents moisture from running behind the window when opened
- Frame section height 30 mm or 60 mm

2. Viewing window:

- Made from single-pane safety glass:
 - High level of resistance to solvents and scratches
 - Anti-static
 - Reduced risk of injury if broken
- Cam lock with double-bit insert, may be exchanged for lock inserts, type A, and semi-cylinders in the Ergoform-S lock system (not for 2735.500 and .560)
- Hinge with 180° opening angle, easily inserted

Material:

- Extruded aluminium sections with die-cast zinc corner pieces and single-pane safety glass

Surface finish:

- Base frame: Powder-coated in RAL 7035
- Hinge and lock section: Natural-anodised

Protection category IP to IEC 60 529:

- IP 54

1 pc(s).	2379.900

Roof

Eyebolts

For transporting by crane, the standard roof attachment screw is easily exchanged for eyebolts, or in the case of bayed enclosure suites, combined with the combination angle. With both variants, the automatic potential equalisation is retained.

Spacer

Spacers are available in three different heights, so that the roof can easily be raised for ventilation purposes.

Dust guard trim

The dust guard trim prevents dust from depositing on the upper edge of the door and in the gap between the door and the horizontal enclosure section. The integral transparent plastic is a simple way of adding individual labelling or branding to the enclosure module.

Wall bracket

For enclosures with a shallow depth or heavy equipment in the door or swing frame, the wall brackets provide stability.

Pressure stopper

The pressure stopper allows retrospective fitting of a pressure relief function to comply with health and safety regulations for arc-proofing to IEC/TR 61 641.

Punched section with mounting flange

Standard punched sections may also be used to support the roof and side panels. This simplifies engineering and assembly, and relieves pressure on the parts warehouse.

Top-mounting module

The top-mounting module quickly and easily creates 200 mm extra space in the height for busbar systems across enclosures, or for a cable chamber in the roof space. The base/plinth system VX can also be used for simple cable routing and panelling.

Roof

Dust guard trim

To protect against dust deposits on the upper edge of the door and between the door and upper horizontal enclosure section. The dust guard trim provides space for texts or company logos.

Colour:

- RAL 7035

Supply includes:

- Clear plastic strip for text labels (height 29.5 mm)

Length mm	P. of	Model No.

Mounting plates

25

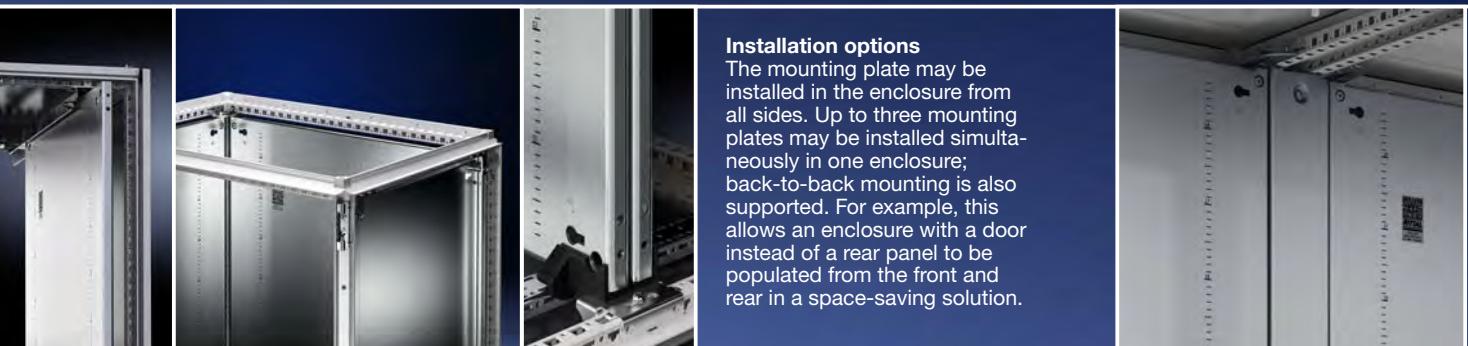

Earthing

The keyhole opening allows simple retrospective earthing of the mounting plate from the front while in an installed state, without having to hold a screw or nut behind the mounting plate.

Transportation

For transportation purposes, or with high dynamic loads, the mounting plate can easily be additionally secured at the top and bottom with a screw attachment.

Installation options

The mounting plate may be installed in the enclosure from all sides. Up to three mounting plates may be installed simultaneously in one enclosure; back-to-back mounting is also supported. For example, this allows an enclosure with a door instead of a rear panel to be populated from the front and rear in a space-saving solution.

Mounting plates

Depth adjustment

The mounting plate supports straightforward depth adjustment on a 25 pitch pattern using slide blocks and the patented mounting plate attachment at the top. Using a special installation kit, the mounting plate may be offset by a further 20 mm in the depth, and populated mounting plates may also be installed from the rear.

System divider

Divides the enclosure width into two zones. For example, this allows mounting plates, cable clamp rails or swing frames from 600 mm wide enclosures to be fitted in 1200 mm wide enclosures.

Mounting surface

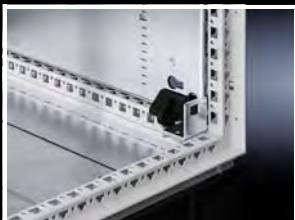

In the rearmost installation position, the mounting plate forms a continuous installation space with the enclosure frame. In a set forward position, a separate mounting plate infill performs this role.

Partial mounting plates

The partial mounting plates quickly and flexibly create additional mounting surfaces at all enclosure levels. They may be used as a component shelf, and can also be hinged to retain access to the mounting level behind. They may even be used on the tubular door frame. The keyhole attachment ensures extremely fast, safe assembly by simply locating into position and securing.

Interior installation

Mounting plates

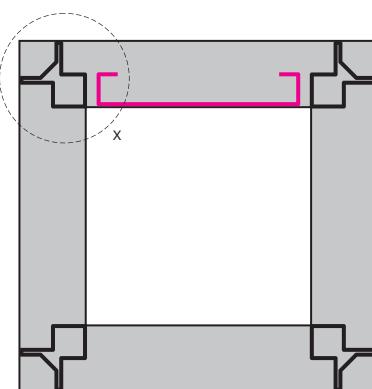

Mounting positions

The mounting plate included with the supply, together with the

- Mounting plate infills
- Partial mounting plates
- etc.

available as accessories, lend themselves to extremely flexible use inside the enclosure, enabling you to achieve the ideal mounting position for every application.

Detail X	Mounting position Mounting plate	Function	Benefits
	Flush with the enclosure frame Position: ±0 mm	Included for enclosures with mounting plate.	The mounting plate and enclosure frame create a continuous mounting surface at the same depth. Simple top-mounting of the enclosure frame is supported, and can be used for continuous enclosure-to-enclosure cable trunking, support rails etc. The usable mounting width is enlarged by up to 25%, depending on the enclosure selection.
	Set forward from the enclosure frame on a 25 mm pitch pattern Position: -25 mm -50 mm -75 mm etc.	Included for enclosures with mounting plate.	Creates space behind the mounting plate for the installation of compon- ents or for cable routing. Ideal for moving the centre of gravity of installed equipment closer to the centre of the enclosure, or when a short distance from the door is required, e.g. in order to fit a master switch. The distance between the mounting plate and the door is reduced on a 25 mm pitch pattern compared with the flush mounting position.
	Set back behind the enclosure frame Position: +20 mm	Via multi-functional installation kit for mounting plate 8617.370, see page 144	For maximising the installation depth in the enclosure. Particularly useful in situations where deep installations in a single enclosure, such as fre- quency converters, would increase the depth for the entire bayed enclo- sure suite. The installation depth in the enclosure is increased by 20 mm compared with the flush mounting position.

Interior installation

Mounting plates

Mounting plate infill

For a continuous mounting surface in bayed suites where the mounting plate is set forward.

Installation kit

for back-to-back mounting plates

The minimum spacing between the mounting plates facilitates maximum assemblies on both mounting plates.

Material:

- Sheet steel

Surface finish:

- Zinc-plated, passivated

P. of	Model No.
1 pc(s).	8617.360

! Also required:

- Second mounting plate, to fit the enclosure dimensions, refer to Rittal list of spares at www.ittal.com.

+ Accessories:

- For enclosures with a rear panel, the following may be used for optimum access to the rear mounting plate:
Glazed door instead of rear panel, see page 110
Lockable and adjacent door 8618.120, for enclosure dimensions W x H = 800 x 2000 mm, see page 110

Interior installation

Mounting plates

Multi-functional installation kit for mounting plate

For installing the mounting plate from the rear of the enclosure

- Mounting position flush with the enclosure frame, position ± 0
- The mounting plate is removable from the front and rear for servicing

For 20 mm more installation depth in the enclosure

- Mounting position set back behind the enclosure frame, position ± 20 mm

For additional screw-fastening of the mounting plate

- For all mounting positions

P. of	Model No.
1 pc(s).	8617.370

Material:

- Sheet steel

Surface finish:

- Zinc-plated, passivated

Supply includes:

- Assembly parts

Slide rail

for mounting plate

For sliding the mounting plate in from the side.
For mounting in a set-forward position.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

For enclosure width mm	P. of	Model No.
600	2 pc(s).	8617.400
800	2 pc(s).	8617.401
1200	2 pc(s).	8617.402

Cross-brace

for mounting plates

Additional horizontal rigidity for vibration damping and/or retrospective stabilisation of wide mounting plates. This brace may also be used as an attachment aid for heavy components.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- 2 sections

For enclosure width mm	Model No.
1200	4333.120
1600	4333.160
1800	4333.180

Interior installation

Mounting plates

Partial mounting plate

To accommodate additional components inside the enclosure. Partial mounting plates can be used extremely flexibly, providing a platform for a diverse range of applications. For optional installation either upright as a vertical mounting surface, or flat as a horizontal base. For attachment either directly to the enclosure section or, with a set-forward construction, for example, to any mounting level in the enclosure using punched sections with mounting flanges. For multi-level installation one behind the other, partial mounting plates may be vertically hinged, via hinge attachment 8617.650, to allow rapid access to the levels behind.

Material:

- Sheet steel, 2.5 mm

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Note:

- Depending on the mounting situation, additional parts such as punched sections with mounting flanges may be required, see installation example on page 146

Accessories:

- Punched section with mounting flange for the inner and outer level, see page 150
- Hinge attachment 8617.650, see page 147

Installation examples:

See page 146

Interior installation

Mounting plates

Installation examples

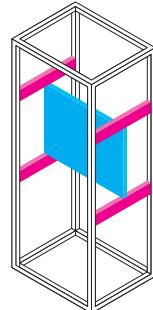

Full installation in the width/depth

Choose a partial mounting plate 100 mm smaller than the nominal size of the enclosure. For example, a partial mounting plate with dimensions 500 x 700 mm can be installed in enclosures with nominal dimensions of 600 and 800 mm.

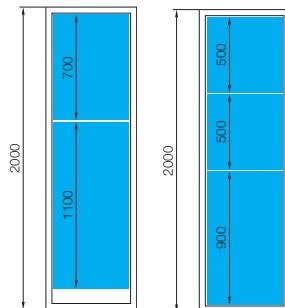

Full installation, set forward in the width/depth

For set-forward installation, punched sections with mounting flanges are required for the inner or outer mounting level, according to the enclosure depth.

Full installation in the height

The sum total of partial mounting plates 100 mm should be smaller than the nominal size of the enclosure. For example, in a 2000 mm high enclosure, the sum total of partial mounting plates should not exceed 1900 mm.

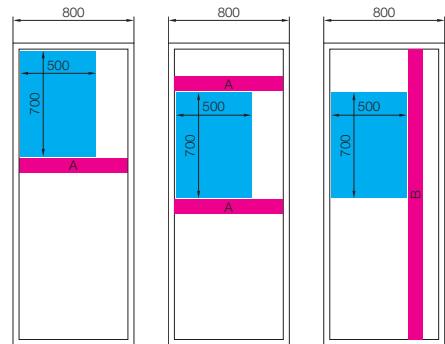

Partial installation

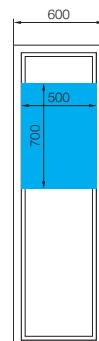

Also required:

- Punched section with mounting flange 23 x 64 mm (**A**) to match the enclosure width or depth, see page 150
- Punched section with mounting flange 23 x 64 mm (**B**) to match the enclosure height, see page 150

Door installation

Choose a partial mounting plate 100 mm smaller than the nominal size of the enclosure. For example, a partial mounting plate with dimensions 500 x 700 mm can be installed on the tubular door frame of enclosures with a nominal size of 600 mm.

Interior installation

Mounting plates

Hinge attachment

for partial mounting plate

In conjunction with the mounting kit for swing frames, small, the partial mounting plate can be hinged to allow access to the components behind it for servicing.

Installation options:

- At the front, on the frame section
- Set back, in the enclosure depth
- At the side, in conjunction with the hinged side panel

Material:

- Steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

P. of	Model No.
1 pc(s).	8617.650

! Also required:

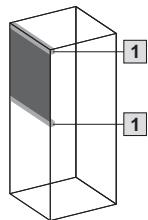

- Installation kit for swing frame, small, for enclosure width 600 mm (8619.600) or 800 mm (8619.610), see page 192
- Punched section with mounting flange 23 x 64 mm according to the enclosure depth, see page 150

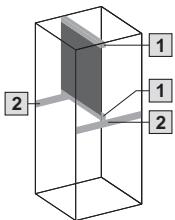

Examples

In the highest or lowest position

Front

Set back

2 Punched section with mounting flange
23 x 64 mm in accordance with the
enclosure depth

In a central position

Front

Set back

Transport handle

for mounting plates

For use at any given position in the side C-fold.

Benefits include:

- Adapts to users of different heights
- Optimised force transmission
- Simple handling

P. of	Model No.
2 pc(s).	2415.500

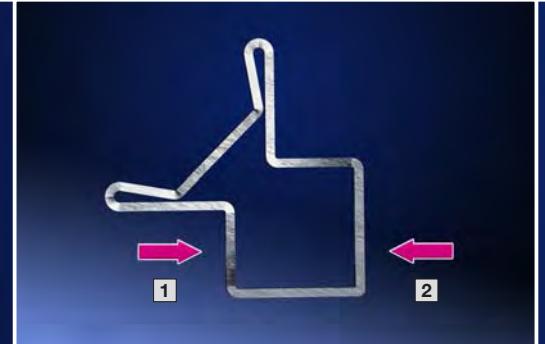

Rail systems

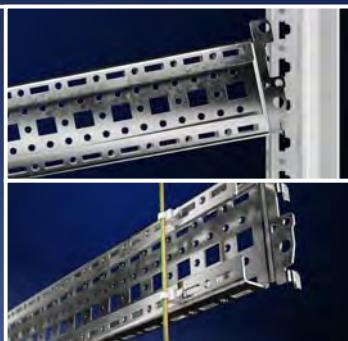

Enclosure frame

The patented profile is completely symmetrical across all levels and equipped with 25 mm system punchings that are consistently retained even across multiple enclosures.

Punched section with mounting flanges for the outer mounting level

The punched section may optionally be used directly on the enclosure section or in combination with the punched section with mounting flange on the inner mounting level.

Cage nut

With their ergonomic form and integral automatic potential equalisation, the M6 or M8 cage nuts contribute to a high standard of work safety. They may be used on all levels of the VX25 enclosure system, as well as in all punched sections with 12.5 x 11 mm punchings.

**Two mounting levels**

The two mounting levels, spaced 25 mm apart, allow optimum flexibility and maximise the space available for interior installation.

- [1] Outer mounting level
- [2] Inner mounting level

Punched section with mounting flange for the inner mounting level

The punched section with mounting flange supports system configuration on a 25 mm pitch pattern across all levels of the VX25, even beyond enclosure boundaries. Cage nuts up to M8 may be used in the system punchings on three levels. In this way, your own components can be securely fastened with metric screws. Direct mounting on the horizontal enclosure section is also supported.

Punched section with mounting flange for the outer mounting level

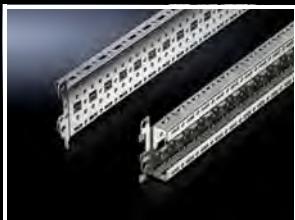

The punched section is easily retro-fitted, even with the side panel already installed, because the rounded edges allow it to be screwed in. The additional C-fold may be used to support heavy installed equipment on the side panel or roof, or for attaching cable connectors.

Punched section with mounting flange, 14 x 39 mm

The punched section enables individual interior installation on the tubular door frame provided as standard.

Interior installation

Rail systems

Punched section with mounting flange, 18 x 64 mm

For variable, individual interior installation of the enclosure frame on the outer mounting level. Simply locate into the system punchings from the outside and screw-fasten. System punchings on all four sides. With pre-fitted side panels or bayed enclosures, the punched sections with mounting flanges may also be fitted from the inside of the enclosure.

Installation options:

- On the outer mounting level, on the enclosure section
- On the outer mounting level, between two punched sections with mounting flanges 23 x 64 mm

Material:

- Sheet steel

Surface finish:

- Zinc-plated

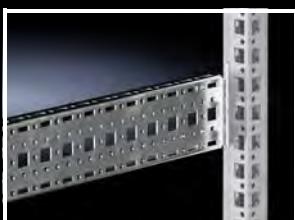

Supply includes:

- Assembly parts

Accessories:

- Angle piece 4134.000, see page 156

Quick-assembly block

For a variety of installation options.

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges for the inner mounting level

Material:

- Die-cast zinc

Supply includes:

- 12 quick-assembly blocks
- 12 threaded blocks M8
- 24 screws M8 x 12 mm
- 24 square nuts M8

P. of	Model No.
12 pc(s).	4133.000

Accessories:

- Angle piece 4134.000, see page 156

Angle piece

For assembling mounting surfaces with a 45° incline.

With two mounting options as standard:

- Conductively connected to the subsurface
- Insulated from the mounting surface

Installation options:

- On the vertical and horizontal enclosure section
- On punched sections with mounting flanges for the inner mounting level
- On the bracket/spacer
- On the quick-assembly block

Material:

- Angle pieces: Die-cast zinc
- Insulating pieces: Plastic

Supply includes:

- 1 pc(s). =
 - 1 angle piece
 - 1 insulating piece
 - 1 insulating screw
 - 2 assembly screws
 - 1 threaded block M8

Metal multi-tooth screw

For the round holes Ø 4.5 mm in the enclosure section, punched rails and punched sections without mounting flanges.

Self-tapping screw

For the round holes Ø 4.5 mm in the enclosure section, punched rails and punched sections without mounting flanges.

Self-tapping screw

Mark, drill and tighten in a single operation using electric or pneumatic tools.

For metal thickness: 0.8 – 3 mm

Length: 16 mm

Usable length: 9.5 mm

Width across flats: 8 mm

ENCLOSURES

POWER DISTRIBUTION

CLIMATE CONTROL

IT INFRASTRUCTURE

SOFTWARE & SERVICES

FRIEDHELM LOH GROUP

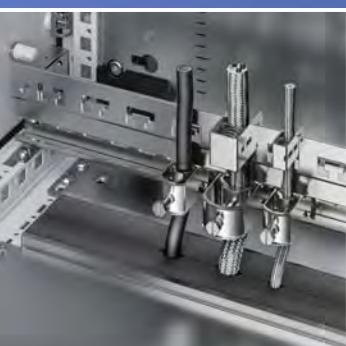

Interior installation

Component shelves

The component shelves for frame attachment enable the fast creation of support surfaces for devices; if necessary, they may also be equipped with telescopic slides. The shelves are slotted to support natural convection inside the enclosure. Additionally, the devices may be screw-fastened directly to these punchings to prevent slipping; no machining is required. The optional hinged cable support ensures secure cable routing into the enclosure.

EMC protection

The level of EMC protection in the VX25 bayed enclosure system is already high, but can be further significantly improved by adopting simple measures for cable entry. The rail for EMC shielding brackets provides strain relief as well as EMC contacting of inserted cables. The rail can be fitted on the horizontal or vertical enclosure section, as well as directly onto the mounting plate.

EMC cable glands

The EMC cable gland can be used for EMC-compatible insertion of individual cables. The lock nut creates a conductive connection with the enclosure. Cable glands can be used on all suitable surfaces on the enclosure.

LED system light

The LED system light is specifically designed to provide optimum illumination of the entire enclosure, when fitted both horizontally and vertically. Two different Fresnel structures ensure that all the light remains inside the enclosure, illuminating every last corner. For tool-free mounting directly into the system punchings using a system of clip-in hooks.

Easy connection

Connection is equally straightforward as assembly. The rotating connectors allow user-friendly connection, even in tight spaces. The wide-range power supply unit means that the light can be used anywhere in the world.

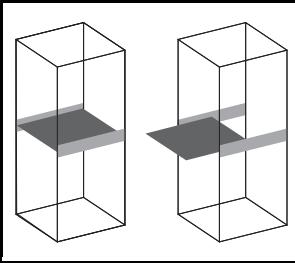

Thermostat/hygrostat

For optimum monitoring and adjustment of climate control.

Interior installation

Component shelves for frame attachment

Component shelf for frame attachment

For enclosure width 600 and 800 mm

For installation in enclosures **without** 482.6 mm (19") accommodation.
Max. depth of component shelves =
Enclosure depth - 100 mm

Technical specifications:

- Mounting bolts or mounting rails may be installed on a 25 mm pitch pattern in the enclosure depth
- Mounting hole for handles provided.
- Slotted component shelf

Material:

- Sheet steel

Baying enclosure system VX25 Page 54 Connection accessories Page 164

Benefits:

- Optimum illumination of the entire enclosure
- Optionally with clip, screw or magnetic attachment
- Equipment to suit every application

Material:

- Plastic
- Aluminium

Colour:

- Enclosure: RAL 7016

Light colour:

- 4000 K (neutral white)

Supply includes:

- Assembly screws

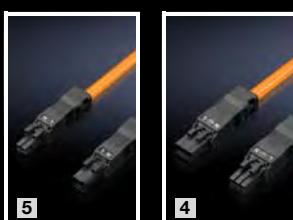

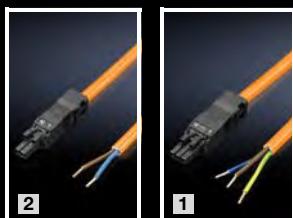

Note:

- Connection accessories should be ordered separately
- Further information on country-specific versions can be found on the Internet
- Other system lights, e.g. with a lower luminosity and for compact enclosures, can be found on the Internet

Mounting kit magnet

for LED system light

For sticking onto the rear of lights without a socket.

P. of	Model No.
2 pc(s).	2500.490

Interior installation

Climate control accessories

Thermostat with strain relief

For controlling fan-and-filter units, roof-mounted fans, heaters and heat exchangers, and also as a signal generator for monitoring the enclosure internal temperature.

Design:

- Strain relief and contact hazard protection

Benefits:

- Flexible mounting on a vertical or horizontal 35 mm support rail to EN 50 022, and snap fastening in the enclosure section or on the mounting plate

Technical specifications:

- Bi-metal controller as a temperature-sensitive element with thermal feedback
- Contact population: Single-pole change-over contact as a quick-break contact
- Permissible contact load: Category 5 – 3 (heating): AC 10 (4) A (inductive load at $\cos \phi = 0.6$)/category 5 – 4 (cooling): AC 5 (4) A (inductive load at $\cos \phi = 0.6$)
- Switching difference: approx. 1 K \pm 0.8 K
- Connection: Screwless spring terminal with PE entry

Colour:

- RAL 7016

Protection category IP to IEC 60 529:

- IP 20

Rated operating voltage V, ~	Setting range	Operating temperature range	Storage temperature range	P. of	Model No.
24 - 230, 1~	+5°C...+60°C	-40°C...+60°C	-45°C...+70°C	1 pc(s).	3110.100

Hygrostat with strain relief

Switches on the heater and/or fan when a preset relative humidity in the enclosure is exceeded. This reduces the relative humidity, thereby preventing condensation from forming on assemblies or electronic components.

Design:

- Strain relief and contact hazard protection

Benefits:

- Flexible mounting on a vertical or horizontal 35 mm support rail to EN 50 022, and snap fastening in the enclosure section or on the mounting plate using the supplied adaptor

Colour:

- RAL 7016

Protection category IP to IEC 60 529:

- IP 20

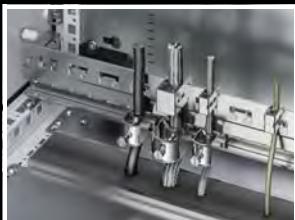

Technical specifications:

- Contact population: Single-pole change-over contact as a quick-break contact
- Permissible contact load: AC \sim 5 (0.2) A (inductive load at $\cos \phi = 0.6$)/DC = max. 20 W
- Setting range: 50 – 100% relative humidity
- Switching difference: approx. 4%

Rated operating voltage V, ~	Operating temperature range	Storage temperature range	P. of	Model No.
24 - 230, 1~ 12 - 75 (DC)	-40°C...+60°C	-45°C...+70°C	1 pc(s).	3118.100

Interior installation

EMC

Rail

for EMC shielding bracket and strain relief

Combined rail for strain relief and EMC contacting of inserted cables.

Benefits:

- Additional contacting on the left or right of the rail via existing holes (9 mm diameter)
- Prepared for tool-free mounting of EMC shielding brackets

Installation options:

- On the horizontal/vertical enclosure section
- On the mounting plate, may also be fitted without a retaining bracket

Design:

- C rail to accommodate cable clamps
- T-head cut-outs on a 40 mm pitch pattern for cable clamping using cable ties

Material:

- Extruded aluminium section

Surface finish:

- Chrome-free passivated

Supply includes:

- 1 rail
- 2 retaining brackets
- Assembly parts

For enclosure width mm	Length mm	P. of	Model No.
600	553	1 pc(s).	2388.650
800	753	1 pc(s).	2388.850
1000	953	1 pc(s).	2388.050
1200	1153	1 pc(s).	2388.125

Also required:

- EMC shielding bracket, see page 166
- Cable clamps, see page 188

Accessories:

- Bracket/spacer, see page 156
- Quick-assembly block, see page 156
- Angle piece, see page 156
- Earth straps, see page 169
- Earthing braids, see page 169

Possible alternative:

- C rails 30/15, see page 152

EMC shielding bracket

Quick assembly without the use of tools:
Press the EMC shielding bracket against the cable shield and clip into the rail. Diameter changes are compensated in full by the spring of the EMC shielding bracket.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

For shield diameter mm	P. of	Model No.
3 – 10	10 pc(s).	2388.100
4 – 15	10 pc(s).	2388.150
10 – 20	10 pc(s).	2388.200
15 – 28	10 pc(s).	2388.280

EMC cable gland

The cable sheathing may optionally be interrupted at the contact point or removed completely inside the enclosure. The cable shielding in the enclosure is retained. The supplied lock nut cuts automatically into the paint when screwed onto spray-finished enclosure surfaces, thus creating a conductive connection.

Protection category IP to IEC 60 529:

- IP 68

Cable glands, metric

Size	Cable diameter mm	Minimum shield diameter ¹⁾ mm	P. of	Model No.

Assembly parts

for earth straps

For fastening the earth straps and earthing braids to:

- Horizontal and vertical enclosure sections
- Punched sections with mounting flanges, 23 x 64 mm
- Punched sections without mounting flanges, 23 x 64 mm
- Gland plates

Size	P. of	Model No.
M8	10 pc(s).	2559.000

Also required:

- For mounting on horizontal and vertical enclosure sections: Cage nut, see page 157

PE busbar

699 mm long PE busbar with 42 pre-fitted screws, including terminal clamps up to 6 mm² (fine wire conductors), 10 mm² (single wire or multi-wire conductors) and main terminal clamp up to 35 mm².

P. of	Model No.
1 pc(s.)	2364.000

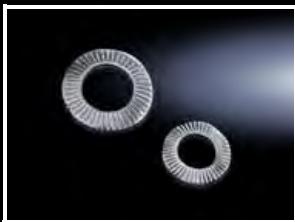

Accessories:

- Cable retainer, see page 157

Interior installation

Earthing

Contact washer

Serrated contact washers facilitate the secure connection of PE conductors, so there is no need to manually strip paint in the connection area.

Size	P. of	Model No.
M8	100 pc(s).	2335.000

Central earthing point

For connecting

- Earth straps
- Earthing braids

to the vertical and horizontal enclosure sections. The connection bracket is connected to the enclosure frame with 2 screws and is securely contacted. Earth connection is via the threaded bolt M8 x 20 mm.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

P. of	Model No.
1 pc(s).	7829.200

Supply includes:

- 1 connection bracket
- 2 assembly screws for mounting on the enclosure section
- 2 serrated washers
- 1 nut M8
- 1 contact washer M8
- 1 washer

ISV distribution enclosures

Installation kits

Installation kit

For mounting ISV installation modules in the enclosure.

Supply includes:

- Mounting aid support
- Contact hazard protection
- Assembly parts

Accessories:

- Cross rail, see page 178
- Mounting angle, see page 178
- Depth stay, see page 178
- Equipment support connector, see page 178

Cable management

		<p>Gland plates The modular base assembly allows completely flexible cable entry into the VX25, adapted to your individual requirements. Essential cable clamping takes place in the base/plinth area, directly above the insertion point, or on the mounting plate.</p>
		 <p>Cable duct In addition to the DIN punchings, the mounting holes of Rittal cable ducts also have punchings on a 25 mm pitch pattern, completely eliminating the need for any machining. Components are simply screw-fastened into the round holes. The screw heads may be securely covered with an isolator cap for insulation purposes.</p>
	<p>Cable clamping Various options are available for cable clamping and are used identically both inside the enclosure and in the base/plinth. By relocating cable clamping into the base/plinth area, more mounting space remains inside the enclosure, rather than being lost to allow for bending radii.</p>	 <p>Cable ties Simple, super-fast attachment of cables to all round holes on the enclosure and punched sections, by simply clipping into place.</p>
	<p>Cable entry on surfaces There are a number of options available, from a simple stepped collar through to a sealing frame, which also allows the insertion of pre-assembled cables with connectors.</p>	 <p>Cable conduit and cable conduit holder Allows crush-proof cable routing to moving parts such as doors, with minimal assembly work.</p>

Cable management

Cable management

Cable entry

Cable entry plate

for

- Cable entry grommets
 - Connector grommets
- instead of segments from the standard divided gland plates

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Protection category IP to IEC 60 529:

- IP 55 in conjunction with cable entry grommets or connector grommets

Supply includes:

- Assembly parts

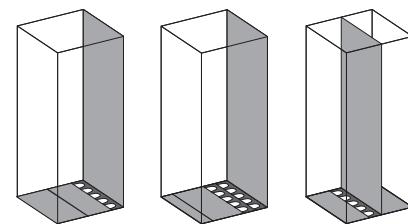

Enclosure width mm	Cut-outs per plate	P. of	Model No.
600	5	2 pc(s).	8619.800
800	8	2 pc(s).	8619.801
1000	4	4 pc(s).	8619.802
1200	6	4 pc(s).	8619.803

- Cable entry grommet, see page 182 or
- Connector grommet, see page 182

Three examples from a wide range of possibilities

The diagrams show three examples for positioning cable entry plates instead of segments from the three-piece gland plates supplied as standard. They can be positioned to fit the mounting plate. Thanks to the enclosure symmetry, where dimensions permit, cable entry plates may also be inserted in the enclosure depth, right and left, analogous to the gland plates.

Cable entry grommet

In conjunction with the cable entry plate, supports simple, fast sealing of cables inserted into the base area of enclosures.

Material:

- Body: Polypropylene
- Cover: Thermoplastic elastomer

Protection category IP to IEC 60 529:

- IP 55 if installed correctly

Cables per grommet	Max. Ø mm	P. of	Model No.
8	13	25 pc(s).	4316.000
3	21	25 pc(s).	4317.000
1	47	25 pc(s).	4318.000

Connector grommet

Suitable for cable diameters from 8 to 36 mm.

Material:

- Outer cover: Polypropylene covered with thermoplastic elastomer
- Seal: Cellular rubber

Protection category IP to IEC 60 529:

- IP 55 if installed correctly

P. of	Model No.
10 pc(s).	4311.000

Cable management

Cable entry

Section for cable entry, centre

For top-mounting on gland plates.

Material:

- Extruded aluminium section
- Seal: PU foam
- Cross-section: 30 x 25 mm

Protection category IP to IEC 60 529:

- IP 55 if installed correctly

Supply includes:

- Plug-in sections, incl. foam rubber clamp strips

Note:

- You will need two pieces per cable entry point.
- From an enclosure width of 1000 mm, the base assembly is divided into two sections in the width. Two cable entry points (left/right) may be used.

For enclosure width mm	P. of	Model No.
600	2 pc(s).	8618.800
800	2 pc(s).	8618.801

 **Accessories:**

- Cable clamp rail, see page 187

Cable management

Cable gland

Cable gland, brass

Benefits:

- Because the gland and lock nut are sold together in a single pack, this saves additional ordering and storage
- Clamping membranes for even tightening and strain relief to protect the cables

Material:

- Brass
- Seal: TPE/NBR

Surface finish:

- Nickel-plated

Protection category IP to IEC 60 529:

- IP 68 (1 bar, 30 min.)

Approvals:

- VDE

M63 x 1.5	3 pc(s).	2411.671

Cable management

Cable gland

The connector gland proves that sometimes "less is more": significantly faster installation, a flexible sealing system for different cable diameters, and simple cable entry with pre-assembled cables. Low installation costs, a high degree of protection and flexible cable management – enjoy added value with this latest generation of cable entry solutions from Rittal.

Benefits:

- Cable diameters 4 – 16 mm
- Simple cable entry for pre-assembled cables
- Individual cables can be added or replaced without dismantling the sealing frame
- Sealing modules remain safely attached to their cables

Sealing frame

For pre-assembled cables with connectors.

External mounting on 24-pole or 16-pole connector cut-outs in:

- Module plates for divider panel
- Metal gland plates

Material:

- Frame: Polyamide
- Flat seal: CR

Protection category IP to IEC 60 529:

- IP 64

NEMA protection category:

- NEMA 12

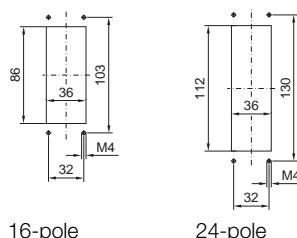

Supply includes:

- Assembly parts

For modules 20 x 20 mm	For cut-out	P. of	Model No.
10 pc(s).	24-pole	1 pc(s).	2400.900
8 pc(s).	16-pole	1 pc(s).	2400.910

Accessories:

- Module plates for divider panel, see from page 99

Sealing module

For sealing cables and lines in conjunction with a sealing frame. 20 x 20 mm and 40 x 40 mm sealing modules may be combined.

Material:

- Hard shell: Polyamide
- Seal: TPE 2

Protection category IP to IEC 60 529:

- IP 64

NEMA protection category:

- NEMA 12

Sealing modules 20 x 20 mm

Cable management

Cable duct

- With special DIN punchings for direct mounting on the enclosure section or on surfaces such as mounting plates.
- If the mounting plate is installed flush with the enclosure frame at the rear (installation position ± 0 mm), the horizontally mounted cable ducts are aligned with the cable ducts mounted on the enclosure section.
- Cable duct 50 mm wide for individually sited VX25 enclosures with side panel on the vertical section, on the left and right adjacent to the mounting plate.
- Cable duct 100 mm for mounting on the vertical enclosure frame with bayed enclosures.

Technical specifications:

- Depth: 80 mm
- Length: 2000 mm, may be cut to length
- Bar width: 5.5 mm
- Slot width: 4.5 mm

Material:

- Hard PVC
- Flame-resistant, self-extinguishing
- Temperature resistant to $+60^\circ\text{C}$

FRIEDHELM LOH GROUP

482.6 mm (19") installation system

Swing frame, large

The swing frame, large, supports full or partial installation for 482.6 mm (19") components. It can be adjusted as required within the 25 mm pitch pattern, and hinged on the left or right. Two swing frames may also be fitted together in 1200 mm wide enclosures. An opening angle of 180° is also supported with a special hinge.

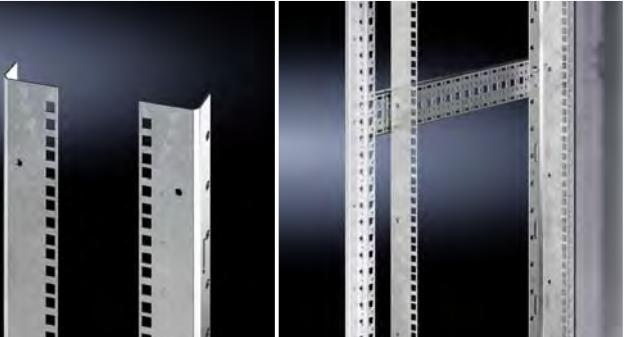

Swing frame stay

With the swing frame stay, even enclosures with heavy installed equipment can be held securely in position during maintenance work. The stay can be fitted at the top or bottom of the enclosure.

Adaptor section, 482.6 mm (19")

Turns any 600 mm wide VX25 into an electronic enclosure. The 482.6 mm (19") sections may be attached directly to the enclosure section or adjusted in the depth on a 25 mm pitch pattern on punched sections with mounting flanges. The sections may be shortened to any length for partial installation.

482.6 mm (19") installation system

Swing frame, small

The swing frame, small, is the ideal solution for partial installation with 482.6 mm (19") components. It can be positioned anywhere you like in the height and depth of the enclosure within the 25 mm pitch pattern, and is fitted in a flash.

Fastener

The 482.6 mm (19") fastener allows you to create attachment facilities for 482.6 mm (19") components in next to no time, without the need for time-consuming installation of individual cage nuts. Components are simply snap-mounted onto the 482.6 mm (19") mounting angle.

482.6 mm (19") installation system

Swing frame

Swing frame, small

for 600 and 800 mm wide enclosures
For mounting 482.6 mm (19") equipment.

Material:

- Sheet steel

Surface finish:

482.6 mm (19") fastener, 1 U

with contact

For simple screw connection of installation components within the 482.6 mm (19") mounting level. Simply slide onto the mounting angle from the inside and lock home.

Benefits:

- Fast positioning and installation instead of using individual cage nuts
- Integral contacting for potential equalisation
- Preconfigured 1 U support with 3 cage nuts, including centre attachment to standard EIA 310
- Supports multiple dismantling and reuse

Material:

- Sheet steel, zinc-plated

Multi-tooth screws

M5 x 16 mm

For optimum transmission of torques, an extended tool life, and enhanced safety and reliability when tightening and loosening screw connections.

Supply includes:

- 50 plastic washers
- 50 assembly screws

	Bit size	P. of	Model No.
M5	Multi-tooth 25	50 pc(s).	7094.130

The 3-phase coating procedure

Coating procedure	Technical properties	Technical specifications	
Degreasing, nanoceramic pretreatment, rinsing	Used as corrosion protection and to improve paint adhesion.	Nanoceramic conversion layer	
Interior/exterior: Anodic dipcoat priming	Even layer formation on all surfaces, edges and in cavities, which produces a high level of corrosion protection even at the assembly stage. The primer is readily overpainted and free from heavy metals, chromate and silicone.	Erichsen cupping test to DIN EN ISO 1520 Buchholz hardness to DIN EN ISO 2815 Cross cutting to DIN EN ISO 2409	≥ 4 mm ≥ 80 Gt 0
Stove enamelling			
Exterior: Textured powder coating	Powder-coating is distinguished by a high level of mechanical resistance, excellent corrosion protection, good resistance to chemicals and temperature, and its facility for decontamination. The powder coating is readily overpainted and is free from heavy metals, chromate and silicone.	Erichsen cupping test to DIN EN ISO 1520 Buchholz hardness to DIN EN ISO 2815 Cross cutting to DIN EN ISO 2409 Salt spray test to DIN EN ISO 9227 NSS Condensate test to DIN EN ISO 6270-2 CH Condensate test to DIN EN ISO 6270-2 AHT	≥ 3.5 mm ≥ 80 Gt 0 Test period: 168 hrs Test period: 500 hrs Test period: 20 cycles
Stove enamelling			

The coating is resistant to:

- Mineral oils
- Lubricants
- Machine emulsions
- Alcohol-based solvents (briefly, e.g. during cleaning)
- Weak acids and alkalines

Suitability for overpainting of the primer or powder coating

After careful cleaning of the surface, the standard coating may be overpainted with

- DD gloss paints
- Single and dual-component gloss paints
- Car repair paints
- Powder paints
- Water-based paints

If in doubt, perform a compatibility test. Always follow the paint manufacturer's instructions. When overpainting, take care not to exceed 180°C and a baking time of 15 minutes.

Outdoor use of enclosures

In order to guarantee satisfactory long-term function of enclosures in outdoor use, the relevant environmental factors must be taken into account.

These include:

- UV radiation, the corrosive action of air pollution, rain, icing, snow, wind or other factors in special climatic conditions.

Condensation inside the enclosure

Condensation must be prevented by means of appropriate measures, e.g. by venting or heating the enclosure.

Protection category

The enclosure may be exposed to extreme weather conditions during outdoor use. Long periods of rain, snow, ice, high winds and temperature fluctuations place particularly high demands on the enclosure sealing. The protection category IP X3 as envisaged for external weather conditions in DIN VDE 0100, part 737, point 5.2 is often insufficient to provide permanent protection for electrical equipment.

Technical information

Protection categories to IEC 60 529 (EN 60 529)

The IP protection category is characterised by 2 numerals.

Example of a protection category, e.g. IP 43:

Code letters

IP

First numeral

4

Second numeral

3

Degrees of protection for protection against contact and foreign bodies: First numeral			Degrees of protection for protection against water: Second numeral		
First numeral	Degree of protection	Description	Second numeral	Degree of protection	Description
1	Protected against solid foreign objects with a diameter of 50 mm and greater	The object probe, a sphere 50 mm in diameter, must not penetrate fully. ¹⁾	1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects.
2	Protected against solid foreign objects with a diameter of 12.5 mm and greater	The object probe, a sphere 12.5 mm in diameter, must not penetrate fully. ¹⁾ The articulated test finger may penetrate up to its length of 80 mm, but adequate distance from hazardous parts must be adhered to.	2	Protected against vertically falling water drops when the enclosure is tilted up to 15°	Vertically falling drops shall not have any harmful effects when the enclosure is tilted up to 15° on either side of the vertical.
3	Protected against solid foreign objects with a diameter of 2.5 mm and greater	The object probe, a sphere 2.5 mm in diameter, must not penetrate at all ^{1).}	3	Protected against sprayed water	Water sprayed at an angle of up to 60° on either side of the vertical shall have no harmful effects.
4	Protected against solid foreign objects with a diameter of 1.0 mm and greater	The object probe, a sphere 1.0 mm in diameter, must not penetrate at all ^{1).}	4	Protected against splashed water	Water splashed on the enclosure from any direction shall have no harmful effects.
5	Dust-protected	The ingress of dust is not fully prevented, but dust shall not enter to such an extent as to impair satisfactory operation of the device or safety.	5	Protected against water jets	Water directed at the enclosure from any direction in a jet shall have no harmful effects.
6	Dust-tight	No ingress of dust at a partial vacuum of 20 mbar inside the enclosure.	6	Protected against powerful water jets	Water directed at the enclosure from every direction in a powerful jet shall have no harmful effects.
			7	Protected against temporary immersion in water	Water must not ingress to such an extent as to cause harmful effects when the enclosure is temporarily immersed in water under standardised pressure and time conditions.
			8	Protected against continuous immersion in water	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions to be agreed between the manufacturer and the user. However, the conditions must be more difficult than for numeral 7.
			9	Protected against high-pressure and high-temperature water jets	Water projected at high pressure and high temperature against the enclosure from any direction shall not have harmful effects.

¹⁾ The full diameter of the object probe must not pass through an opening of the enclosure.

NEMA

The National Electrical Manufacturers Association (NEMA) is a standards organisation in Washington, USA, which publishes a number of technical standards but does not test or certify products itself.

The following NEMA classification outlines the protection of individuals from accidental contact with equipment and the protection of an enclosure from external factors.

Further information on protection categories may be found on the Internet at: www.ittal.com

UL/NEMA Type	Intended use and description
1	Enclosures for use predominantly indoors Protection against the penetration of foreign bodies
3	Enclosures for use predominantly outdoors Protection from rain, hail, dust, icing and the damage caused by icing
3R	Enclosures for use predominantly outdoors Protection from rain, hail, icing and the damage caused by icing
3S	Enclosures for use predominantly outdoors Protection from rain, hail and dust External mechanisms remain usable despite being coated in ice
4	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure
4X	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure Increased protection from corrosion
12, 12K	Enclosures for use predominantly indoors Protection against dust deposits, foreign bodies and non-corrosive dripping liquids
13	Enclosures for use predominantly indoors Protection against dust deposits, sprayed water, oil, and non-corrosive refrigerants

The UL/NEMA classifications are not directly comparable with IP protection categories, since both the test conditions and the evaluation of the test results are different

Approvals and permits

Product certifications and approvals are pivotal to the global acceptance of industrial products. Rittal products meet the highest internationally recognised quality yardsticks. All components are subjected to the most stringent testing in accordance with international standards and regulations. The consistently high product quality is ensured by a comprehensive quality management system. Regular production inspections by external test institutes also guarantee compliance with global standards

A precise allocation of products to marks of conformity can be found on our product and service pages on the Internet. www.ittal.com

PE conductor connection

The PE conductor connection must be designed by the manufacturer of switchgear in accordance with the relevant VDE and/or local regulations. The enclosure packs generally contain earthing materials (screws, nuts, washers). The assembly instructions contain recommendations on installing a PE conductor. The pre-assembled earth straps, available as accessories in various cross-sections and lengths, are intended to make assembly of a PE conductor easier.

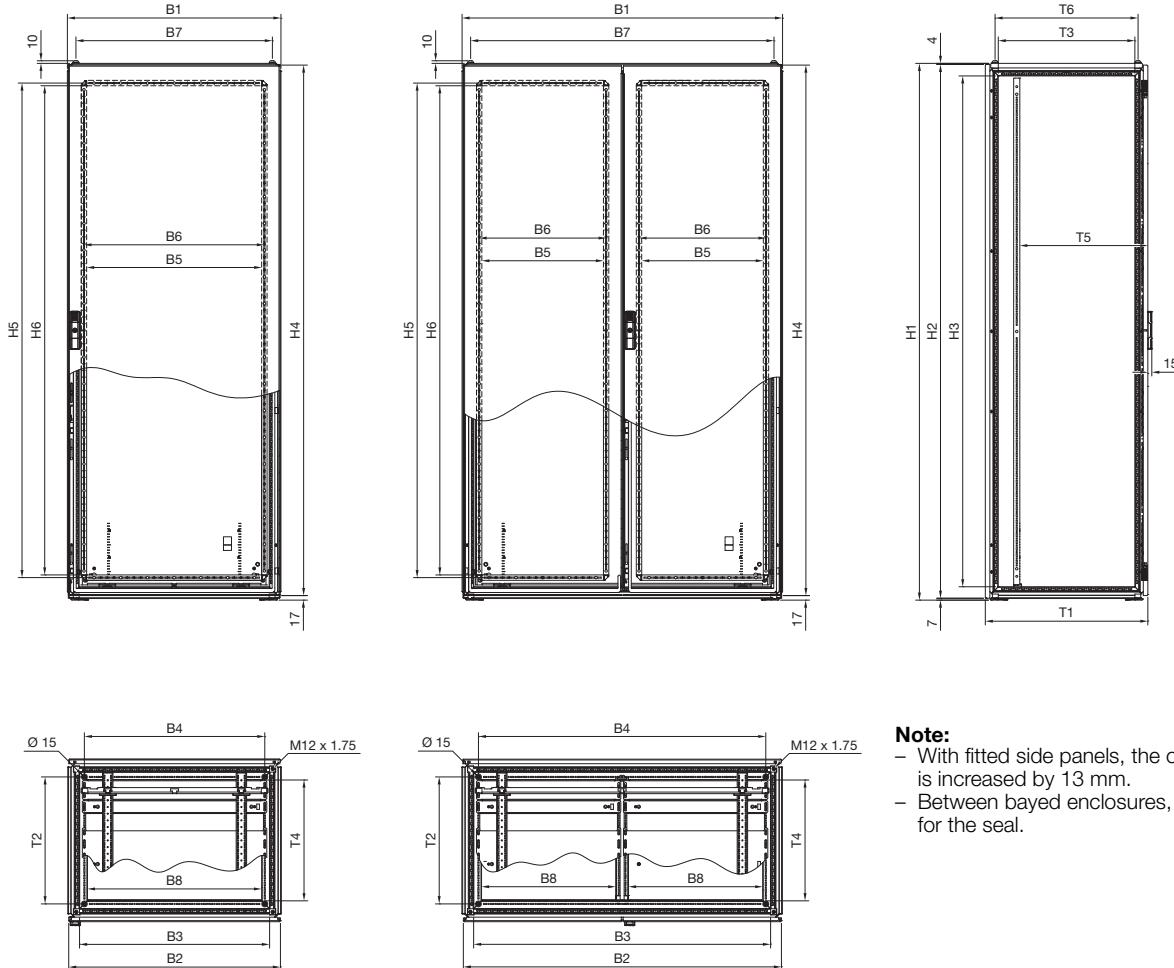

Further information can be found in our technical documentation "PE conductor connection, current carrying capacity".

Baying enclosure system VX25

Technical details

Basic enclosure

Sheet steel, stainless steel

Note:

- With fitted side panels, the overall width (B1) is increased by 13 mm.
- Between bayed enclosures, allow 1 mm for the seal.

Baying enclosure system VX25

Technical details

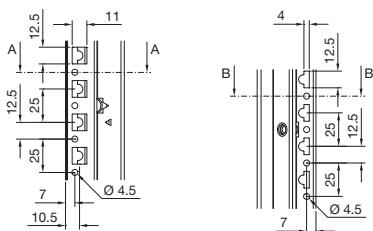

Basic enclosure

Sheet steel, stainless steel

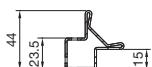

Mounting plate

Profile

Section A – A

Section B – B

Enclosure

- B1 = Overall width
- B2 = Width of door
- B3 = Clearance of enclosure frame
- B4 = Hole distance, base/plinth attachment
- B5 = Clearance of tubular door frame
- B6 = Distance between axes of the tubular door frame rows of holes
- B7 = Roof attachment spacing
- B8 = Clearance opening, base
- H1 = Overall height
- H2 = Height of rear panel
- H3 = Clearance of enclosure frame
- H4 = Height of door
- H5 = Distance between axes of the tubular door frame rows of holes
- H6 = Clearance of tubular door frame
- T1 = Overall depth
- T2 = Hole distance, base/plinth attachment
- T3 = Clearance of enclosure frame
- T4 = Clearance opening, base
- T5 = Possible mounting depth (mounting plate assembly), depth-adjustable on a 25 mm pattern
- T6 = Roof attachment spacing

Mounting plate

- F = Overall width
G = Overall height

Swing frame, small

VX25 installation examples

Partial installation

in 600 and 800 mm wide enclosures, each in the highest or lowest position.

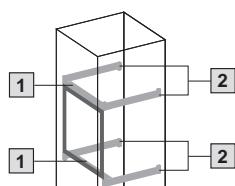

Front

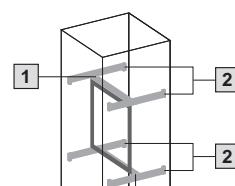

Set back

Partial installation, centre

in 600 and 800 mm wide enclosures.

Front

Set back

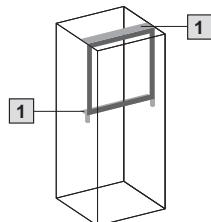

Side installation

With an enclosure depth of 600 or 800 mm, side installation of a small swing frame is identical to installation parallel to the front.

For access to the swing frame, we recommend hinges for the side panel.

¹⁾ D = Distance from inner edge of door to front edge of swing frame, may be installed deeper on a 25 mm pitch pattern

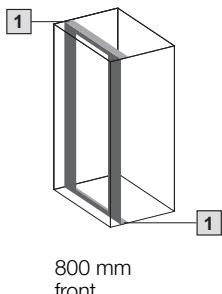

Baying enclosure system VX25

Technical details

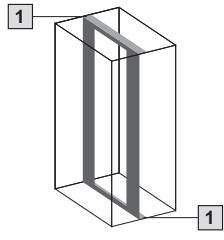

Swing frame, large

With trim panel, VX25 installation examples

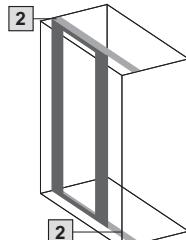

Full installation

800 mm
front

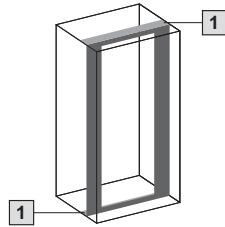

800 mm
set back

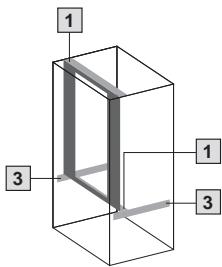

1200 mm
front

Side installation

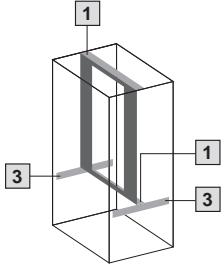

With an enclosure depth of 800 mm, side installation of a large swing frame is identical to installation parallel to the front. For access to the swing frame, we recommend hinges for the side panel.

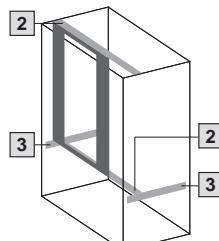

Partial installation, top

800 mm

Numerics

180° hinge
482.6 mm (19") fastener, 1 U

A

- Accessories
 - Distribution enclosures
- Adaptor
 - for connector cut-outs
 - for twin castors and levelling feet
- Adaptor piece, 482.6 mm (19")
- Adaptor section, 482.6 mm (19")
- Angle piece
- Assembly components
- Assembly parts
 - for earth straps

B

- Base mounting plate
- for base/plinth VX
- Base/plinth adaptor
- for twin castors and levelling feet
- Base/plinth corner pieces with
 - base/plinth trim panels, front and rear
- Sheet steel
- Stainless steel
- Base/plinth installation bracket
- Base/plinth trim panels
- Sides, sheet steel
- Sides, stainless steel
- Vented, sheet steel
- with brush strip, sheet steel
- Baying block, internal
- Baying bracket, internal
- Baying connector, external
- Baying enclosure system VX25
 - Distribution enclosure
 - Electronic enclosure
 - IP 66/NEMA 4
 - IP 66/NEMA 4X
 - Modular enclosure
 - Sheet steel
 - Stainless steel
- Baying kit, VX25 to TS 8
- Blanking cover
 - ISV
- Bracket
 - Wall bracket
- Bracket/spacer
- Busbar modules ISV

C

C rail	
- 30/15	152
Cable clamp	
- for C rails	188
- for cable clamp rails	187
Cable clamp rail	
- C-section	187
- Right angle section	187
Cable conduit/cable conduit holder	188
Cable duct	186

- Cable entry gland
- Cable entry grommet
- Cable entry plate
- Cable gland

- Brass
- EMC
- Polyamide
- Cable tie
- Cage nut
- Castors
- Central earthing point
- Circuit-breaker modules ISV
- Clamp rail for cables
- Climate control doors
- Combination angle
- Comfort handle VX
- Component shelf
 - for frame attachment
- Connection accessories
 - for LED system light
- Connection terminal blocks ISV
- Connector gland
 - Sealing frame
 - Sealing module
- Connector grommet
- Contact cutter
- Contact hazard protection modules ISV
- Contact paint
- Contact washer
- Cover
 - Baying, top
 - Baying, vertical
- Cover plate
 - for connector cut-outs
- Cover strips ISV
- Cover with door
- Crane bracket
- Cross member
 - Adjustable
- Cross-brace
 - for mounting plates
- Cross-rails ISV

D

- Depth extension frame ISV
- Depth stay ISV
- DIN rail mounted device modules ISV
- Disconnector cross-member ISV
- Distribution enclosure VX25
- Divider panel
 - for module plates
- Door latch
 - for bayed suites
- Door stay for escape routes
- Door-operated switch
 - for LED system light
- Drawer
 - 482.6 mm (19")
 - for VX
- Dust guard trim

Index

H

- Handles
 - for mounting plates
- Hinge attachment
 - for partial mounting plate
- Hinges
 - 180°
 - for side panel, screw-fastened, sheet steel
- Holder
 - for cable conduit
 - for protective bar
- Hygrometer
 - with strain relief

I

- Identification strip
 - 130
- Installation kit
 - for back-to-back mounting plates
 - for swing frame, large
 - for swing frame, small, and partial mounting plate
 - 192
- Installation modules ISV
 - 171
- IP 66/NEMA 4, VX25
 - 67
- IP 66/NEMA 4X, VX25
 - 75
- Isolator cap for screw head
 - 186
- Isolator door cover
 - 102
- ISV distribution enclosure VX25
