Communication Adapter		
1719-AENTR	The EtherNet/IP adapter forms the interface between the I/O modules on the backplane and the process control system. It supports all single width and dual width I/O modules. Thereby signals from NAMUR sensors, mechanical contacts, high-power solenoid drivers, power relays, sounders, and alarm LEDs are transported to the higher-level bus system. The adapter supports HART.	<ul style="list-style-type: none"> • Communication via EtherNet/IP • HART communication via EtherNet/IP • Interface between the I/O modules and the PCS/PLC • Installation in Zone 2 or Class I, Div. 2 or safe area • Nonvolatile memory for configuration and parameter settings • Permanently self-monitoring • Permits vertical or horizontal mounting in Zone 2⁽¹⁾
Digital Input		
1719-IJ	The device accepts digital input signals of NAMUR sensors or mechanical contacts from the hazardous area. Open and short-circuit line faults are detected. The intrinsically safe inputs are galvanically isolated from the bus and the power supply.	<ul style="list-style-type: none"> • 1-channel (1719-IJ); 8-channel (1719-IBN8B, 1719-IBN8) • Input Ex ia • Input for frequency, counter, direction of rotation (1719-IJ) • Digital input max. 15 kHz (1719-IJ) • Dry contact or NAMUR inputs (1719-IBN8B, 1719-IBN8) • Installation in Zone 2 or Class I, Div. 2 or safe area • Line fault detection (LFD) • Permanently self-monitoring • Permits vertical or horizontal mounting in Zone 2⁽¹⁾ • Module can be exchanged under voltage when the area is nonhazardous
1719-IBN8B		
1719-IBN8		
Analog Input		
1719-IF4HB	The transmitter power supply feeds 2-wire transmitters. Active signals from separately powered field devices and 4-wire transmitters can be connected. Open and short-circuit line faults are detected. The intrinsically safe inputs are galvanically isolated from the bus and the power supply.	<ul style="list-style-type: none"> • 4-channel • Inputs Ex ia • Power supply for 2-wire transmitters with 4 mA...20 mA (1719-IF4HB) • Converter for 2-, 3- and 4-wire RTDs (Pt100...Pt1000), slide wire sensors etc. (1719-IR4B) • Converter for thermocouples and mV-signals (1719-IT4B) • Supply circuit 15V (20 mA) (1719-IF4HB) • Input from active signals of 4-wire transmitters (1719-IF4HB) • Installation in Zone 2 or Class I, Div. 2 or safe area • HART communication (1719-IF4HB) • Line fault detection (LFD) (1719-IF4HB, 1719-IR4B, 1719-IT4B): one LED per channel (1719-IF4HB) • Permanently self-monitoring • Permits vertical or horizontal mounting in Zone 2⁽¹⁾ • Module can be exchanged under voltage when the area is nonhazardous
1719-IR4B	The RTD converter accepts 2-, 3-, 4-wire RTD signals (Pt100...Pt1000) and slide-wire sensors from the field. Ni100 through Ni1000 can also be connected. Open and short-circuit line faults are detected. The intrinsically safe inputs are galvanically isolated from the bus and the power supply.	
1719-IT4B	The thermocouple converter accepts thermocouple or mV signals from the field. Open circuit line fault alarms are detected. The intrinsically safe inputs are galvanically isolated from the bus and the power supply. There is a functional isolation between the channels.

Important User Information

Solid-state equipment has operational characteristics differing from those of electromechanical equipment. Safety Guidelines for the Application, Installation and Maintenance of Solid State Controls (publication [SGI-1.1](#) available from your local Rockwell Automation sales office or online at <http://www.rockwellautomation.com/literature/>) describes some important differences between solid-state equipment and hard-wired electromechanical devices. Because of this difference, and also because of the wide variety of uses for solid-state equipment, all persons responsible for applying this equipment must satisfy themselves that each intended application of this equipment is acceptable.

In no event will Rockwell Automation, Inc. be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this publication are included solely for illustrative purposes.
